To Whom It May Concern,

We are the Armitage Family. We live in the address listed above. We have been in this area for over 40 years. It is very disappointing that the very integrity of the neighborhood is under attack. We live out here to have the space, and freedom that comes with the large lots. We have been very happy here and understand that development is inevitable. However, I think that development can bring headaches or joy. How the land is developed with greatly affect many families, ours included. We moved out here for a reason, it saddens me that our way of life is under attack.

Thank you for your time and consideration regarding this matter

Connie Armitage
