Melissa Anderson, Community Development, presented proposed code amendments to Title 21, Land Development Code. The proposed amendments will bring the Sandy City Code in compliance with the Utah State Code. Senate Bill 140 revised code relating to boundary adjustments and property lines resulting in a simplified process to adjust a shared property line between lots and/or parcels that does not require a public meeting. The Planning Commission forwarded a positive recommendation. This is an information item this evening and will come back to the Council on November 11th for consideration and action.

2. [25-320](#) Public Works Department presenting a Solutions Development Study for SR 209

Attachments: [SR-209 SDS Final Report Presentation](#)

Britney Ward, Public Works, presented the Solutions Development Study (SDS) on SR-209 (9400 S) from 1300 E to Wasatch Blvd. She summarized the purpose and need for the study. The study identified corridor issues/needs, gaps in the Little Cottonwood Canyon (LCC) EIS and reviewed winter/summer travel operations, traffic flow and existing conditions. The study also included a review of the active transportation needs. 76% of the traffic accidents along 9400 S occur between 1300 E and 2300 E.

Note: There was an issue with the Zoom webinar. Residents notified the Council staff that they were unable to access the zoom webinar. We sent out a post on social media to communicate to the residents of the technical difficulties and suggested accessing the meeting via the meeting's call in number.

Council Member Marci Houseman joined the meeting at 6:07 pm.

The Solutions Development Study is an innovative planning process developed by UDOT to capture an area's unique context and provide need driven solutions. The SDS included stakeholders, incorporated past studies and identified adopted land use. She reviewed the project timeline, the public engagement, public survey, and the suggestions and concerns generated at the public open house. Key takeaways included improved pedestrian and bicycle safety, enhanced public transit options, addressing traffic congestion, and improved road infrastructure. Council questions occurred throughout the presentation. Ms. Ward reviewed the study's recommended solutions along the 9400 S corridor to 1300 E, 1700E, Tramway Drive, Little Cottonwood Center, Highland Drive, Raintree Drive, Eastdell and continued intersections to Wasatch Blvd. Many of the recommendations included adding a pedestrian over/underpass (by 1300 E), adjustments to signal timing, adding advanced warning signals, raised medians, enhanced bike lanes and roundabouts. Ms. Ward reviewed several concept plans with the Council. She also reviewed future studies planned and interim projects. Council questions and comments continued. Following the presentation, Council moved to General Citizen Comment.
