Yes! You may include it. Although I do think the new program is good, I fear that it will not have the same encouraging affect for people to beautify their yards twice a year, because it will not be a scheduled event. I think more people are likely to forget about the new program, and less likely do utilize it.

To whom it may concern, I have just heard about Mayor Bradburn trying to eliminate bulk waste pick up in spring and fall! This makes me so disappointed as we moved from one home in sandy and chose to specifically stay in sandy because we love the bulk waste program! It's such an amazing initiative That encourages neighbors to keep their yards and homes tidy, which increases our desire to live in beautiful sandy neighborhoods! I have seen so many times the contagious affect of one neighbor starting a pile while beautifying their home, which then starts a chain reaction of neighbors wanting to do the same! This is such a wonderful program that we truly feel privileged to have in sandy, and would be sorely disappointed if it were to be eliminated!

Hope you reconsider!

Thanks,
