**Subject:** Semi Annual Trash pickup

Cindy,

It has been brought to my attention that our Sandy City Trash collection day has come to an end and will not be continuing this year without some changes.

Currently my zip code is very desirable for potential buyer which helps my home value (which boosts tax dollars). I believe this program contributes to my neighborhood desirability. My neighbors nor I have junk or trashy yards which promotes value.

I would like to voice my frustration of the removal of this program. This program makes trash and junk removal convenient and simple.

This has been a very beneficial program for my family and for my neighborhood. When the reminder of the pickup comes around I notice my family and my neighbors spend more time cleaning up their yards and discarding junk that would otherwise sit on the side of their house.

There are neighboring cities that do not have this same program and there are homes and yards in those cities that continue to fall into junk yard status because the home owners are overwhelmed without a convenient method of junk removal. Sometimes the dumpsters are too far away from their homes or the dumpsters fill up too quickly.

I fear if this program is removed the overall property values will suffer because of the junk people like to collect and store because that is easier then carrying items to a dumpster or taking to the dumpster themselves. Please do not remove the program.
