> I'm looking forward to the new development at the reams lot, and think this will be good for the area because this lot has become blighted. Higher density housing is needed in Sandy and this lot is an ideal location for it. Leaving this lot commercial would be a detriment to the city. Commercial is not viable at this location. The only thing I'm not sure of is if the homes should be rentals. I hope the developer will be true to his word and will sell them when he can. We need a new housing like this.
