Hi Cyndi,

I just heard that they mayor is getting rid of the bulk waste pick up program. This has always been an extreme help and I would be greatly disappointed and frustrated if the program is no longer continued. Please help keep it going.

Thank you,

Alishia Sackett

Horrible, horrible idea to discontinue a great program! Better idea would be to "ENFORCE" the current programs rules, i.e. no bulk waste on the street until the scheduled pick up window.

Thanks and regards,

Hi Cyndi, my name is Richard Burford, and I live on Sterling Drive in Sandy.

We always take advantage of the spring and fall cleanups, and would be very disappointed if they stopped.

I am not clear what the Mayor's thinking is, but this is a service that I find very valuable - and presumably pay for out of our local taxes ?

Anyway, you should keep these cleanups !

Cheers.
Richard

Hi Cyndi,

For sure you can include my email in the packet. I'm glad to hear that the mayor does have a plan B, but I don't like the dumpster program at all. I lived in West Jordan 20+ years ago and they were doing that program at the time. Just wasn't enough space in those things, and it filled up so quickly that if you weren't one of the first few residents to put your debris in it, it was full and then you were driving your stuff around the neighborhood looking for an empty one. May as well just told us to go to the dump?!? You may also include this email as well.

Thanks for the reply, I do really appreciate your time.

Subject: Spring-fall clean being eliminated

Hello,

I was made aware of this service being eliminated and wanted to voice my displeasure with that decision. I've always used it to clean up my yard during those times, as well as our neighbors using it for theirs. I feel it would be doing the city a disservice to do away with this program, as I know fewer residents would clean up their yards if they had to haul it away to the dump, as it's more convenient to just put it on the curb. Not trying to be rude, but people are lazy and this would just give them an excuse not to keep their yards cleaned up. I'm pretty sure that quite a few homes would get overgrown, and then just turn into eyesores.

Since moving to Sandy 13 years ago, I've always had pride in my home and our city as most residents keep their yards trimmed up and for the most part in order. Doing away with this program would not help, and I feel in just a few years it will definitely show what a bad decision this is.

Thanks for your time in listening to my concerns.

Cindy:

I am very disappointed that Mayor Bradbury has decided to discontinue the bulk waste-pickup program. Sandy City has a reputation for being a clean and tidy city and I believe that it is because of this program where residents, who don't have trucks or other means, can get rid of their waste. If we must go to a dumpster program, then AT LEAST schedule regular placement rather than wait for citizens to reserve them. This is yet another example where Sandy City has begun to decline in its prominence and its quality of life, and I am afraid for what might changes might be made in the future. I am very interested in what will be done with the budget money that is saved from discontinuing this program? Are we having something else in its place or will this money be divvied up into areas where we will see no differences?

Thank you,

Yes please include it. You can also add.

I mentioned the other day to my husband i wished that they would switch to dumpsters on our side of 700 east. (Like white city does the clean up) they dump them when full and bring them back. This proposal would put you in line for a dumpster and you would be out of luck if there was not one available at the right time. Dumpster instead of curb side or doing monthly pickups would solve a lot of complaints. The last thing i want is to get a citation from the city because I couldn't get my large items picked up.

Subject: Bulk pickup elimination

I am very much opposed to eliminating bulk waste pickup unless you are willing to replace it with what my daughter has out on the west side. They have a monthly pickup. There are lots of large items that need picking up that will not fit in a garbage can however a trip to the dumps is difficult or impossible to arrange. Sandy wants our yards to look nice however without the ability to have the green waste picked up 2 times a year, it will be impossible for me. Please do not give me an additional reason to want to leave sandy city!

Cyndi,

Thank you for reading my email and your quick response.

Of course you have my permission to share my email. I really do understand Mayor Blackburn's concerns and agree that the current program has problems that would be eliminated with bins. But, the bins create a whole new set of problems. And, will greatly reduce the amount of waste and junk removed from Sandy. The removal of waste and junk improves the quality of life for Sandy residents.

Councilwoman Sharkey:

Mayor Blackburn's proposal to replace free semi annual bulk curbside waste pickup with bins is a step backwards for Sandy City. Please resist this change.

Yes, there are problems with the current program as outlined in his proposal. But, the bin system also is loaded with problems. Residents are unlikely to take that extra step to reserve a bin, which means that trees and shrubs are less likely to get trimmed. Household junk will accumulate because the ease of getting it removed has been increased. More green waste will end up in our landfills rather than going to mulch.

There is a reason cities nationwide do bulk waste collection at the curb. The system works. Residents love it. It yields a better looking and cleaner city in the long run.

Please fight to preserve what must be one of the most popular non-essential services that Sandy City provides.

To whom it may concern,

I was very disappointed and frustrated to find out this week that we will no longer have a neighborhood clean up in Sandy. We schedule around this day carefully twice a year. I strongly believe that it's one of the reasons our neighborhoods and yards look nice and stay maintained. It motivates us, and all around us to do the work that needs to be done to have nice, well groomed yards.

The program that replaces our clean up is inadequate and unhelpful. Canceling this program will cause much bigger problems and lead to many more unkept yards! Please bring back our neighborhood clean up!!!

Sincerely,
Emily Loveland

Bulk cleanup provides an absolutely invaluable service to people like me. I am a disabled home owner and do not have the funds or means to transport bulk items away from my home. I look forward to this service twice yearly so I can get rid of old furnishings or other items that have fallen out of repair. The kids that tend my yard always schedule their major cleanups to coincide with bulk waste collection. I see everyone on my street participating in this service. It would be an absolute tragedy to end it.

Please keep it. If it means raising property taxes a little or imposing a separate fee for participation, please do this and keep the service. Please.

Hi Cyndi, this is Dave Hansen the insurance guy. Thanks so much for sending Linda Bullough the information regarding the sandy clean up. It's quite annoying. That has definitely been one of the greatest perks of living in Sandy. My question is "Why does the Mayor want to do this? Is it a question of cost? Can we see what the costs are and what they are projected to change to? Is it more of a question of complaints from Sandy residents who feel its dirty unattractive to have trash out for a week or so?"

The clean up is so amazing and to lose that would be a huge loss to the city.

Thanks again for keeping us informed.

Subject: Sandy City Bulk Waste Program

Hello Sandy City Council Member Cyndi Sharkey -

Thank you for being willing to receive emails regarding this drastic change in city services.

One of the biggest reasons we helped our neighborhood annex into Sandy City was because of the curbside bulk waste program. Sandy had the greatest bulk waste program in the Salt Lake valley which encouraged the citizens to clean up their yards and beautify the city as a whole.

I know this may fall on deaf ears because the new program is already being implemented. Legally the Mayor can make these type of decisions on his own, but it is bad policy to do it without consulting the city council for a vote or allowing citizens to comment.

As Mayor Bradburn said, he wants to "keep the service level as high as they are or higher" and that this new program will "provide an even higher value to our residence but do it at a lower cost". When I first heard the presentation, I came away thinking that this would be a decent and fair alternative. But as I researched it further, I realized that the numbers disagree with both statements made by the Mayor.

Who can use this new service? It was indicated that each household can rent a dumpster for a 3 day period for free up to two times during the 6 months, but that is physically an impossible task. With only 20 containers used during 26 weeks of service, and 2 pickup/drop-offs possible a week, that gives only 1,040 households a chance to reserve the container. With approximately 30,722 households in Sandy, this means that only 3.4% of the houses in Sandy can utilize this service only ONCE a year. I understand that the dumpsters are large (30-yard) and multiple neighbors can share, but assuming you can maybe get 5 to 7 neighbors to share, you are still only providing the bulk waste service to less than 25% of the citizens. And this is only if the containers are constantly moving without any downtime between drop-offs during the entire 6 months.

This new program has gone from an awesome service that 100% of the population can enjoy to a sub-standard one that less than 25% of the population can utilize. With more than a 75% decrease in service usage and only a 32% decrease in cost, the cost per household served has increased from \$37/house to \$733/dumpster. Just the contractor cost alone for each dumpster is \$497/drop-off, where Wasatch Front Waste & Recycling District offers this service for only \$145 a dumpster.

Other than the quantity of dumpsters available, the biggest issue is the size of the dumpster selected. 30-yard dumpsters are 22' long x 8' wide x 6' tall. They are difficult to safely get items into, especially for the elderly and anything heavy or bulky. After measuring my front yard, I can't legally get a dumpster of that size positioned anywhere. A 22' long dumpster would fit in front of my yard, but it will either encroach into the mandatory USPS mailbox minimum 10' clearance zone or hang over into my neighbor's driveway. I know that the USPS will leave warnings and not deliver mail because of recent experiences with dumpsters/work trucks in that location. Another issue with having only one dumpster is that there is no longer the option to segregate the Green Waste from the Bulk Waste. Everything goes to the dump.

I understand why citizens have complained during the bulk waste pickup, but the real issue is that certain citizens are not following the instructions provided with the program mailer. Putting out garbage the week before pickup and making piles no larger than 4' tall x 4' wide are two of the first instructions listed on the mailer. If people followed these two items, there wouldn't be any complaints regarding "Months of garbage on the street" and "Unsafe piles". Instead of basically removing the service, why not fine the egregious offenders.

Going from one of the best services in the valley to not providing a service for 75% of the community is a large jump. It's too bad Mayor Bradburn didn't follow good policy procedures and discuss this with the city council and allow citizen comments. I bet a better compromise somewhere in the middle ground could've been reached which would better serve the community and still reduce the cost.

Thank you for allowing me to provide my thoughts,

Paul & Jessica Pohlman

Subject: Bulk waste pick up

Mayor Bradburn canceled the bulk waste pick up without consulting the City Council or the citizenry? We rely on the bulk waste pick up to clean our yard of tree trimmings and other large things. We don't have access to a truck or other means of disposing of items too large for the trash cans. Under the proposed dumpster system, neighbors would be competing with neighbors for dumpster space and that would foster animosity rather than cooperation. There are just too few dumpsters. Those that are better at working the system would get dumpsters and everyone else's bulk trash would pile up in their yards.

Please reinstate the bulk waste semi-annual pick up!

Craig and Karen Rosevear

Good Morning Cyndi,

Thank you very much for the response. It is very meaningful to know that emails to you are being read and considered.

Yes, please share my email as you see fit. I want to also do what is best for the city and will obviously adhere to whatever is the new norm, but it may represent a hardship for the aging population such as myself.

*Thank You,
Allison*

Subject: Bulk Garbage in Sandy

Hello,

I am not able to attend the meeting on Feb 4th to voice my opinion. While I agree that a dumpster would help alleviate the streets littered with garbage before the day it is supposed to be put out and will allow for dumpster use at more convenient times;

1. If dumpsters are only placed randomly on the streets that will make it difficult if not impossible for those of us that are older to haul something much further than the end of our own driveway
2. If we have something like a piece of furniture or a chair or table, again those of us that are older will not be able to haul it to the dumpster or even be able to pick it up and hoist it up into the dumpster
3. It appears that the decision has already been made so we are being told to accept it and be inconvenienced by the city that is supposed to listen to it's citizens
4. And ... for the responses posted that were in favor of the dumpsters, I'm sure there were equal opposing voices

I would like to keep the existing fall and spring garbage clean up.

Sincerely,
Allison Seabury

Horrible, horrible idea to discontinue a great program! Better idea would be to "ENFORCE" the current programs rules, i.e. no bulk waste on the street until the scheduled pick up window.

Hi Cyndi, my name is Richard Burford, and I live on Sterling Drive in Sandy.

We always take advantage of the spring and fall cleanups, and would be very disappointed if they stopped.

I am not clear what the Mayor's thinking is, but this is a service that I find very valuable - and presumably pay for out of our local taxes ?

Anyway, you should keep these cleanups !

Cheers.
Richard

Hi Cyndi,

For sure you can include my email in the packet. I'm glad to hear that the mayor does have a plan B, but I don't like the dumpster program at all. I lived in West Jordan 20+ years ago and they were doing that program at the time. Just wasn't enough space in those things, and it filled up so quickly that if you weren't one of the first few residents to put your debris in it, it was full and then you were driving your stuff around the neighborhood looking for an empty one. May as well just told us to go to the dump?!? You may also include this email as well.

Thanks for the reply, I do really appreciate your time.

Subject: Spring-fall clean being eliminated

Hello,

I was made aware of this service being eliminated and wanted to voice my displeasure with that decision. I've always used it to clean up my yard during those times, as well as our neighbors using it for theirs. I feel it would be doing the city a disservice to do away with this program, as I know fewer residents would clean up their yards if they had to haul it away to the dump, as it's more convenient to just put it on the curb. Not trying to be rude, but people are lazy and this would just give them an excuse not to keep their yards cleaned up. I'm pretty sure that quite a few homes would get overgrown, and then just turn into eyesores.

Since moving to Sandy 13 years ago, I've always had pride in my home and our city as most residents keep their yards trimmed up and for the most part in order. Doing away with this program would not help, and I feel in just a few years it will definitely show what a bad decision this is.

Thanks for your time in listening to my concerns.

Cindy:

I am very disappointed that Mayor Bradbury has decided to discontinue the bulk waste-pickup program. Sandy City has a reputation for being a clean and tidy city and I believe that it is because of this program where residents, who don't have trucks or other means, can get rid of their waste. If we must go to a dumpster program, then AT LEAST schedule regular placement rather than wait for citizens to reserve them. This is yet another example where Sandy City has begun to decline in its prominence and its quality of life, and I am afraid for what might changes might be made in the future. I am very interested in what will be done with the budget money that is saved from discontinuing this program? Are we having something else in its place or will this money be divvied up into areas where we will see no differences?

Thank you,

I just read that the mayor is proposing to discontinue the bulk pick up program. As a resident I look forward to this service. I believe it helps keep Sandy residence on top of cleaning and maintaining their property which contributes to community beautification. I have friends who's cities (Cottonwood and Sugar House) who are on the dumpster program and it does not work. They are frustrated when the dumpsters are immediately filled. I believe the the quality of life in Sandy is better because of the bulk waste pick ups. It motivates people to be proud of their city.

I was informed today that Sandy city will know longer be doing a spring and fall clean up pick up. I am very disappointed in this. As a long time resident of Sandy city I find this as a disappointing move to try to save money. We pay plenty of taxes. Renting just a few dumpsters for the city to use is not a solution but a slap in the residents faces. I ask myself, why can Cottonwood Heights city afford it????!!

Please contact me.

To whom it may concern;

Please don't get rid of fall and spring pick up. I have neighbors that save all of their junk up and take it out 2 times a year. I fear that if there no pick up they will never remove the garbage from their yards. This should be included in the taxes we are paying and have paid for years. This would be a large disservice to Sandy neighborhoods to discontinue this service. There is a reason that Sandy City and its neighborhoods stay looking nice and clean.
Please keep Fall and Spring clean up!!

Sincerely,
Courtney Monsen
16 year Sandy Resident

I was made aware of this service being eliminated and wanted to voice my displeasure with that decision. I've always used it to clean up my yard during those times, as well as our neighbors using it for theirs. I feel it would be doing the city a disservice to do away with this program, as I know fewer residents would clean up their yards if they had to haul it away to the dump, as it's more convenient to just put it on the curb. Not trying to be rude, but people are lazy and this would just give them an excuse not to keep their yards cleaned up. I'm pretty sure that quite a few homes would get overgrown, and then just turn into eyesores.

Since moving to Sandy 13 years ago, I've always had pride in my home and our city as most residents keep their yards trimmed up and for the most part in order. Doing away with this program would not help, and I feel in just a few years it will definitely show what a bad decision this is.

Thanks for your time in listening to my concerns.

Cindy:

I am very disappointed that Mayor Bradbury has decided to discontinue the bulk waste-pickup program. Sandy City has a reputation for being a clean and tidy city and I believe that it is because of this program where residents, who don't have trucks or other means, can get rid of their waste. If we must go to a dumpster program, then AT LEAST schedule regular placement rather than wait for citizens to reserve them. This is yet another example where Sandy City has begun to decline in its prominence and its quality of life, and I am afraid for what might changes might be made in the future. I am very interested in what will be done with the budget money that is saved from discontinuing this program? Are we having something else in its place or will this money be divvied up into areas where we will see no differences?

Thank you,

Yes please include it. You can also add.

I mentioned the other day to my husband i wished that they would switch to dumpsters on our side of 700 east. (Like white city does the clean up) they dump them when full and bring them back. This proposal would put you in line for a dumpster and you would be out of luck if there was not one available at the right time. Dumpster instead of curb side or doing monthly pickups would solve a lot of complaints. The last thing i want is to get a citation from the city because I couldn't get my large items picked up.

I am very much opposed to eliminating bulk waste pickup unless you are willing to replace it with what my daughter has out on the west side. They have a monthly pickup. There are lots of large items that need picking up that will not fit in a garbage can however a trip to the dumps is difficult or impossible to arrange. Sandy wants our yards to look nice however without the ability to have the green waste picked up 2 times a year, it will be impossible for me. Please do not give me an additional reason to want to leave sandy city!

Councilwoman Sharkey:

Mayor Blackburn's proposal to replace free semi annual bulk curbside waste pickup with bins is a step backwards for Sandy City. Please resist this change.

Yes, there are problems with the current program as outlined in his proposal. But, the bin system also is loaded with problems. Residents are unlikely to take that extra step to reserve a bin, which means that trees and shrubs are less likely to get trimmed. Household junk will accumulate because the ease of getting it removed has been increased. More green waste will end up in our landfills rather than going to mulch.

There is a reason cities nationwide do bulk waste collection at the curb. The system works. Residents love it. It yields a better looking and cleaner city in the long run.

Please fight to preserve what must be one of the most popular non-essential services that Sandy City provides.

Horrible, horrible idea to discontinue a great program! Better idea would be to "ENFORCE" the current programs rules, i.e. no bulk waste on the street until the scheduled pick up window.

Thanks and regards,

Hi Cyndi, my name is Richard Burford, and I live on Sterling Drive in Sandy.

We always take advantage of the spring and fall cleanups, and would be very disappointed if they stopped.

I am not clear what the Mayor's thinking is, but this is a service that I find very valuable - and presumably pay for out of our local taxes ?

Anyway, you should keep these cleanups !

Cheers.
Richard

Hi Cyndi,

For sure you can include my email in the packet. I'm glad to hear that the mayor does have a plan B, but I don't like the dumpster program at all. I lived in West Jordan 20+ years ago and they were doing that program at the time. Just wasn't enough space in those things, and it filled up so quickly that if you weren't one of the first few residents to put your debris in it, it was full and then you were driving your stuff around the neighborhood looking for an empty one. May as well just told us to go to the dump?!? You may also include this email as well.

Thanks for the reply, I do really appreciate your time.

Subject: Sandy City twice yearly garbage pickup

Ms. Sharkey:

As long time Sandy residents we most whole-heartedly support KEEPING this garbage clean up. It has meant a lot to our whole city to keep it clean of waste products and it certainly helps those of us who are older and cannot some of this for ourselves. It has been a great service for all these years; please keep in going!

Thank you for this support.

To whom it may concern,

I was very disappointed and frustrated to find out this week that we will no longer have a neighborhood clean up in Sandy. We schedule around this day carefully twice a year. I strongly believe that it's one of the reasons our neighborhoods and yards look nice and stay maintained. It motivates us, and all around us to do the work that needs to be done to have nice, well groomed yards.

The program that replaces our clean up is inadequate and unhelpful. Canceling this program will cause much bigger problems and lead to many more unkept yards! Please bring back our neighborhood clean up!!!

Sincerely,
Emily Loveland

If what I heard is correct I am very disappointed in the the mayor and his proposal to end the twice yearly bulk pickup program and change to a dumpster program. If citizens are not encouraged to clean out their homes and property of unwanted items, our beautiful Sandy will change forever. Knowing when there will be a pickup is very helpful in organizing projects. Getting your waste to a dumpster is not always easy, especially if you are a senior. And if the dumpster is already full it's twice as difficult.

I may not always agree on how my tax money should be spent but I am firmly behind the bulk waste pickup program and how it benefits Sandy citizens.

Horrible, horrible idea to discontinue a great program! Better idea would be to "ENFORCE" the current programs rules, i.e. no bulk waste on the street until the scheduled pick up window.

Hi Cyndi, my name is Richard Burford, and I live on Sterling Drive in Sandy.

We always take advantage of the spring and fall cleanups, and would be very disappointed if they stopped.

I am not clear what the Mayor's thinking is, but this is a service that I find very valuable - and presumably pay for out of our local taxes ?

Anyway, you should keep these cleanups !

Cheers.
Richard

Hi Cyndi,

For sure you can include my email in the packet. I'm glad to hear that the mayor does have a plan B, but I don't like the dumpster program at all. I lived in West Jordan 20+ years ago and they were doing that program at the time. Just wasn't enough space in those things, and it filled up so quickly that if you weren't one of the first few residents to put your debris in it, it was full and then you were driving your stuff around the neighborhood looking for an empty one. May as well just told us to go to the dump?!? You may also include this email as well.

Thanks for the reply, I do really appreciate your time.

Subject: Spring-fall clean being eliminated

Hello,

I was made aware of this service being eliminated and wanted to voice my displeasure with that decision. I've always used it to clean up my yard during those times, as well as our neighbors using it for theirs. I feel it would be doing the city a disservice to do away with this program, as I know fewer residents would clean up their yards if they had to haul it away to the dump, as it's more convenient to just put it on the curb. Not trying to be rude, but people are lazy and this would just give them an excuse not to keep their yards cleaned up. I'm pretty sure that quite a few homes would get overgrown, and then just turn into eyesores.

Since moving to Sandy 13 years ago, I've always had pride in my home and our city as most residents keep their yards trimmed up and for the most part in order. Doing away with this program would not help, and I feel in just a few years it will definitely show what a bad decision this is.

Thanks for your time in listening to my concerns.

Cindy:

I am very disappointed that Mayor Bradbury has decided to discontinue the bulk waste-pickup program. Sandy City has a reputation for being a clean and tidy city and I believe that it is because of this program where residents, who don't have trucks or other means, can get rid of their waste. If we must go to a dumpster program, then AT LEAST schedule regular placement rather than wait for citizens to reserve them. This is yet another example where Sandy City has begun to decline in its prominence and its quality of life, and I am afraid for what might changes might be made in the future. I am very interested in what will be done with the budget money that is saved from discontinuing this program? Are we having something else in its place or will this money be divvied up into areas where we will see no differences?

Thank you,

Yes please include it. You can also add.

I mentioned the other day to my husband i wished that they would switch to dumpsters on our side of 700 east. (Like white city does the clean up) they dump them when full and bring them back. This proposal would put you in line for a dumpster and you would be out of luck if there was not one available at the right time. Dumpster instead of curb side or doing monthly pickups would solve a lot of complaints. The last thing i want is to get a citation from the city because I couldn't get my large items picked up.

I am very much opposed to eliminating bulk waste pickup unless you are willing to replace it with what my daughter has out on the west side. They have a monthly pickup. There are lots of large items that need picking up that will not fit in a garbage can however a trip to the dumps is difficult or impossible to arrange. Sandy wants our yards to look nice however without the ability to have the green waste picked up 2 times a year, it will be impossible for me. Please do not give me an additional reason to want to leave sandy city!

Cyndi,

Thank you for reading my email and your quick response.

Of course you have my permission to share my email. I really do understand Mayor Blackburn's concerns and agree that the current program has problems that would be eliminated with bins. But, the bins create a whole new set of problems. And, will greatly reduce the amount of waste and junk removed from Sandy. The removal of waste and junk improves the quality of life for Sandy residents.

Subject: Bulk pick up

Councilwoman Sharkey:

Mayor Blackburn's proposal to replace free semi annual bulk curbside waste pickup with bins is a step backwards for Sandy City. Please resist this change.

Yes, there are problems with the current program as outlined in his proposal. But, the bin system also is loaded with problems. Residents are unlikely to take that extra step to reserve a bin, which means that trees and shrubs are less likely to get trimmed. Household junk will accumulate because the ease of getting it removed has been increased. More green waste will end up in our landfills rather than going to mulch.

There is a reason cities nationwide do bulk waste collection at the curb. The system works. Residents love it. It yields a better looking and cleaner city in the long run.

Please fight to preserve what must be one of the most popular non-essential services that Sandy City provides.

Subject: Sandy City Bulk Waste Program

Hello Sandy City Council Member Cyndi Sharkey -

Thank you for being willing to receive emails regarding this drastic change in city services.

One of the biggest reasons we helped our neighborhood annex into Sandy City was because of the curbside bulk waste program. Sandy had the greatest bulk waste program in the Salt Lake valley which encouraged the citizens to clean up their yards and beautify the city as a whole.

I know this may fall on deaf ears because the new program is already being implemented. Legally the Mayor can make these type of decisions on his own, but it is bad policy to do it without consulting the city council for a vote or allowing citizens to comment.

As Mayor Bradburn said, he wants to "keep the service level as high as they are or higher" and that this new program will "provide an even higher value to our residence but do it at a lower cost". When I first heard the presentation, I came away thinking that this would be a decent and fair alternative. But as I researched it further, I realized that the numbers disagree with both statements made by the Mayor.

Who can use this new service? It was indicated that each household can rent a dumpster for a 3 day period for free up to two times during the 6 months, but that is physically an impossible task. With only 20 containers used during 26 weeks of service, and 2 pickup/drop-offs possible a week, that gives only 1,040 households a chance to reserve the container. With approximately 30,722 households in Sandy, this means that only 3.4% of the houses in Sandy can utilize this service only ONCE a year. I understand that the dumpsters are large (30-yard) and multiple neighbors can share, but assuming you can maybe get 5 to 7 neighbors to share, you are still only providing the bulk waste service to less than 25% of the citizens. And this is only if the containers are constantly moving without any downtime between drop-offs during the entire 6 months.

This new program has gone from an awesome service that 100% of the population can enjoy to a sub-standard one that less than 25% of the population can utilize. With more than a 75% decrease in service usage and only a 32% decrease in cost, the cost per household served has increased from \$37/house to \$733/dumpster. Just the contractor cost alone for each dumpster is \$497/drop-off, where Wasatch Front Waste & Recycling District offers this service for only \$145 a dumpster.

Other than the quantity of dumpsters available, the biggest issue is the size of the dumpster selected. 30-yard dumpsters are 22' long x 8' wide x 6' tall. They are difficult to safely get items into, especially for the elderly and anything heavy or bulky. After measuring my front yard, I can't legally get a dumpster of that size positioned anywhere. A 22' long dumpster would fit in front of my yard, but it will either encroach into the mandatory USPS mailbox minimum 10' clearance zone or hang over into my neighbor's driveway. I know that the USPS will leave warnings and not deliver mail because of recent experiences with dumpsters/work trucks in that location. Another issue with having only one dumpster is that there is no longer the option to segregate the Green Waste from the Bulk Waste. Everything goes to the dump.

I understand why citizens have complained during the bulk waste pickup, but the real issue is that certain citizens are not following the instructions provided with the program mailer. Putting out garbage the week before pickup and making piles no larger than 4' tall x 4' wide are two of the first instructions listed on the mailer. If people followed these two items, there wouldn't be any complaints regarding "Months of garbage on the street" and "Unsafe piles". Instead of basically removing the service, why not fine the egregious offenders.

Going from one of the best services in the valley to not providing a service for 75% of the community is a large jump. It's too bad Mayor Bradburn didn't follow good policy procedures and discuss this with the city council and allow citizen comments. I bet a better compromise somewhere in the middle ground could've been reached which would better serve the community and still reduce the cost.

Thank you for allowing me to provide my thoughts,

Paul & Jessica Pohlman

Subject: Bulk waste pick up

Mayor Bradburn canceled the bulk waste pick up without consulting the City Council or the citizenry? We rely on the bulk waste pick up to clean our yard of tree trimmings and other large things. We don't have access to a truck or other means of disposing of items too large for the trash cans. Under the proposed dumpster system, neighbors would be competing with neighbors for dumpster space and that would foster animosity rather than cooperation. There are just too few dumpsters. Those that are better at working the system would get dumpsters and everyone else's bulk trash would pile up in their yards.

Please reinstate the bulk waste semi-annual pick up!

Good Morning Cyndi,

Thank you very much for the response. It is very meaningful to know that emails to you are being read and considered.

Yes, please share my email as you see fit. I want to also do what is best for the city and will obviously adhere to whatever is the new norm, but it may represent a hardship for the aging population such as myself.

*Thank You,
Allison*

Subject: Bulk Garbage in Sandy

Hello,

I am not able to attend the meeting on Feb 4th to voice my opinion. While I agree that a dumpster would help alleviate the streets littered with garbage before the day it is supposed to be put out and will allow for dumpster use at more convenient times;

1. If dumpsters are only placed randomly on the streets that will make it difficult if not impossible for those of us that are older to haul something much further than the end of our own driveway
2. If we have something like a piece of furniture or a chair or table, again those of us that are older will not be able to haul it to the dumpster or even be able to pick it up and hoist it up into the dumpster
3. It appears that the decision has already been made so we are being told to accept it and be inconvenienced by the city that is supposed to listen to it's citizens
4. And ... for the responses posted that were in favor of the dumpsters, I'm sure there were equal opposing voices

I would like to keep the existing fall and spring garbage clean up.

Sincerely,
Allison Seabury

Please vote to keep the twice yearly Sandy bulk waste pickup which has been the tradition in Sandy as long as I can remember. I have lived in Sandy for 35 years. This program helps keep our city cleaned up and beautiful. I'm sorry our Mayor has not lived here long and does not understand our values and traditions. Don't let him turn Sandy into a failed city like the one he came from. Please reject the proposal to end the bulk waste pickup.

Thank you for your consideration.

Horrible, horrible idea to discontinue a great program! Better idea would be to "ENFORCE" the current programs rules, i.e. no bulk waste on the street until the scheduled pick up window.

Hi Cyndi, my name is Richard Burford, and I live on Sterling Drive in Sandy.

We always take advantage of the spring and fall cleanups, and would be very disappointed if they stopped.

I am not clear what the Mayor's thinking is, but this is a service that I find very valuable - and presumably pay for out of our local taxes ?

Anyway, you should keep these cleanups !

Cheers.
Richard

Hi Cyndi,

For sure you can include my email in the packet. I'm glad to hear that the mayor does have a plan B, but I don't like the dumpster program at all. I lived in West Jordan 20+ years ago and they were doing that program at the time. Just wasn't enough space in those things, and it filled up so quickly that if you weren't one of the first few residents to put your debris in it, it was full and then you were driving your stuff around the neighborhood looking for an empty one. May as well just told us to go to the dump?!? You may also include this email as well.

Thanks for the reply, I do really appreciate your time.

Subject: Spring-fall clean being eliminated

Hello,

I was made aware of this service being eliminated and wanted to voice my displeasure with that decision. I've always used it to clean up my yard during those times, as well as our neighbors using it for theirs. I feel it would be doing the city a disservice to do away with this program, as I know fewer residents would clean up their yards if they had to haul it away to the dump, as it's more convenient to just put it on the curb. Not trying to be rude, but people are lazy and this would just give them an excuse not to keep their yards cleaned up. I'm pretty sure that quite a few homes would get overgrown, and then just turn into eyesores.

Since moving to Sandy 13 years ago, I've always had pride in my home and our city as most residents keep their yards trimmed up and for the most part in order. Doing away with this program would not help, and I feel in just a few years it will definitely show what a bad decision this is.

Thanks for your time in listening to my concerns.

Cindy:

I am very disappointed that Mayor Bradbury has decided to discontinue the bulk waste-pickup program. Sandy City has a reputation for being a clean and tidy city and I believe that it is because of this program where residents, who don't have trucks or other means, can get rid of their waste. If we must go to a dumpster program, then AT LEAST schedule regular placement rather than wait for citizens to reserve them. This is yet another example where Sandy City has begun to decline in its prominence and its quality of life, and I am afraid for what might changes might be made in the future. I am very interested in what will be done with the budget money that is saved from discontinuing this program? Are we having something else in its place or will this money be divvied up into areas where we will see no differences?

Thank you,

Yes please include it. You can also add.

I mentioned the other day to my husband i wished that they would switch to dumpsters on our side of 700 east. (Like white city does the clean up) they dump them when full and bring them back. This proposal would put you in line for a dumpster and you would be out of luck if there was not one available at the right time. Dumpster instead of curb side or doing monthly pickups would solve a lot of complaints. The last thing i want is to get a citation from the city because I couldn't get my large items picked up.

I am very much opposed to eliminating bulk waste pickup unless you are willing to replace it with what my daughter has out on the west side. They have a monthly pickup. There are lots of large items that need picking up that will not fit in a garbage can however a trip to the dumps is difficult or impossible to arrange. Sandy wants our yards to look nice however without the ability to have the green waste picked up 2 times a year, it will be impossible for me. Please do not give me an additional reason to want to leave sandy city!

Cyndi,

Thank you for reading my email and your quick response.

Of course you have my permission to share my email. I really do understand Mayor Blackburn's concerns and agree that the current program has problems that would be eliminated with bins. But, the bins create a whole new set of problems. And, will greatly reduce the amount of waste and junk removed from Sandy. The removal of waste and junk improves the quality of life for Sandy residents.

Subject: Bulk pick up

Councilwoman Sharkey:

Mayor Blackburn's proposal to replace free semi annual bulk curbside waste pickup with bins is a step backwards for Sandy City. Please resist this change.

Yes, there are problems with the current program as outlined in his proposal. But, the bin system also is loaded with problems. Residents are unlikely to take that extra step to reserve a bin, which means that trees and shrubs are less likely to get trimmed. Household junk will accumulate because the ease of getting it removed has been increased. More green waste will end up in our landfills rather than going to mulch.

There is a reason cities nationwide do bulk waste collection at the curb. The system works. Residents love it. It yields a better looking and cleaner city in the long run.

Please fight to preserve what must be one of the most popular non-essential services that Sandy City provides.

Subject: Re: Street clean up

Thank you for your quick response. I was aware of the replacement program but do not think it it's a fair replacement. The majority of people will not go to the effort to get one leaving many clean up projects undone. You can definitely include my email in the city council packet. Thank you for your help!

Subject: Street clean up

To whom it may concern,

I was very disappointed and frustrated to find out this week that we will no longer have a neighborhood clean up in Sandy. We schedule around this day carefully twice a year. I strongly believe that it's one of the reasons our neighborhoods and yards look nice and stay maintained. It motivates us, and all around us to do the work that needs to be done to have nice, well groomed yards.

The program that replaces our clean up is inadequate and unhelpful. Canceling this program will cause much bigger problems and lead to many more unkept yards! Please bring back our neighborhood clean up!!!

Sincerely,
Emily Loveland

Subject: Neighborhood Clean Up Program

To Whom It May Concern,

I am writing in regards to the Neighborhood clean up. We need to keep this program going in order to help keep our neighborhoods looking nice and decent. A lot of us are not in the position financially to pay for someone to come out and drop a dumpster off or a private company to take away junk, garbage or clutter.

This program has been useful for everyone and has allowed us to take more pride in our properties and homes.

Where the focus really needs to be is the speeding issue on 300 E from 9000 S to 9400 S. All of us who live on 300 E have been complaining about this for years and we continue to be told that there is not an issue. I have almost been rear ended by drivers while turning into my driveway. I have had people yell, honk, and tailgate me because I refuse to speed in a residential area. I am a dispatcher who proudly serves Sandy City. And when I see this going on and nothing is being done, it is very concerning to me.

Speed boards have been placed on 300 E on the east and west side of the street but it has not deterred anyone. The worst offenders is the school buses from Canyon School District and the parents who drop or pick up their kids.

I am a parent to a three year old daughter and will not let her play in our yard because of the amount of speeders on the street.

If we could place more focus on this issue and help get this area under control, that would be greatly appreciated by all of us who do not want our kids in danger of getting hit or higher chances of auto accidents due to reckless driving.

Thank you for your time.

Message submitted from the <Sandy City, UT> website.

Site Visitor Name: jamie

I just watched last nights city council meeting regarding the new bulk waste program. I am not happy about the new changes. I am extremely unhappy the mayor did it without the council and the public comments!

I use the bulk waste cleanup to throw away items that are too large for my garbage can but don't have enough items to justify a HUGE dumpster. I do not have the means to get anything to the dump so a 10.00 certificate does me no good.

Those dumpsters are HUGE. it would have been helpful when I got a new roof but not for my every day items that i use bulk waste clean up for.

I hope that the council will stop Mayor Bradburn from making sweeping changes like this in the future with out approval or at the very least public comment.

Thank you

Jamie Dowdle

Hi Cyndi,

For sure you can include my email in the packet. I'm glad to hear that the mayor does have a plan B, but I don't like the dumpster program at all. I lived in West Jordan 20+ years ago and they were doing that program at the time. Just wasn't enough space in those things, and it filled up so quickly that if you weren't one of the first few residents to put your debris in it, it was full and then you were driving your stuff around the neighborhood looking for an empty one. May as well just told us to go to the dump?!? You may also include this email as well.

Thanks for the reply, I do really appreciate your time.

Subject: Spring-fall clean being eliminated

Hello,

I was made aware of this service being eliminated and wanted to voice my displeasure with that decision. I've always used it to clean up my yard during those times, as well as our neighbors using it for theirs. I feel it would be doing the city a disservice to do away with this program, as I know fewer residents would clean up their yards if they had to haul it away to the dump, as it's more convenient to just put it on the curb. Not trying to be rude, but people are lazy and this would just give them an excuse not to keep their yards cleaned up. I'm pretty sure that quite a few homes would get overgrown, and then just turn into eyesores.

Since moving to Sandy 13 years ago, I've always had pride in my home and our city as most residents keep their yards trimmed up and for the most part in order. Doing away with this program would not help, and I feel in just a few years it will definitely show what a bad decision this is.

Thanks for your time in listening to my concerns.

Cindy:

I am very disappointed that Mayor Bradbury has decided to discontinue the bulk waste-pickup program. Sandy City has a reputation for being a clean and tidy city and I believe that it is because of this program where residents, who don't have trucks or other means, can get rid of their waste. If we must go to a dumpster program, then AT LEAST schedule regular placement rather than wait for citizens to reserve them. This is yet another example where Sandy City has begun to decline in its prominence and its quality of life, and I am afraid for what might changes might be made in the future. I am very interested in what will be done with the budget money that is saved from discontinuing this program? Are we having something else in its place or will this money be divvied up into areas where we will see no differences?

Thank you,

Yes please include it. You can also add.

I mentioned the other day to my husband i wished that they would switch to dumpsters on our side of 700 east. (Like white city does the clean up) they dump them when full and bring them back. This proposal would put you in line for a dumpster and you would be out of luck if there was not one available at the right time. Dumpster instead of curb side or doing monthly pickups would solve a lot of complaints. The last thing i want is to get a citation from the city because I couldn't get my large items picked up.

I am very much opposed to eliminating bulk waste pickup unless you are willing to replace it with what my daughter has out on the west side. They have a monthly pickup. There are lots of large items that need picking up that will not fit in a garbage can however a trip to the dumps is difficult or impossible to arrange. Sandy wants our yards to look nice however without the ability to have the green waste picked up 2 times a year, it will be impossible for me. Please do not give me an additional reason to want to leave sandy city!

Cyndi,

Thank you for reading my email and your quick response.

Of course you have my permission to share my email. I really do understand Mayor Blackburn's concerns and agree that the current program has problems that would be eliminated with bins. But, the bins create a whole new set of problems. And, will greatly reduce the amount of waste and junk removed from Sandy. The removal of waste and junk improves the quality of life for Sandy residents.

Subject: Bulk pick up

Councilwoman Sharkey:

Mayor Blackburn's proposal to replace free semi annual bulk curbside waste pickup with bins is a step backwards for Sandy City. Please resist this change.

Yes, there are problems with the current program as outlined in his proposal. But, the bin system also is loaded with problems. Residents are unlikely to take that extra step to reserve a bin, which means that trees and shrubs are less likely to get trimmed. Household junk will accumulate because the ease of getting it removed has been increased. More green waste will end up in our landfills rather than going to mulch.

There is a reason cities nationwide do bulk waste collection at the curb. The system works. Residents love it. It yields a better looking and cleaner city in the long run.

Please fight to preserve what must be one of the most popular non-essential services that Sandy City provides.

To: Cyndi Sharkey <csharkey@sandy.utah.gov>
Subject: Sandy City twice yearly garbage pickup

Ms. Sharkey:

As long time Sandy residents we most whole-heartedly support KEEPING this garbage clean up. It has meant a lot to our whole city to keep it clean of waste products and it certainly helps those of us who are older and cannot some of this for ourselves. It has been a great service for all these years; please keep in going!

Thank you for this support.

Thank you for your quick response. I was aware of the replacement program but do not think it it's a fair replacement. The majority of people will not go to the effort to get one leaving many clean up projects undone. You can definitely include my email in the city council packet. Thank you for your help!

Subject: Street clean up

To whom it may concern,

I was very disappointed and frustrated to find out this week that we will no longer have a neighborhood clean up in Sandy. We schedule around this day carefully twice a year. I strongly believe that it's one of the reasons our neighborhoods and yards look nice and stay maintained. It motivates us, and all around us to do the work that needs to be done to have nice, well groomed yards.

The program that replaces our clean up is inadequate and unhelpful. Canceling this program will cause much bigger problems and lead to many more unkept yards! Please bring back our neighborhood clean up!!!

Sincerely,
Emily Loveland

Subject: Eliminating bulk cleanup

Bulk cleanup provides an absolutely invaluable service to people like me. I am a disabled home owner and do not have the funds or means to transport bulk items away from my home. I look forward to this service twice yearly so I can get rid of old furnishings or other items that have fallen out of repair. The kids that tend my yard always schedule their major cleanups to coincide with bulk waste collection. I see everyone on my street participating in this service. It would be an absolute tragedy to end it.

Please keep it. If it means raising property taxes a little or imposing a separate fee for participation, please do this and keep the service. Please.

Hi Cyndi, this is Dave Hansen the insurance guy. Thanks so much for sending Linda Bullough the information regarding the sandy clean up. It's quite annoying. That has definitely been one of the greatest perks of living in Sandy. My question is "Why does the Mayor want to do this? Is it a question of cost? Can we see what the costs are and what they are projected to change to? Is it more of a question of complaints from Sandy residents who feel its dirty unattractive to have trash out for a week or so?"

The clean up is so amazing and to lose that would be a huge loss to the city.

Thanks again for keeping us informed.

Dave

Subject: Sandy City Bulk Waste Program

Hello Sandy City Council Member Cyndi Sharkey -

Thank you for being willing to receive emails regarding this drastic change in city services.

One of the biggest reasons we helped our neighborhood annex into Sandy City was because of the curbside bulk waste program. Sandy had the greatest bulk waste program in the Salt Lake valley which encouraged the citizens to clean up their yards and beautify the city as a whole.

I know this may fall on deaf ears because the new program is already being implemented. Legally the Mayor can make these type of decisions on his own, but it is bad policy to do it without consulting the city council for a vote or allowing citizens to comment.

As Mayor Bradburn said, he wants to "keep the service level as high as they are or higher" and that this new program will "provide an even higher value to our residence but do it at a lower cost". When I first heard the presentation, I came away thinking that this would be a decent and fair alternative. But as I researched it further, I realized that the numbers disagree with both statements made by the Mayor.

Who can use this new service? It was indicated that each household can rent a dumpster for a 3 day period for free up to two times during the 6 months, but that is physically an impossible task. With only 20 containers used during 26 weeks of service, and 2 pickup/drop-offs possible a week, that gives only 1,040 households a chance to reserve the container. With approximately 30,722 households in Sandy, this means that only 3.4% of the houses in Sandy can utilize this service only ONCE a year. I understand that the dumpsters are large (30-yard) and multiple neighbors can share, but assuming you can maybe get 5 to 7 neighbors to share, you are still only providing the bulk waste service to less than 25% of the citizens. And this is only if the containers are constantly moving without any downtime between drop-offs during the entire 6 months.

This new program has gone from an awesome service that 100% of the population can enjoy to a sub-standard one that less than 25% of the population can utilize. With more than a 75% decrease in service usage and only a 32% decrease in cost, the cost per household served has increased from \$37/house to \$733/dumpster. Just the contractor cost alone for each dumpster is \$497/drop-off, where Wasatch Front Waste & Recycling District offers this service for only \$145 a dumpster.

Other than the quantity of dumpsters available, the biggest issue is the size of the dumpster selected. 30-yard dumpsters are 22' long x 8' wide x 6' tall. They are difficult to safely get items into, especially for the elderly and anything heavy or bulky. After measuring my front yard, I can't legally get a dumpster of that size positioned anywhere. A 22' long dumpster would fit in front of my yard, but it will either encroach into the mandatory USPS mailbox minimum 10' clearance zone or hang over into my neighbor's driveway. I know that the USPS will leave warnings and not deliver mail because of recent experiences with dumpsters/work trucks in that location. Another issue with having only one dumpster is that there is no longer the option to segregate the Green Waste from the Bulk Waste. Everything goes to the dump.

I understand why citizens have complained during the bulk waste pickup, but the real issue is that certain citizens are not following the instructions provided with the program mailer. Putting out garbage the week before pickup and making piles no larger than 4' tall x 4' wide are two of the first instructions listed on the mailer. If people followed these two items, there wouldn't be any complaints regarding "Months of garbage on the street" and "Unsafe piles". Instead of basically removing the service, why not fine the egregious offenders.

Going from one of the best services in the valley to not providing a service for 75% of the community is a large jump. It's too bad Mayor Bradburn didn't follow good policy procedures and discuss this with the city council and allow citizen comments. I bet a better compromise somewhere in the middle ground could've been reached which would better serve the community and still reduce the cost.

Thank you for allowing me to provide my thoughts,

Paul & Jessica Pohlman

Subject: Bulk waste pick up

Mayor Bradburn canceled the bulk waste pick up without consulting the City Council or the citizenry? We rely on the bulk waste pick up to clean our yard of tree trimmings and other large things. We don't have access to a truck or other means of disposing of items too large for the trash cans. Under the proposed dumpster system, neighbors would be competing with neighbors for dumpster space and that would foster animosity rather than cooperation. There are just too few dumpsters. Those that are better at working the system would get dumpsters and everyone else's bulk trash would pile up in their yards.

Please reinstate the bulk waste semi-annual pick up!

Subject: Bulk Garbage in Sandy

Hello,

I am not able to attend the meeting on Feb 4th to voice my opinion. While I agree that a dumpster would help alleviate the streets littered with garbage before the day it is supposed to be put out and will allow for dumpster use at more convenient times;

1. If dumpsters are only placed randomly on the streets that will make it difficult if not impossible for those of us that are older to haul something much further than the end of our own driveway
2. If we have something like a piece of furniture or a chair or table, again those of us that are older will not be able to haul it to the dumpster or even be able to pick it up and hoist it up into the dumpster
3. It appears that the decision has already been made so we are being told to accept it and be inconvenienced by the city that is supposed to listen to it's citizens
4. And ... for the responses posted that were in favor of the dumpsters, I'm sure there were equal opposing voices

I would like to keep the existing fall and spring garbage clean up.

Sincerely,
Allison Seabury

Horrible, horrible idea to discontinue a great program! Better idea would be to "ENFORCE" the current programs rules, i.e. no bulk waste on the street until the scheduled pick up window.

Hi Cyndi, my name is Richard Burford, and I live on Sterling Drive in Sandy.

We always take advantage of the spring and fall cleanups, and would be very disappointed if they stopped.

I am not clear what the Mayor's thinking is, but this is a service that I find very valuable - and presumably pay for out of our local taxes ?

Anyway, you should keep these cleanups !

Cheers.
Richard

Hi Cyndi,

For sure you can include my email in the packet. I'm glad to hear that the mayor does have a plan B, but I don't like the dumpster program at all. I lived in West Jordan 20+ years ago and they were doing that program at the time. Just wasn't enough space in those things, and it filled up so quickly that if you weren't one of the first few residents to put your debris in it, it was full and then you were driving your stuff around the neighborhood looking for an empty one. May as well just told us to go to the dump?!? You may also include this email as well.

Thanks for the reply, I do really appreciate your time.

Subject: Spring-fall clean being eliminated

Hello,

I was made aware of this service being eliminated and wanted to voice my displeasure with that decision. I've always used it to clean up my yard during those times, as well as our neighbors using it for theirs. I feel it would be doing the city a disservice to do away with this program, as I know fewer residents would clean up their yards if they had to haul it away to the dump, as it's more convenient to just put it on the curb. Not trying to be rude, but people are lazy and this would just give them an excuse not to keep their yards cleaned up. I'm pretty sure that quite a few homes would get overgrown, and then just turn into eyesores.

Since moving to Sandy 13 years ago, I've always had pride in my home and our city as most residents keep their yards trimmed up and for the most part in order. Doing away with this program would not help, and I feel in just a few years it will definitely show what a bad decision this is.

Thanks for your time in listening to my concerns.

Cindy:

I am very disappointed that Mayor Bradbury has decided to discontinue the bulk waste-pickup program. Sandy City has a reputation for being a clean and tidy city and I believe that it is because of this program where residents, who don't have trucks or other means, can get rid of their waste. If we must go to a dumpster program, then AT LEAST schedule regular placement rather than wait for citizens to reserve them. This is yet another example where Sandy City has begun to decline in its prominence and its quality of life, and I am afraid for what might changes might be made in the future. I am very interested in what will be done with the budget money that is saved from discontinuing this program? Are we having something else in its place or will this money be divvied up into areas where we will see no differences?

Thank you,

Yes please include it. You can also add.

I mentioned the other day to my husband i wished that they would switch to dumpsters on our side of 700 east. (Like white city does the clean up) they dump them when full and bring them back. This proposal would put you in line for a dumpster and you would be out of luck if there was not one available at the right time. Dumpster instead of curb side or doing monthly pickups would solve a lot of complaints. The last thing i want is to get a citation from the city because I couldn't get my large items picked up.

I am very much opposed to eliminating bulk waste pickup unless you are willing to replace it with what my daughter has out on the west side. They have a monthly pickup. There are lots of large items that need picking up that will not fit in a garbage can however a trip to the dumps is difficult or impossible to arrange. Sandy wants our yards to look nice however without the ability to have the green waste picked up 2 times a year, it will be impossible for me. Please do not give me an additional reason to want to leave sandy city!

Cyndi,

Thank you for reading my email and your quick response.

Of course you have my permission to share my email. I really do understand Mayor Blackburn's concerns and agree that the current program has problems that would be eliminated with bins. But, the bins create a whole new set of problems. And, will greatly reduce the amount of waste and junk removed from Sandy. The removal of waste and junk improves the quality of life for Sandy residents.

Subject: Bulk pick up

Councilwoman Sharkey:

Mayor Blackburn's proposal to replace free semi annual bulk curbside waste pickup with bins is a step backwards for Sandy City. Please resist this change.

Yes, there are problems with the current program as outlined in his proposal. But, the bin system also is loaded with problems. Residents are unlikely to take that extra step to reserve a bin, which means that trees and shrubs are less likely to get trimmed. Household junk will accumulate because the ease of getting it removed has been increased. More green waste will end up in our landfills rather than going to mulch.

There is a reason cities nationwide do bulk waste collection at the curb. The system works. Residents love it. It yields a better looking and cleaner city in the long run.

Please fight to preserve what must be one of the most popular non-essential services that Sandy City provides.

Ms. Sharkey:

As long time Sandy residents we most whole-heartedly support KEEPING this garbage clean up. It has meant a lot to our whole city to keep it clean of waste products and it certainly helps those of us who are older and cannot some of this for ourselves. It has been a great service for all these years; please keep in going!

Thank you for this support.

Thank you for your quick response. I was aware of the replacement program but do not think it it's a fair replacement. The majority of people will not go to the effort to get one leaving many clean up projects undone. You can definitely include my email in the city council packet. Thank you for your help!

To whom it may concern,

I was very disappointed and frustrated to find out this week that we will no longer have a neighborhood clean up in Sandy. We schedule around this day carefully twice a year. I strongly believe that it's one of the reasons our neighborhoods and yards look nice and stay maintained. It motivates us, and all around us to do the work that needs to be done to have nice, well groomed yards.

The program that replaces our clean up is inadequate and unhelpful. Canceling this program will cause much bigger problems and lead to many more unkept yards! Please bring back our neighborhood clean up!!!

Sincerely,
Emily Loveland

Subject: Eliminating bulk cleanup

Bulk cleanup provides an absolutely invaluable service to people like me. I am a disabled home owner and do not have the funds or means to transport bulk items away from my home. I look forward to this service twice yearly so I can get rid of old furnishings or other items that have fallen out of repair. The kids that tend my yard always schedule their major cleanups to coincide with bulk waste collection. I see everyone on my street participating in this service. It would be an absolute tragedy to end it.

Please keep it. If it means raising property taxes a little or imposing a separate fee for participation, please do this and keep the service. Please.

Hi Cyndi, this is Dave Hansen the insurance guy. Thanks so much for sending Linda Bullough the information regarding the sandy clean up. It's quite annoying. That has definitely been one of the greatest perks of living in Sandy. My question is "Why does the Mayor want to do this? Is it a question of cost? Can we see what the costs are and what they are projected to change to? Is it more of a question of complaints from Sandy residents who feel its dirty unattractive to have trash out for a week or so?"

The clean up is so amazing and to lose that would be a huge loss to the city.

Thanks again for keeping us informed.

Dave

Subject: Sandy City Bulk Waste Program

Hello Sandy City Council Member Cyndi Sharkey -

Thank you for being willing to receive emails regarding this drastic change in city services.

One of the biggest reasons we helped our neighborhood annex into Sandy City was because of the curbside bulk waste program. Sandy had the greatest bulk waste program in the Salt Lake valley which encouraged the citizens to clean up their yards and beautify the city as a whole.

I know this may fall on deaf ears because the new program is already being implemented. Legally the Mayor can make these type of decisions on his own, but it is bad policy to do it without consulting the city council for a vote or allowing citizens to comment.

As Mayor Bradburn said, he wants to "keep the service level as high as they are or higher" and that this new program will "provide an even higher value to our residence but do it at a lower cost". When I first heard the presentation, I came away thinking that this would be a decent and fair alternative. But as I researched it further, I realized that the numbers disagree with both statements made by the Mayor.

Who can use this new service? It was indicated that each household can rent a dumpster for a 3 day period for free up to two times during the 6 months, but that is physically an impossible task. With only 20 containers used during 26 weeks of service, and 2 pickup/drop-offs possible a week, that gives only 1,040 households a chance to reserve the container. With approximately 30,722 households in Sandy, this means that only 3.4% of the houses in Sandy can utilize this service only ONCE a year. I understand that the dumpsters are large (30-yard) and multiple neighbors can share, but assuming you can maybe get 5 to 7 neighbors to share, you are still only providing the bulk waste service to less than 25% of the citizens. And this is only if the containers are constantly moving without any downtime between drop-offs during the entire 6 months.

This new program has gone from an awesome service that 100% of the population can enjoy to a sub-standard one that less than 25% of the population can utilize. With more than a 75% decrease in service usage and only a 32% decrease in cost, the cost per household served has increased from \$37/house to \$733/dumpster. Just the contractor cost alone for each dumpster is \$497/drop-off, where Wasatch Front Waste & Recycling District offers this service for only \$145 a dumpster.

Other than the quantity of dumpsters available, the biggest issue is the size of the dumpster selected. 30-yard dumpsters are 22' long x 8' wide x 6' tall. They are difficult to safely get items into, especially for the elderly and anything heavy or bulky. After measuring my front yard, I can't legally get a dumpster of that size positioned anywhere. A 22' long dumpster would fit in front of my yard, but it will either encroach into the mandatory USPS mailbox minimum 10' clearance zone or hang over into my neighbor's driveway. I know that the USPS will leave warnings and not deliver mail because of recent experiences with dumpsters/work trucks in that location. Another issue with having only one dumpster is that there is no longer the option to segregate the Green Waste from the Bulk Waste. Everything goes to the dump.

I understand why citizens have complained during the bulk waste pickup, but the real issue is that certain citizens are not following the instructions provided with the program mailer. Putting out garbage the week before pickup and making piles no larger than 4' tall x 4' wide are two of the first instructions listed on the mailer. If people followed these two items, there wouldn't be any complaints regarding "Months of garbage on the street" and "Unsafe piles". Instead of basically removing the service, why not fine the egregious offenders.

Going from one of the best services in the valley to not providing a service for 75% of the community is a large jump. It's too bad Mayor Bradburn didn't follow good policy procedures and discuss this with the city council and allow citizen comments. I bet a better compromise somewhere in the middle ground could've been reached which would better serve the community and still reduce the cost.

Thank you for allowing me to provide my thoughts,

Paul & Jessica Pohlman

Subject: Bulk waste pick up

Mayor Bradburn canceled the bulk waste pick up without consulting the City Council or the citizenry? We rely on the bulk waste pick up to clean our yard of tree trimmings and other large things. We don't have access to a truck or other means of disposing of items too large for the trash cans. Under the proposed dumpster system, neighbors would be competing with neighbors for dumpster space and that would foster animosity rather than cooperation. There are just too few dumpsters. Those that are better at working the system would get dumpsters and everyone else's bulk trash would pile up in their yards.

Please reinstate the bulk waste semi-annual pick up!

Horrible, horrible idea to discontinue a great program! Better idea would be to "ENFORCE" the current programs rules, i.e. no bulk waste on the street until the scheduled pick up window.

Subject: spring/fall bulk waste program

Hi Cyndi-

I'm writing to express concern over the Mayor's decision to end curbside trash pick up twice a year. I see logic in some of his reasons, and two free dumpsters a year would be great. My concern is that the amount of dumpsters is grossly inadequate for Sandy's population. It's my understanding there are only 20 dumpsters to serve 100,000+ people and over 25,000 residences! This means a few hundred people can get a dumpster in the time the dumpsters are available. Even with neighbors sharing a dumpster, there's no way every resident will even have access to one shared dumpster, let alone reserve two dumpsters for their own personal use. This plan is in great need of re-evaluation.

Another concern I have is the way in which this decision was made--in a unilateral manner with no input from residents, and little communication. People have already started collecting garbage in anticipation of clean up this spring, storing piles on the sides of their homes and in other places. I imagine some residents will find ways to dispose of large garbage on their own, but others will not. As garbage collects and cleanup never comes, neighborhoods will decline along with property values. I imagine when these residents realize curbside pickup is discontinued, all of the dumpsters for the year will be reserved. Then what? It seems unwise to suddenly and completely discontinue a program residents have relied on for years.

Thank you for your service and being willing to communicate neighborhood concerns.

Hi Cyndi, my name is Richard Burford, and I live on Sterling Drive in Sandy.

We always take advantage of the spring and fall cleanups, and would be very disappointed if they stopped.

I am not clear what the Mayor's thinking is, but this is a service that I find very valuable - and presumably pay for out of our local taxes ?

Anyway, you should keep these cleanups !

Cheers.
Richard

Hi Cyndi,

For sure you can include my email in the packet. I'm glad to hear that the mayor does have a plan B, but I don't like the dumpster program at all. I lived in West Jordan 20+ years ago and they were doing that program at the time. Just wasn't enough space in those things, and it filled up so quickly that if you weren't one of the first few residents to put your debris in it, it was full and then you were driving your stuff around the neighborhood looking for an empty one. May as well just told us to go to the dump?!? You may also include this email as well.

Thanks for the reply, I do really appreciate your time.

Subject: Spring-fall clean being eliminated

Hello,

I was made aware of this service being eliminated and wanted to voice my displeasure with that decision. I've always used it to clean up my yard during those times, as well as our neighbors using it for theirs. I feel it would be doing the city a disservice to do away with this program, as I know fewer residents would clean up their yards if they had to haul it away to the dump, as it's more convenient to just put it on the curb. Not trying to be rude, but people are lazy and this would just give them an excuse not to keep their yards cleaned up. I'm pretty sure that quite a few homes would get overgrown, and then just turn into eyesores.

Since moving to Sandy 13 years ago, I've always had pride in my home and our city as most residents keep their yards trimmed up and for the most part in order. Doing away with this program would not help, and I feel in just a few years it will definitely show what a bad decision this is.

Thanks for your time in listening to my concerns.

Cindy:

I am very disappointed that Mayor Bradbury has decided to discontinue the bulk waste-pickup program. Sandy City has a reputation for being a clean and tidy city and I believe that it is because of this program where residents, who don't have trucks or other means, can get rid of their waste. If we must go to a dumpster program, then AT LEAST schedule regular placement rather than wait for citizens to reserve them. This is yet another example where Sandy City has begun to decline in its prominence and its quality of life, and I am afraid for what might changes might be made in the future. I am very interested in what will be done with the budget money that is saved from discontinuing this program? Are we having something else in its place or will this money be divvied up into areas where we will see no differences?

Thank you,

Yes please include it. You can also add.

I mentioned the other day to my husband i wished that they would switch to dumpsters on our side of 700 east. (Like white city does the clean up) they dump them when full and bring them back. This proposal would put you in line for a dumpster and you would be out of luck if there was not one available at the right time. Dumpster instead of curb side or doing monthly pickups would solve a lot of complaints. The last thing i want is to get a citation from the city because I couldn't get my large items picked up.

Subject: Bulk pickup elimination

I am very much opposed to eliminating bulk waste pickup unless you are willing to replace it with what my daughter has out on the west side. They have a monthly pickup. There are lots of large items that need picking up that will not fit in a garbage can however a trip to the dumps is difficult or impossible to arrange. Sandy wants our yards to look nice however without the ability to have the green waste picked up 2 times a year, it will be impossible for me. Please do not give me an additional reason to want to leave sandy city!

Ms. Sharkey,
I am very disappointed and concerned about the proposed change to the Sandy City Bulk Waste Program--discontinued.
Please vote against this change if you have the opportunity to do so.
Thanks,
Robert Tucker

Cyndi,

Thank you for reading my email and your quick response.

Of course you have my permission to share my email. I really do understand Mayor Blackburn's concerns and agree that the current program has problems that would be eliminated with bins. But, the bins create a whole new set of problems. And, will greatly reduce the amount of waste and junk removed from Sandy. The removal of waste and junk improves the quality of life for Sandy residents.

Subject: Bulk pick up

Councilwoman Sharkey:

Mayor Blackburn's proposal to replace free semi annual bulk curbside waste pickup with bins is a step backwards for Sandy City. Please resist this change.

Yes, there are problems with the current program as outlined in his proposal. But, the bin system also is loaded with problems. Residents are unlikely to take that extra step to reserve a bin, which means that trees and shrubs are less likely to get trimmed. Household junk will accumulate because the ease of getting it removed has been increased. More green waste will end up in our landfills rather than going to mulch.

There is a reason cities nationwide do bulk waste collection at the curb. The system works. Residents love it. It yields a better looking and cleaner city in the long run.

Please fight to preserve what must be one of the most popular non-essential services that Sandy City provides.

Ms. Sharkey:

As long time Sandy residents we most whole-heartedly support KEEPING this garbage clean up. It has meant a lot to our whole city to keep it clean of waste products and it certainly helps those of us who are older and cannot some of this for ourselves. It has been a great service for all these years; please keep in going!

Thank you for this support.

Horrible, horrible idea to discontinue a great program! Better idea would be to "ENFORCE" the current programs rules, i.e. no bulk waste on the street until the scheduled pick up window.

Hi Cyndi, my name is Richard Burford, and I live on Sterling Drive in Sandy.

We always take advantage of the spring and fall cleanups, and would be very disappointed if they stopped.

I am not clear what the Mayor's thinking is, but this is a service that I find very valuable - and presumably pay for out of our local taxes ?

Anyway, you should keep these cleanups !

Cheers.

Hi Cyndi,

For sure you can include my email in the packet. I'm glad to hear that the mayor does have a plan B, but I don't like the dumpster program at all. I lived in West Jordan 20+ years ago and they were doing that program at the time. Just wasn't enough space in those things, and it filled up so quickly that if you weren't one of the first few residents to put your debris in it, it was full and then you were driving your stuff around the neighborhood looking for an empty one. May as well just told us to go to the dump?!? You may also include this email as well.

Thanks for the reply, I do really appreciate your time.

Subject: Spring-fall clean being eliminated

Hello,

I was made aware of this service being eliminated and wanted to voice my displeasure with that decision. I've always used it to clean up my yard during those times, as well as our neighbors using it for theirs. I feel it would be doing the city a disservice to do away with this program, as I know fewer residents would clean up their yards if they had to haul it away to the dump, as it's more convenient to just put it on the curb. Not trying to be rude, but people are lazy and this would just give them an excuse not to keep their yards cleaned up. I'm pretty sure that quite a few homes would get overgrown, and then just turn into eyesores.

Since moving to Sandy 13 years ago, I've always had pride in my home and our city as most residents keep their yards trimmed up and for the most part in order. Doing away with this program would not help, and I feel in just a few years it will definitely show what a bad decision this is.

Thanks for your time in listening to my concerns.

Yes please include it. You can also add.

I mentioned the other day to my husband i wished that they would switch to dumpsters on our side of 700 east. (Like white city does the clean up) they dump them when full and bring them back. This proposal would put you in line for a dumpster and you would be out of luck if there was not one available at the right time. Dumpster instead of curb side or doing monthly pickups would solve a lot of complaints. The last thing i want is to get a citation from the city because I couldn't get my large items picked up.

Yes please include it. You can also add.

I mentioned the other day to my husband i wished that they would switch to dumpsters on our side of 700 east. (Like white city does the clean up) they dump them when full and bring them back. This proposal would put you in line for a dumpster and you would be out of luck if there was not one available at the right time. Dumpster instead of curb side or doing monthly pickups would solve a lot of complaints. The last thing i want is to get a citation from the city because I couldn't get my large items picked up.

Subject: Bulk pickup elimination

I am very much opposed to eliminating bulk waste pickup unless you are willing to replace it with what my daughter has out on the west side. They have a monthly pickup. There are lots of large items that need picking up that will not fit in a garbage can however a trip to the dumps is difficult or impossible to arrange. Sandy wants our yards to look nice however without the ability to have the green waste picked up 2 times a year, it will be impossible for me. Please do not give me an additional reason to want to leave sandy city!

Cyndi,

Thank you for reading my email and your quick response.

Of course you have my permission to share my email. I really do understand Mayor Blackburn's concerns and agree that the current program has problems that would be eliminated with bins. But, the bins create a whole new set of problems. And, will greatly reduce the amount of waste and junk removed from Sandy. The removal of waste and junk improves the quality of life for Sandy residents.

Subject: Bulk pick up

Councilwoman Sharkey:

Mayor Blackburn's proposal to replace free semi annual bulk curbside waste pickup with bins is a step backwards for Sandy City. Please resist this change.

Yes, there are problems with the current program as outlined in his proposal. But, the bin system also is loaded with problems. Residents are unlikely to take that extra step to reserve a bin, which means that trees and shrubs are less likely to get trimmed. Household junk will accumulate because the ease of getting it removed has been increased. More green waste will end up in our landfills rather than going to mulch.

There is a reason cities nationwide do bulk waste collection at the curb. The system works. Residents love it. It yields a better looking and cleaner city in the long run.

Please fight to preserve what must be one of the most popular non-essential services that Sandy City provides.

To whom it may concern,

I was very disappointed and frustrated to find out this week that we will no longer have a neighborhood clean up in Sandy. We schedule around this day carefully twice a year. I strongly believe that it's one of the reasons our neighborhoods and yards look nice and stay maintained. It motivates us, and all around us to do the work that needs to be done to have nice, well groomed yards.

The program that replaces our clean up is inadequate and unhelpful. Canceling this program will cause much bigger problems and lead to many more unkept yards! Please bring back our neighborhood clean up!!!

Sincerely,
Emily Loveland

Bulk cleanup provides an absolutely invaluable service to people like me. I am a disabled home owner and do not have the funds or means to transport bulk items away from my home. I look forward to this service twice yearly so I can get rid of old furnishings or other items that have fallen out of repair. The kids that tend my yard always schedule their major cleanups to coincide with bulk waste collection. I see everyone on my street participating in this service. It would be an absolute tragedy to end it.

Please keep it. If it means raising property taxes a little or imposing a separate fee for participation, please do this and keep the service. Please.

Hi Cyndi, this is Dave Hansen the insurance guy. Thanks so much for sending Linda Bullough the information regarding the sandy clean up. It's quite annoying. That has definitely been one of the greatest perks of living in Sandy. My question is "Why does the Mayor want to do this? Is it a question of cost? Can we see what the costs are and what they are projected to change to? Is it more of a question of complaints from Sandy residents who feel its dirty unattractive to have trash out for a week or so?"

The clean up is so amazing and to lose that would be a huge loss to the city.

Thanks again for keeping us informed.

Dave

Subject: Sandy City Bulk Waste Program

Hello Sandy City Council Member Cyndi Sharkey -

Thank you for being willing to receive emails regarding this drastic change in city services.

One of the biggest reasons we helped our neighborhood annex into Sandy City was because of the curbside bulk waste program. Sandy had the greatest bulk waste program in the Salt Lake valley which encouraged the citizens to clean up their yards and beautify the city as a whole.

I know this may fall on deaf ears because the new program is already being implemented. Legally the Mayor can make these type of decisions on his own, but it is bad policy to do it without consulting the city council for a vote or allowing citizens to comment.

As Mayor Bradburn said, he wants to "keep the service level as high as they are or higher" and that this new program will "provide an even higher value to our residence but do it at a lower cost". When I first heard the presentation, I came away thinking that this would be a decent and fair alternative. But as I researched it further, I realized that the numbers disagree with both statements made by the Mayor.

Who can use this new service? It was indicated that each household can rent a dumpster for a 3 day period for free up to two times during the 6 months, but that is physically an impossible task. With only 20 containers used during 26 weeks of service, and 2 pickup/drop-offs possible a week, that gives only 1,040 households a chance to reserve the container. With approximately 30,722 households in Sandy, this means that only 3.4% of the houses in Sandy can utilize this service only ONCE a year. I understand that the dumpsters are large (30-yard) and multiple neighbors can share, but assuming you can maybe get 5 to 7 neighbors to share, you are still only providing the bulk waste service to less than 25% of the citizens. And this is only if the containers are constantly moving without any downtime between drop-offs during the entire 6 months.

This new program has gone from an awesome service that 100% of the population can enjoy to a sub-standard one that less than 25% of the population can utilize. With more than a 75% decrease in service usage and only a 32% decrease in cost, the cost per household served has increased from \$37/house to \$733/dumpster. Just the contractor cost alone for each dumpster is \$497/drop-off, where Wasatch Front Waste & Recycling District offers this service for only \$145 a dumpster.

Other than the quantity of dumpsters available, the biggest issue is the size of the dumpster selected. 30-yard dumpsters are 22' long x 8' wide x 6' tall. They are difficult to safely get items into, especially for the elderly and anything heavy or bulky. After measuring my front yard, I can't legally get a dumpster of that size positioned anywhere. A 22' long dumpster would fit in front of my yard, but it will either encroach into the mandatory USPS mailbox minimum 10' clearance zone or hang over into my neighbor's driveway. I know that the USPS will leave warnings and not deliver mail because of recent experiences with dumpsters/work trucks in that location. Another issue with having only one dumpster is that there is no longer the option to segregate the Green Waste from the Bulk Waste. Everything goes to the dump.

I understand why citizens have complained during the bulk waste pickup, but the real issue is that certain citizens are not following the instructions provided with the program mailer. Putting out garbage the week before pickup and making piles no larger than 4' tall x 4' wide are two of the first instructions listed on the mailer. If people followed these two items, there wouldn't be any complaints regarding "Months of garbage on the street" and "Unsafe piles". Instead of basically removing the service, why not fine the egregious offenders.

Going from one of the best services in the valley to not providing a service for 75% of the community is a large jump. It's too bad Mayor Bradburn didn't follow good policy procedures and discuss this with the city council and allow citizen comments. I bet a better compromise somewhere in the middle ground could've been reached which would better serve the community and still reduce the cost.

Thank you for allowing me to provide my thoughts,

Paul & Jessica Pohlman

Horrible, horrible idea to discontinue a great program! Better idea would be to "ENFORCE" the current programs rules, i.e. no bulk waste on the street until the scheduled pick up window.

Subject: Fall & Spring Cleanup

I would like to voice my opinion on the removal of the fall and spring cleanup for Sandy City. I am so disappointed to hear this service is going to be removed or poorly modified anyway as this is something that truly sets Sandy City apart from other cities in our state.

I love that residents take the time to clean up their yards and homes twice a year in order to participate in this. It worries me what will happen once it's taken away. Also, there are so many that take advantage of it. It's not like it's something that hasn't been being used.

Please work to overturn this decision!

Thank you,
Raquel Hinz

Hi Cyndi,

For sure you can include my email in the packet. I'm glad to hear that the mayor does have a plan B, but I don't like the dumpster program at all. I lived in West Jordan 20+ years ago and they were doing that program at the time. Just wasn't enough space in those things, and it filled up so quickly that if you weren't one of the first few residents to put your debris in it, it was full and then you were driving your stuff around the neighborhood looking for an empty one. May as well just told us to go to the dump?!? You may also include this email as well.

Thanks for the reply, I do really appreciate your time.

Subject: Spring-fall clean being eliminated

Hello,

I was made aware of this service being eliminated and wanted to voice my displeasure with that decision. I've always used it to clean up my yard during those times, as well as our neighbors using it for theirs. I feel it would be doing the city a disservice to do away with this program, as I know fewer residents would clean up their yards if they had to haul it away to the dump, as it's more convenient to just put it on the curb. Not trying to be rude, but people are lazy and this would just give them an excuse not to keep their yards cleaned up. I'm pretty sure that quite a few homes would get overgrown, and then just turn into eyesores.

Since moving to Sandy 13 years ago, I've always had pride in my home and our city as most residents keep their yards trimmed up and for the most part in order. Doing away with this program would not help, and I feel in just a few years it will definitely show what a bad decision this is.

Thanks for your time in listening to my concerns.

Cindy:

I am very disappointed that Mayor Bradbury has decided to discontinue the bulk waste-pickup program. Sandy City has a reputation for being a clean and tidy city and I believe that it is because of this program where residents, who don't have trucks or other means, can get rid of their waste. If we must go to a dumpster program, then AT LEAST schedule regular placement rather than wait for citizens to reserve them. This is yet another example where Sandy City has begun to decline in its prominence and its quality of life, and I am afraid for what might changes might be made in the future. I am very interested in what will be done with the budget money that is saved from discontinuing this program? Are we having something else in its place or will this money be divvied up into areas where we will see no differences?

Thank you,

I mentioned the other day to my husband i wished that they would switch to dumpsters on our side of 700 east. (Like white city does the clean up) they dump them when full and bring them back. This proposal would put you in line for a dumpster and you would be out of luck if there was not one available at the right time. Dumpster instead of curb side or doing monthly pickups would solve a lot of complaints. The last thing i want is to get a citation from the city because I couldn't get my large items picked up.

I am very much opposed to eliminating bulk waste pickup unless you are willing to replace it with what my daughter has out on the west side. They have a monthly pickup. There are lots of large items that need picking up that will not fit in a garbage can however a trip to the dumps is difficult or impossible to arrange. Sandy wants our yards to look nice however without the ability to have the green waste picked up 2 times a year, it will be impossible for me. Please do not give me an additional reason to want to leave sandy city!

Dear Ms. Sharkey,

As a life long Sandy resident I want to express how much I love this city. It has concerned me lately how much local, state and national government is taking away from its citizens. I pay taxes, I donate my time to public schools, I sacrifice my time to clean up Sandy on beautification day. I was a volunteer for the cub scout program and did garbage pick up twice a year with the wolf pack. I help many families in my neighborhood clean up their yards. I need to communicate to you how much people rely on these clean up days to help not only in beautification, but in our own family financial stability. Please don't take away our bulk clean up days. If you need to cut, a possible solution would be to take away one, not both. I look forward to these days each year to help me and my neighborhood. I need to express this to you. Please hear the people.

Horrible, horrible idea to discontinue a great program! Better idea would be to "ENFORCE" the current programs rules, i.e. no bulk waste on the street until the scheduled pick up window.

Thanks and regards,

Hi Cyndi, my name is Richard Burford, and I live on Sterling Drive in Sandy.

We always take advantage of the spring and fall cleanups, and would be very disappointed if they stopped.

I am not clear what the Mayor's thinking is, but this is a service that I find very valuable - and presumably pay for out of our local taxes ?

Anyway, you should keep these cleanups !

Cheers.

Hi Cyndi,

For sure you can include my email in the packet. I'm glad to hear that the mayor does have a plan B, but I don't like the dumpster program at all. I lived in West Jordan 20+ years ago and they were doing that program at the time. Just wasn't enough space in those things, and it filled up so quickly that if you weren't one of the first few residents to put your debris in it, it was full and then you were driving your stuff around the neighborhood looking for an empty one. May as well just told us to go to the dump?!? You may also include this email as well.

Thanks for the reply, I do really appreciate your time.

Subject: Spring-fall clean being eliminated

Hello,

I was made aware of this service being eliminated and wanted to voice my displeasure with that decision. I've always used it to clean up my yard during those times, as well as our neighbors using it for theirs. I feel it would be doing the city a disservice to do away with this program, as I know fewer residents would clean up their yards if they had to haul it away to the dump, as it's more convenient to just put it on the curb. Not trying to be rude, but people are lazy and this would just give them an excuse not to keep their yards cleaned up. I'm pretty sure that quite a few homes would get overgrown, and then just turn into eyesores.

Since moving to Sandy 13 years ago, I've always had pride in my home and our city as most residents keep their yards trimmed up and for the most part in order. Doing away with this program would not help, and I feel in just a few years it will definitely show what a bad decision this is.

Thanks for your time in listening to my concerns.

Cindy:

I am very disappointed that Mayor Bradbury has decided to discontinue the bulk waste-pickup program. Sandy City has a reputation for being a clean and tidy city and I believe that it is because of this program where residents, who don't have trucks or other means, can get rid of their waste. If we must go to a dumpster program, then AT LEAST schedule regular placement rather than wait for citizens to reserve them. This is yet another example where Sandy City has begun to decline in its prominence and its quality of life, and I am afraid for what might changes might be made in the future. I am very interested in what will be done with the budget money that is saved from discontinuing this program? Are we having something else in its place or will this money be divvied up into areas where we will see no differences?

Thank you,

Cyndi,

Thank you for reading my email and your quick response.

Of course you have my permission to share my email. I really do understand Mayor Blackburn's concerns and agree that the current program has problems that would be eliminated with bins. But, the bins create a whole new set of problems. And, will greatly reduce the amount of waste and junk removed from Sandy. The removal of waste and junk improves the quality of life for Sandy residents.

Subject: Bulk pick up

Councilwoman Sharkey:

Mayor Blackburn's proposal to replace free semi annual bulk curbside waste pickup with bins is a step backwards for Sandy City. Please resist this change.

Yes, there are problems with the current program as outlined in his proposal. But, the bin system also is loaded with problems. Residents are unlikely to take that extra step to reserve a bin, which means that trees and shrubs are less likely to get trimmed. Household junk will accumulate because the ease of getting it removed has been increased. More green waste will end up in our landfills rather than going to mulch.

There is a reason cities nationwide do bulk waste collection at the curb. The system works. Residents love it. It yields a better looking and cleaner city in the long run.

Please fight to preserve what must be one of the most popular non-essential services that Sandy City provides.

To whom it may concern,

I was very disappointed and frustrated to find out this week that we will no longer have a neighborhood clean up in Sandy. We schedule around this day carefully twice a year. I strongly believe that it's one of the reasons our neighborhoods and yards look nice and stay maintained. It motivates us, and all around us to do the work that needs to be done to have nice, well groomed yards.

The program that replaces our clean up is inadequate and unhelpful. Canceling this program will cause much bigger problems and lead to many more unkept yards! Please bring back our neighborhood clean up!!!

Sincerely,
Emily Loveland

Subject: Eliminating bulk cleanup

Bulk cleanup provides an absolutely invaluable service to people like me. I am a disabled home owner and do not have the funds or means to transport bulk items away from my home. I look forward to this service twice yearly so I can get rid of old furnishings or other items that have fallen out of repair. The kids that tend my yard always schedule their major cleanups to coincide with bulk waste collection. I see everyone on my street participating in this service. It would be an absolute tragedy to end it.

Please keep it. If it means raising property taxes a little or imposing a separate fee for participation, please do this and keep the service. Please.

Hi Cyndi, this is Dave Hansen the insurance guy. Thanks so much for sending Linda Bullough the information regarding the sandy clean up. It's quite annoying. That has definitely been one of the greatest perks of living in Sandy. My question is "Why does the Mayor want to do this? Is it a question of cost? Can we see what the costs are and what they are projected to change to? Is it more of a question of complaints from Sandy residents who feel its dirty unattractive to have trash out for a week or so?"

The clean up is so amazing and to lose that would be a huge loss to the city.

Thanks again for keeping us informed.

Dave

Subject: Sandy City Bulk Waste Program

Hello Sandy City Council Member Cyndi Sharkey -

Thank you for being willing to receive emails regarding this drastic change in city services.

One of the biggest reasons we helped our neighborhood annex into Sandy City was because of the curbside bulk waste program. Sandy had the greatest bulk waste program in the Salt Lake valley which encouraged the citizens to clean up their yards and beautify the city as a whole.

I know this may fall on deaf ears because the new program is already being implemented. Legally the Mayor can make these type of decisions on his own, but it is bad policy to do it without consulting the city council for a vote or allowing citizens to comment.

As Mayor Bradburn said, he wants to "keep the service level as high as they are or higher" and that this new program will "provide an even higher value to our residence but do it at a lower cost". When I first heard the presentation, I came away thinking that this would be a decent and fair alternative. But as I researched it further, I realized that the numbers disagree with both statements made by the Mayor.

Who can use this new service? It was indicated that each household can rent a dumpster for a 3 day period for free up to two times during the 6 months, but that is physically an impossible task. With only 20 containers used during 26 weeks of service, and 2 pickup/drop-offs possible a week, that gives only 1,040 households a chance to reserve the container. With approximately 30,722 households in Sandy, this means that only 3.4% of the houses in Sandy can utilize this service only ONCE a year. I understand that the dumpsters are large (30-yard) and multiple neighbors can share, but assuming you can maybe get 5 to 7 neighbors to share, you are still only providing the bulk waste service to less than 25% of the citizens. And this is only if the containers are constantly moving without any downtime between drop-offs during the entire 6 months.

This new program has gone from an awesome service that 100% of the population can enjoy to a sub-standard one that less than 25% of the population can utilize. With more than a 75% decrease in service usage and only a 32% decrease in cost, the cost per household served has increased from \$37/house to \$733/dumpster. Just the contractor cost alone for each dumpster is \$497/drop-off, where Wasatch Front Waste & Recycling District offers this service for only \$145 a dumpster.

Other than the quantity of dumpsters available, the biggest issue is the size of the dumpster selected. 30-yard dumpsters are 22' long x 8' wide x 6' tall. They are difficult to safely get items into, especially for the elderly and anything heavy or bulky. After measuring my front yard, I can't legally get a dumpster of that size positioned anywhere. A 22' long dumpster would fit in front of my yard, but it will either encroach into the mandatory USPS mailbox minimum 10' clearance zone or hang over into my neighbor's driveway. I know that the USPS will leave warnings and not deliver mail because of recent experiences with dumpsters/work trucks in that location. Another issue with having only one dumpster is that there is no longer the option to segregate the Green Waste from the Bulk Waste. Everything goes to the dump.

I understand why citizens have complained during the bulk waste pickup, but the real issue is that certain citizens are not following the instructions provided with the program mailer. Putting out garbage the week before pickup and making piles no larger than 4' tall x 4' wide are two of the first instructions listed on the mailer. If people followed these two items, there wouldn't be any complaints regarding "Months of garbage on the street" and "Unsafe piles". Instead of basically removing the service, why not fine the egregious offenders.

Going from one of the best services in the valley to not providing a service for 75% of the community is a large jump. It's too bad Mayor Bradburn didn't follow good policy procedures and discuss this with the city council and allow citizen comments. I bet a better compromise somewhere in the middle ground could've been reached which would better serve the community and still reduce the cost.

Thank you for allowing me to provide my thoughts,

Paul & Jessica Pohlman

Subject: Bulk waste pick up

Mayor Bradburn canceled the bulk waste pick up without consulting the City Council or the citizenry? We rely on the bulk waste pick up to clean our yard of tree trimmings and other large things. We don't have access to a truck or other means of disposing of items too large for the trash cans. Under the proposed dumpster system, neighbors would be competing with neighbors for dumpster space and that would foster animosity rather than cooperation. There are just too few dumpsters. Those that are better at working the system would get dumpsters and everyone else's bulk trash would pile up in their yards.

Please reinstate the bulk waste semi-annual pick up!

Subject: Bulk Garbage in Sandy

Hello,

I am not able to attend the meeting on Feb 4th to voice my opinion. While I agree that a dumpster would help alleviate the streets littered with garbage before the day it is supposed to be put out and will allow for dumpster use at more convenient times;

1. If dumpsters are only placed randomly on the streets that will make it difficult if not impossible for those of us that are older to haul something much further than the end of our own driveway
2. If we have something like a piece of furniture or a chair or table, again those of us that are older will not be able to haul it to the dumpster or even be able to pick it up and hoist it up into the dumpster
3. It appears that the decision has already been made so we are being told to accept it and be inconvenienced by the city that is supposed to listen to it's citizens
4. And ... for the responses posted that were in favor of the dumpsters, I'm sure there were equal opposing voices

I would like to keep the existing fall and spring garbage clean up.

Sincerely,
Allison Seabury

Please vote to keep the twice yearly Sandy bulk waste pickup which has been the tradition in Sandy as long as I can remember. I have lived in Sandy for 35 years. This program helps keep our city cleaned up and beautiful. I'm sorry our Mayor has not lived here long and does not understand our values and traditions. Don't let him turn Sandy into a failed city like the one he came from. Please reject the proposal to end the bulk waste pickup.

Thank you for your consideration.

Subject: Curbside Waste Program

Hello Cyndi,

It is my understanding that the Sandy City Mayor decided to stop the spring and fall bulk curbside cleanup and that he replaced this with an option to get a large dumpster free twice a year. It is also my understanding that if we wanted to try to get the bulk curbside cleanup option back, we need to contact our council representatives. Hopefully I'm understanding these things correctly.

It would be my preference to have the bulk curbside cleanup back. Yes, the neighborhoods temporarily have trash on the side of the roads, which hasn't ever seemed to be a traffic or safety issue on my street. Also, I will never have enough trash to warrant arranging for a large dumpster to be in front of my house that I would barely fill up.

The dumpster idea would work however, if they just did scheduled placements for entire neighborhoods and then let those neighborhoods know when and where the dumpsters were going to be without having to have people arrange for them and try to spread the word themselves. I have heard that Wasatch Front Waste does possibly does this. I don't think that's the new dumpster program works well for most individual households where the bulk cleanup did.

If I'm understanding the new dumpster program incorrectly, please let me know. I saw a post that these emails were supposed to be directed to you, however I also sent this letter to Alison, the representative of my district.

Thank you for your consideration,

Ryan Madsen

Horrible, horrible idea to discontinue a great program! Better idea would be to "ENFORCE" the current programs rules, i.e. no bulk waste on the street until the scheduled pick up window.

Thanks and regards,

Hi Cyndi, my name is Richard Burford, and I live on Sterling Drive in Sandy.

We always take advantage of the spring and fall cleanups, and would be very disappointed if they stopped.

I am not clear what the Mayor's thinking is, but this is a service that I find very valuable - and presumably pay for out of our local taxes ?

Anyway, you should keep these cleanups !

Cheers.
Richard

Hi Cyndi,

For sure you can include my email in the packet. I'm glad to hear that the mayor does have a plan B, but I don't like the dumpster program at all. I lived in West Jordan 20+ years ago and they were doing that program at the time. Just wasn't enough space in those things, and it filled up so quickly that if you weren't one of the first few residents to put your debris in it, it was full and then you were driving your stuff around the neighborhood looking for an empty one. May as well just told us to go to the dump?!? You may also include this email as well.

Thanks for the reply, I do really appreciate your time.

Subject: Spring-fall clean being eliminated

Hello,

I was made aware of this service being eliminated and wanted to voice my displeasure with that decision. I've always used it to clean up my yard during those times, as well as our neighbors using it for theirs. I feel it would be doing the city a disservice to do away with this program, as I know fewer residents would clean up their yards if they had to haul it away to the dump, as it's more convenient to just put it on the curb. Not trying to be rude, but people are lazy and this would just give them an excuse not to keep their yards cleaned up. I'm pretty sure that quite a few homes would get overgrown, and then just turn into eyesores.

Since moving to Sandy 13 years ago, I've always had pride in my home and our city as most residents keep their yards trimmed up and for the most part in order. Doing away with this program would not help, and I feel in just a few years it will definitely show what a bad decision this is.

Thanks for your time in listening to my concerns.

Cindy:

I am very disappointed that Mayor Bradbury has decided to discontinue the bulk waste-pickup program. Sandy City has a reputation for being a clean and tidy city and I believe that it is because of this program where residents, who don't have trucks or other means, can get rid of their waste. If we must go to a dumpster program, then AT LEAST schedule regular placement rather than wait for citizens to reserve them. This is yet another example where Sandy City has begun to decline in its prominence and its quality of life, and I am afraid for what might changes might be made in the future. I am very interested in what will be done with the budget money that is saved from discontinuing this program? Are we having something else in its place or will this money be divvied up into areas where we will see no differences?

Thank you,

Yes please include it. You can also add.

I mentioned the other day to my husband i wished that they would switch to dumpsters on our side of 700 east. (Like white city does the clean up) they dump them when full and bring them back. This proposal would put you in line for a dumpster and you would be out of luck if there was not one available at the right time. Dumpster instead of curb side or doing monthly pickups would solve a lot of complaints. The last thing i want is to get a citation from the city because I couldn't get my large items picked up.

I am very much opposed to eliminating bulk waste pickup unless you are willing to replace it with what my daughter has out on the west side. They have a monthly pickup. There are lots of large items that need picking up that will not fit in a garbage can however a trip to the dumps is difficult or impossible to arrange. Sandy wants our yards to look nice however without the ability to have the green waste picked up 2 times a year, it will be impossible for me. Please do not give me an additional reason to want to leave sandy city!

Cyndi,

Thank you for reading my email and your quick response.

Of course you have my permission to share my email. I really do understand Mayor Blackburn's concerns and agree that the current program has problems that would be eliminated with bins. But, the bins create a whole new set of problems. And, will greatly reduce the amount of waste and junk removed from Sandy. The removal of waste and junk improves the quality of life for Sandy residents.

Subject: Bulk pick up

Councilwoman Sharkey:

Mayor Blackburn's proposal to replace free semi annual bulk curbside waste pickup with bins is a step backwards for Sandy City. Please resist this change.

Yes, there are problems with the current program as outlined in his proposal. But, the bin system also is loaded with problems. Residents are unlikely to take that extra step to reserve a bin, which means that trees and shrubs are less likely to get trimmed. Household junk will accumulate because the ease of getting it removed has been increased. More green waste will end up in our landfills rather than going to mulch.

There is a reason cities nationwide do bulk waste collection at the curb. The system works. Residents love it. It yields a better looking and cleaner city in the long run.

Please fight to preserve what must be one of the most popular non-essential services that Sandy City provides.

Ms. Sharkey:

As long time Sandy residents we most whole-heartedly support KEEPING this garbage clean up. It has meant a lot to our whole city to keep it clean of waste products and it certainly helps those of us who are older and cannot some of this for ourselves. It has been a great service for all these years; please keep in going!

Thank you for this support.

To whom it may concern,

I was very disappointed and frustrated to find out this week that we will no longer have a neighborhood clean up in Sandy. We schedule around this day carefully twice a year. I strongly believe that it's one of the reasons our neighborhoods and yards look nice and stay maintained. It motivates us, and all around us to do the work that needs to be done to have nice, well groomed yards.

The program that replaces our clean up is inadequate and unhelpful. Canceling this program will cause much bigger problems and lead to many more unkept yards! Please bring back our neighborhood clean up!!!

Sincerely,
Emily Loveland

Subject: Eliminating bulk cleanup

Bulk cleanup provides an absolutely invaluable service to people like me. I am a disabled home owner and do not have the funds or means to transport bulk items away from my home. I look forward to this service twice yearly so I can get rid of old furnishings or other items that have fallen out of repair. The kids that tend my yard always schedule their major cleanups to coincide with bulk waste collection. I see everyone on my street participating in this service. It would be an absolute tragedy to end it.

Please keep it. If it means raising property taxes a little or imposing a separate fee for participation, please do this and keep the service. Please.

Dear Ms. Sharkey,

It has recently come to my attention that Sandy wants to stop their curbside cleanup program. I think this is a mistake and would like to encourage a reversal of this decision. I'm not originally from Sandy, but since moving here about 11 years ago it truly is one of the highlights! My family in Davis County often brings up how they wish they had it. I think it is a wonderful way for residents to maintain cleanliness and improved curb appeal as well as reducing clutter inside homes. Please let me know if there is anything I can do or anyone I can speak to in an effort to keep the curb side tradition!

I have a question regarding the new sandy pickup with dumpsters. I've had a problem with people dumping stuff in my piles before. Someone put tires in my neighbors pile and my neighbor had to pay for them to be removed even though they weren't hers. My fear is that if we get a dumpster, everyone will dump stuff into it and i will be held accountable for what they put in there. What do you suggest?

Hi Cyndi,

For sure you can include my email in the packet. I'm glad to hear that the mayor does have a plan B, but I don't like the dumpster program at all. I lived in West Jordan 20+ years ago and they were doing that program at the time. Just wasn't enough space in those things, and it filled up so quickly that if you weren't one of the first few residents to put your debris in it, it was full and then you were driving your stuff around the neighborhood looking for an empty one. May as well just told us to go to the dump?!? You may also include this email as well.

Thanks for the reply, I do really appreciate your time.

Subject: Spring-fall clean being eliminated

Hello,

I was made aware of this service being eliminated and wanted to voice my displeasure with that decision. I've always used it to clean up my yard during those times, as well as our neighbors using it for theirs. I feel it would be doing the city a disservice to do away with this program, as I know fewer residents would clean up their yards if they had to haul it away to the dump, as it's more convenient to just put it on the curb. Not trying to be rude, but people are lazy and this would just give them an excuse not to keep their yards cleaned up. I'm pretty sure that quite a few homes would get overgrown, and then just turn into eyesores.

Since moving to Sandy 13 years ago, I've always had pride in my home and our city as most residents keep their yards trimmed up and for the most part in order. Doing away with this program would not help, and I feel in just a few years it will definitely show what a bad decision this is.

Thanks for your time in listening to my concerns.

Subject: Bulk waste program

Cindy:

I am very disappointed that Mayor Bradbury has decided to discontinue the bulk waste-pickup program. Sandy City has a reputation for being a clean and tidy city and I believe that it is because of this program where residents, who don't have trucks or other means, can get rid of their waste. If we must go to a dumpster program, then AT LEAST schedule regular placement rather than wait for citizens to reserve them. This is yet another example where Sandy City has begun to decline in its prominence and its quality of life, and I am afraid for what might changes might be made in the future. I am very interested in what will be done with the budget money that is saved from discontinuing this program? Are we having something else in its place or will this money be divvied up into areas where we will see no differences?

Thank you,

Sent from [Mail](#) for Windows 10

I have a concern about the dumpsters replacing the curbside pickup. I moved from Aspen Drive by Brookwood Elementary to Durban Road a year ago. While living on Aspen we had dumpsters twice a year. There are problems with the dumpsters. Often the dumpster was filled before I could get home from work! You also had people drive from other areas in pickups and unload their trash in the dumpsters. If you want to dispose of something large and heavy, you have to find people to help you lift it in.

Being an older resident of Sandy, (59) curbside is much more convenient and accessible to ALL residents. You have plenty of time to get yard and house trash gathered. You can get rid of heavy items without worrying about lifting them into tall dumpsters. Having trash on the streets for a few weeks is worth the eyesore, if it means EVERYONE can get rid of their waste, not just the "early birds" who get to the dumpsters first, or people who can lift heavy items.

I appreciate you taking time to listen to my concerns.

Absolutely. Include my email. This mayor wasn't elected to take apart the good things we have. It was to find creative ways to make things better. This is NOT one of them. The mayor needs to realize that this is something where input from the public needs to be solicited. Being unilateral is not a good consensus builder when we are trying to be a model community.

The bulk waste program (not ordering a dumpster) is something that has helped Sandy stay clean, well-kept and generates a true sense of community. The feeling of community is one of the things that keeps many us in Sandy. Our neighborhood has set aside a Saturday each year, just before the pick-up, for a big neighborhood cleanup where we help the aged, infirm, overwhelmed and other that just need a helping hand to clean up yards, brush and anything that is needed. We have done this for over 20 years. Then after 2-3 hours of 50-100 people working together, we gather in a cul-de-sac for a big neighborhood breakfast.

Cyndi, please, don't let this happen.

Subject: Bulk Clean up

Dear Mayor,

You are going to do what?

Bulk Cleanup is what distinguishes an A Class City from a D...

I KNOW Sandy is a top notch city and as the Mayor of Sandy you would not have anything less.

Please keep our city clean.

I would be willing to pay for this service as well I believe a majority of our citizen would also.

Please keep Sandy Beautiful.

Thanks Paul Schmiett

Subject: Bulk cleanup

Dear Ms. Sharkey,

I am a sandy resident (84094) and have heard about some changes to the bulk cleanup program. I would like to voice my concerns about the new program. I would prefer to keep the program as is rather than worrying about coordinating and ordering dumpsters for the neighborhood. As a single, full time mother, i have loved the convenience of the bulk cleanup program and not having large dumpsters in the neighborhood. I have also liked not having to hoist large items myself into a dumpster. Additionally, being responsible for the dumpster, if I order it for the neighborhood, makes it hard to know what everyone is disposing of and if they are being responsible. I would love to keep the program as is. Thank you!

Sharifa A.

Subject: Bulk Cleanup

I'm worrying on regards to the changes to the bulk cleanup service. I am not in favor of using dumpster and went the curbside program reinstated. The old service allowed for more flexibility and community as we work together in our neighborhood to keep them beautiful. Removing this will cause community service projects where we help each other to be nice more difficult. Again, I am not in favor of the dumpster service.

Subject: Bulk dumps

Cyndi,

The proposed changes in Sandy's bulk pickup program will result in too many people keeping (what should be discarded) on their property resulting in junkyard backyards. And, unfortunately, a small number of people will discard what should properly go to the dump in empty lots & roadsides resulting in roadside bulk dumps.

These proposed changes are a step backwards in keeping our city NOT looking like a junkyard. The easier a program is to follow (i.e., our current program) the more likely it is to be used.

Thank you.

Subject: Bulk garbage pick up vs. Dumpster rental program

Hello Cindy,

I just wanted to voice my opinion on the Bulk Garbage pickup issue. I LOVE the program where twice a year the city picks bulk garbage up on designated day. I understand in the cities where they use the dumpster "rental" program, It is extremely hard to get the dumpster ordered and there are six + month waiting list to get a dumpster. I believe one of the reasons Sandy neighborhoods are so nice and clean is because of the bulk pickup program, where residents are guaranteed large trash pickup twice a year. I believe that if we have to wait many months to even a year for a dumpster we will see our neighbor hoods becoming more trashy, as we wait for a dumpster. More large trash will clutter front and sides of homes. Twenty dumpsters for 25,000 residence seems like that's not enough and will ensure long wait times for a dumpster.

I have friends and family that live in other cities across the Wasatch front and they have told us how lucky we are that Sandy City does the bulk pick up twice a year and they wished their cities offer such a wonderful program.

Here's another idea! I believe the issue with the dumpster rental program is residents are worried about dumpsters being difficult to order and there being a waiting list for months. What if, Sandy City still scheduled dumpster(s) to be in the neighborhoods twice a year. Drop them off 3 days before pickup, similar to the bulk pick up program now? That way residents will know they are still getting a bulk waste service twice a year. And instead of dumping in the curbs, residents deposit large trash in the dumpster(s)!

I sincerely hope Mayor Bradburn and the city council will CONTINUE some form of the bi-annual bulk pickup service, and please, I'm begging, not a rental program with long waits.

Rochelle "Shelly" Latham

Please! Include my email to the Mayor! This is ridiculous. There are SO many people that simply could not do this. I am one if them. I am 4'9 could not reach to put large items. You have so many elderly people in historic Sandy with the same issue and I have no where to park a dumpster. Pioneer Ave is not wide enough. To put them without blocking line of sight getting out of driveways. It's hard enough now. Homes aren't close enough to be able to "share" one especially if they are large items like chairs or couches. I pay for garbage pick up, that is what they should be doing

My name is Shelley Wixom. I have been a sandy utah resident for over 3 years. It has come to my attention that Sandy intends to change Our neighborhood twice yearly "bulk pick up" program to the dumpster program. I do not support this. I have family living in utah cities that offer this program and it has been a fail. The city is too backed up to deliver dumpsters, they make "appointments" and never get their cans.

I voted for you Cyndi Sharkey, if this happens in my neighborhood 1300 east and 9200 so. I will no longer support you. You will loose my Vote.

Sincerely,
Shelley wixom
Quarry bend resident.

It's hard to believe that a program like this is being cancelled. My wife and I have lived in Sandy for 50 years and bulk pickup is and always has been a wonderful benefit provided by Sandy City. I have family in Riverton and in Herriman and they are always jealous of Sandy's bulk pickup program. Dumpsters are not the answer! If a dumpster is placed on any street, it because a frantic race to try and get your waste in it before it is filled to capacity by neighbors. Maybe we just need to enforce the rules and guidelines that we was residents receive each year. Spring and fall bulk pickup is a real tangible benefit of living in Sandy. Let's keep it that way!

To whom it may concern,

My name is Zea Robbins. I am a Sandy resident near Falcon Park in Waters Lane. I am writing to tell you that removing the bulk waste pick up in our area will cause the neighborhood to decline. We moved from Hawaii two years ago and one of the best improvements from our state is the bulk waste pick up program. In Hawaii there is nothing for residents that resembles bulk waste pick up and it shows! Peoples yards become waste landing spots. It is my belief that the removal of this program will lead to a demise of our clean neighborhoods. Please reconsider. Maybe reduce to once a year, but please do not eliminate this program. Many of us can not afford to hire people to haul stuff away or to purchase our own trailer and hitch.

Sincerely,

Zea Robbins

Thank you for suggesting emails. I'm not sure if you are my rep, I live on Rondelle Circle off of Beaumont Drive about 8095 S. Please forward this email to proper rep if it is not you.

I've lived in this house since 1973 and with new incoming residents who don't seem to care much about how their yards look, at least the Bulk Pickup has done wonders every 6 months for them to get rid of their junk showing in their yards. I also have loved the cleanup. Seems like the last 5 or 6 years, though, the pickup crew doesn't do the great job they used to. The crew used to have one guy with a push broom to gather leftover piles and then they picked that up too. I have done that cleanup myself for the 4 neighbors who live on my circle... with my garbage can and push broom after they leave.

It's my position that if you compare Pickup with Sweeper, there is NO contest. Get rid of the sweeper trucks to get gutters cleaner; in my area there are now many cars, after none 46 years ago, parking on the street so that the sweeper has to go in and out and it's basically not worth the money for sweepers.

They raised property taxes and I understood why and agreed. But did not expect the next thing the Mayor would do is cancel this excellent cleanup program. Dumpsters plainly suck, pardon the french. Adjoining Telford used SLCounty dumpsters and they are horrible.

Subject: Re: Bulk Pickup

Yes, please do.

I saw the citizen comments about how some people are opposed to be bulk trash pickup because the curbside piles create an eyesore. Well, in my neighborhood the curbside piles appear anywhere from a week to a few days before pickup. I don't mind that people start putting things out on the curb. At least it means that they're not putting big piles of junk in their yards that just stay there. The city has been really good to pickup on the days that they designate, and the piles disappear.

We do have some people who drive around looking for the curbside piles, and they pick through the debris to remove recyclable metals, etc. I thought that it was against city law, but they do it anyway. Last bulk pickup we had at least two of those pickup with trailer pickers. The objections to the 'piles' seem to be in the minority. The dumpster idea...I don't like because there is a potential for having a dumpster in my culdesac for some unspecified time.

When the neighbors put their debris piles at the curbside, at least I can drive through the street and get into my driveway. And I know exactly when to put out stuff and when the city will remove it. It looks like the dumpster could sit for 60 hours or more...and that just depends upon if Waste Management is on top of the placement and removal. I'm not prepared to have a dumpster in my neighborhood for more than the time they allot. And then it becomes a problem for me to keep contacting someone to come get the stuff.

Call me a pessimist, but at some point, I foresee a charge for this service coming from Waste Management...once they figure out the demand and the sporadic placement and retrieval possibilities. If the city wants to do this, it seems to me that the most efficient way to implement this is to get dumpsters scheduled for neighborhoods so that they are placed and removed in an organized manner. The point is keeping the city cleaned up and houses attractive to residents and potential buyers. If the dumpster idea starts becoming a 'hassle', the city is likely to find their demand for additional trashcans increased, and the debris from yard cleanup and other disposals included in curbside trash...or alternatively, piled in yards as an eyesore.

And if you ask me, the list of prohibited items won't stop someone from putting them in a dumpster in a neighborhood. So what happens then... if I reserve a dumpster and someone in

my neighborhood loads it with the stuff that's not supposed to be there... because they can...do I get penalized because I made the request? Or because I made the request, would I be responsible for removing the prohibited items from the dumpster? I don't want that responsibility.

Thanks,
Kerry

From: Kerry Bowers <Roy_and_Kerry@msn.com>**Sent:** Sunday, February 2, 2020 10:42 AM**To:** Cyndi Sharkey <csharkey@sandy.utah.gov>**Subject:** Bulk Pickup

I saw a notice that the mayor is proposing to do away with bulk pickup in Sandy. I am opposed to that plan. I also saw that there was some kind of 'proposal' to replace it with dumpsters. Let me just say that I don't believe the dumpster idea isn't a very good one. The idea that the city would have some dumpsters sitting on the streets for who knows how long creates a nuisance for residents, as well as the opportunity for rain water, dirt or other debris to collect in an open dumpster left out. While the city has been good about setting rules for bulk pickup, I see some of my neighbors including stuff that was not supposed to be removed. The city still picked up the stuff when someone wasn't following the instructions. Shocking, I know... The dumpster idea just makes it even more possible for the contents to include garbage, hazardous waste, tires, etc. While Waste Management might be in the business of refuse and bulk refuse removal, how is the city going to monitor the placement and removal of all the dumpsters that might be required to cover the city? Who would residents call to find out when or where the dumpsters are? What kind of a time period are we talking about? Does Waste Management or other suppliers have enough dumpsters to cover all the neighborhoods or would this process be staggered? And if the dumpster placements and removals are staggered, how long is the city going to have dumpsters in neighborhoods? Who gets to monitor the service? I live on a culdesac, so putting a dumpster somewhere nearby could create a possible traffic problem, as well as an eyesore.

While I appreciate that the mayor is trying to cut costs, it occurs to me that there is a possibility that turning this collection service over to a 'for profit' business might actually cost more than using city equipment and personnel. I'd like someone on the council to review the cost comparison and the administration issues.

Yes, you can include our message in your packet for the council.

And although dumpsters may be a viable option, bulk pick-up appears to be much more convenient program.

If the City is having problems with bulk pick-up, such as scavengers or inappropriate materials being placed curbside, then Sandy should enforce any applicable city ordinances instead of implementing a different and not-as-convenient replacement program.

Hello,

We moved to Sandy in May 2019. The fall pickup was amazing.

In addition to 10 bags of leaves, we were able to trim a large tree and set the branches at the curb.

We had planned to rip out a back patio in coordinating with the Spring pick up.

We do not own a pickup truck and would have no other way to clean up after home and property improvements without this pickup service.

The bulk pickup encourages residents to make improvements to their property both inside and out twice a year.

Subject: Bulk Waste Change

While I understand why the dumpsters might alleviate the messiness of some neighborhoods during the bulk pick-up timeframe, I'm not sure I'm willing to be the one to request the dumpster and therefore be responsible if someone drives by and puts something in the dumpster that is not allowed. Who wants to open themselves up to that??

Salt Lake County puts dumpsters every few houses each spring and fall. At least that way no one person is liable for hazardous material that someone decides to put in the dumpster. And the people that everyone is complaining about leaving their items out for too long or not during the right times will be those that put things in that are not acceptable.

Even those programs have problems. If you aren't home right when they arrive, your neighbor can fill the whole thing up and you are out of luck.

Unfortunately I'm not sure I have a better idea, but I don't think the proposed plan is the best it can be. Again, my main concern is that I don't want to be held responsible for what others may put in the dumpster if I request one.

Thanks for your time.

Dear Ms. Sharkey,

It has recently come to my attention that Sandy City wants to stop their curbside cleanup program. I think this is a mistake and would like to encourage a reversal of this decision. I'm not originally from Sandy, but since moving here in 2011, bulk pick up has been one of the best benefits of living in Sandy. My family across the country often brings up how they wish they had it. I think it is a wonderful way for residents to maintain cleanliness and improved curb appeal as well as reducing clutter inside homes. Please let me know if there is anything I can do or anyone I can speak to in an effort to keep the curb side pick up in Sandy!

Thank you,
Christina Larochelle

Subject: Bulk Waste Clean Up

Dear Councilman Sharkey,

I am writing as a 30 year resident and taxpayer of Sandy, Utah and want to make my voice heard regarding the twice yearly Sandy City bulk cleanup. I have heard rumors that Mayor Blackburn would like to do away with this program and I object loudly to that idea. Having the curbside cleanup allows residents to clean up yard debris and other home waste that otherwise would cost hundreds of dollars to make multiple trips to a landfill or pay a company to come clean it up. I have family members in other communities that envy how it is done in our city. When my brother has dumpsters set up throughout his city he says it's impossible to get things put in before they are already filled up. This service is one of the great ideas that Sandy has done to allow residents to maintain beautiful properties and homes. Please make my objections heard at any upcoming council meetings. I am always open to discuss this with anyone who wants to listen to my thoughts on this matter.

Sincerely,

Laura Schieving

Cindy, I would like Sandy City to reverse the recent decision to go to a dumpster program. We live in a circle and there is no way this will work as access is limited as it is.

Additionally, trying to schedule pickups and deliveries is a nightmare as we have had issues with a similar program in the Holladay area.

Please let the Mayor know his track record on making good decisions regarding the citizenry and public infrastructure and utility has been marginal at best and this resident would like to keep the current Sandy City pickup in place.

Sincerely,

Scott Cowan

Yes !!!

I'm telling all the neighborhood. The people of Sandy will be so mad when they find out!! He should change his mind if he wants RE-elected as mayor. Very bad idea!!
Nobody even knows about this. The only way I found out was through a post on Next Door Alta canyon.

Yes you can include my email

My only concern is that our entire neighborhood works together to trim trees etc. We help older neighbors and it's really nice to have a week to coordinate helping elderly neighbors keep their yard in good shape. If we go to the dumpster program it will take the community feel away from our neighborhood

Hi Cyndi,

As a Sandy resident I really think the old bulk pickup program is much better then this new one. I participate in all the surveys that are sent out by the Sandy app and this was never sent around for feedback and this is very confusing to me since the city regularly requests our feedback on major changes like this. I am very disappointed that we weren't consulted. Please deliver our concerns to the mayor on this topic and hopefully it is not to late to change things.

Thank you,

Hello Ms. Sharkey,

I would like to express my concern about switching the bulk waste program. The program now works really great for our situation. Maybe instead of 2 times a year they could just do one time. But the ordering of dumpsters seems like way too much for the amount of debris we have every year. We would probably not even fill it a quarter of the way full.

Thanks,
Gina noftle

Yes! You may include it. Although I do think the new program is good, I fear that it will not have the same encouraging affect for people to beautify their yards twice a year, because it will not be a scheduled event. I think more people are likely to forget about the new program, and less likely do utilize it.

To whom it may concern, I have just heard about Mayor Bradburn trying to eliminate bulk waste pick up in spring and fall! This makes me so disappointed as we moved from one home in sandy and chose to specifically stay in sandy because we love the bulk waste program! It's such an amazing initiative That encourages neighbors to keep their yards and homes tidy, which increases our desire to live in beautiful sandy neighborhoods! I have seen so many times the contagious affect of one neighbor starting a pile while beautifying their home, which then starts a chain reaction of neighbors wanting to do the same! This is such a wonderful program that we truly feel privileged to have in sandy, and would be sorely disappointed if it were to be eliminated!

Hope you reconsider!

Thanks,

Subject: Bulk Waste

I'm writing in support of keeping the bulk waste program alive in Sandy.

I grew up in SLC and the annual cleanup was a big deal. Our neighborhood benefitted tremendously from the program. My parents still live there and are very concerned about how they are going to dispose of yard waste, etc. without the program in place moving forward.

I've lived in a number of different cities both in Utah and elsewhere. One of the reasons I chose to live in Sandy when we moved back to the Valley is because the city does such a great job with streets, parks, roads, etc. and because of the bulk waste program that motivates and allows residents to take responsibility for keeping their yards in good repair.

When you don't have a program like this in place, only those with pickup trucks, large trailers, or lots of disposable income to hire someone else who does are able to take care of yard projects, trimming bushes, removing tree limbs, etc. The natural outcome is that people basically stop caring for their yards and let more and more grow wild. They don't have a way to get limbs and such hauled away, so they don't trim them.

In our neighborhood we have lots of long-time homeowners who are getting up there in years. None of them have a means of hauling away yard waste. We also have a good group of able-bodied neighbors with chainsaws, rakes, trimmers, and more who are willing to move around the neighborhood helping these older neighbors. We gather together twice a year as a neighborhood and find the neighbors most in need of help and step in to help them clear out and trim back the growth. This happens the Saturday before our neighborhood pickup. It brings our neighborhood together and is one of the more charming parts of living here. Without the bulk waste program, I'm not sure how we'd do this. While we have sufficiently able-bodied men to help their neighbors, few, if any, have trucks, trailers, etc. that we could use to efficiently haul away the yard waste.

One more issue is that our solid waste program doesn't have a viable yard waste solution either. We already have a recycling program (that doesn't accept most recyclables). But we have to dispose of yard waste together with other solid waste. For most people, that isn't nearly enough space for disposing of normal trash, recyclable trash that can't be recycled, AND yard waste. Increasing the amount of yard waste by discontinuing the bulk waste pickup would further strain the system. Adding yard waste specific containers would be a pain (one more can to take to the curb each week and store the rest of the time), and would

likely increase costs by adding a third truck route each week city wide to handle those containers as well. The bulk waste program must be more efficient than that.

Please feel free to contact me if you have further questions on this.

Thanks. I have read the article. It is full of loopholes. In short,a very stupid idea. I will never reserve a dumpster to be parked in,on or near my property let alone to be responsible for what my neighbors put in it.

Also, I did not mind those so called scavengers hauling away recyceable items. Good for them! In fact I would track them down and offer items.

Whoever came up with this idea is frankly an idiot!

What about older people or handicapped persons? Have you ever tried to lift stuff into a 10 foot tall dumpster?

The city had front loaders,etc.

This mayor has got to go!

Subject: Re: City Council Agenda Item #6 2/4/2020

You are welcome. I do try to stay informed. I miss a lot, but do try. I didn't know you had asked for feedback on the bulk waste. I (of course) live in District 4. I did see that Council Member Zoltanski asked on her Facebook account for feedback on the bulk waste and I posted my comments this morning there. I was watching the livefeed of the City Council meeting that night and have been thinking it over. I don't mean to overwhelm you. I did go through the Agenda Packet for the City Council meeting and read all the emails submitted. I will include mine as mine are noticeably different than most. In the end, I am very conflicted as to how I feel about the program.

I'm really torn on this. I see what people put out and the way we treat our storm drain is inexcusable. Sandy City ALWAYS does a fantastic job notifying citizens as to what can and cannot be put out. We separate green waste from the rest. We never put out tires or construction material or other hazardous waste. That being said, it doesn't seem like a chunk of our citizens bother and just toss stuff out. I cannot imagine how much goes down the drain.

Second, I never thought about the safety of Public Works employees. Having a husband that works a dangerous job, I have great empathy for these employees and their families. To me, nothing is more important than keeping those guys and gals safe. 1.3 million hours without an accident is something that should be celebrated. I would also like to add, that the crews have always been amazing. They are incredibly mindful at all times, both with property, but also all movement around them both traffic and pedestrians, and that in itself speaks volumes about the entire department. They always leave the front of our house tidy and in the past, we have had some massive piles.

Third, I understand the importance of cost savings. That is a lot of money and resources could be better spent.

On the flip side, there are lots of reasons I love the bulk waste program. One of them I am certainly in the minority view on.

First of all, I don't appreciate the short notice. I, along with numerous neighbors, have been holding on to things in anticipation of spring clean up. I think at least six month notice should have been given.

Also, my street really uses the bulk program pick up. We have the larger lots and we have heavily relied on the bulk pick up in the past. When we moved in, our house and property had fallen into disarray after a decade of the previous homeowner being ill. We used the street for our old cabinets and waaaaaaaaaaaay too much green waste to even explain. There were numerous pick-ups where one corner of our property to the other on the street was just green waste. I feel with some of the larger lots and the amount of green waste they generate, the bulk pick up was great at diverting from the landfill. However, I now understand that green waste is frequently sent to the landfill anyway as demand for it isn't as great as the supply. I wish there were a way to increase demand. (Off topic, but we love Chip Drop for the free woodchips including delivery we get. Between two loads in January, I bet we received forty cubic yards of woodchips. For free.)

Anyway, to my final reason why I actually grew to really like the bulk waste pick up. And likely one that is very unpopular. I liked the scrap guys (and even gals, thinking of the teenage girl we would see helping her dad) who come through. We would put things out specifically for them. We'd put our scrap metal out first, then wait for it to be grabbed by somebody, and then put out our other items. Right now we have a chunk of copper that I literally had my husband pull out of the trash can and I said, "Wait! Let's save that for the scrappers!"

I'm not going to name names, but I also know somebody who likes to go around and pull things from other people's piles. She has found AMAZING things. Last year she gifted me almost a full roll of welded wire that I put to use building deer proof cages for our fruit trees to keep the horde of deer from killing them all. There was nothing wrong with it. She sometimes sends me pictures of her other treasures and, man, I cannot believe people throw away such awesome things. Things that just would have gone to the landfill.

I guess in conclusion, I worry about the perfectly good metal and other items that will now just go to the landfill. We never seem to have enough scrap metal to take it to a scrapper ourselves and the last time my husband did, he said he would never go back. Not due to the scrappers, but the other customers (meaning tweakers) that he ran into. Part of me wonders if the City could collect it, but I imagine there again would be liability as all metal is different and some people may abuse the system.

As for the other perfectly usable items that will now end up in dumpsters, I don't know what to do about that. Maybe citizens will go back to setting them out with a "free" sign, but in honestly, I think they will just go in dumpsters. Whenever people have gotten a dumpster (myself included), it just seems easier to put things in there than go through the effort of finding it a good home.

I also wonder if twenty dumpsters is sufficient. I think of interstates. Building more lanes doesn't alleviate traffic issues, but leads to more traffic. I don't know, I just wonder if there are issues that will arise by switching over. When we used to live in Cottonwood Heights, they would put out dumpsters once a year. We'd be working and come home and one neighbor would have gone around to all the dumpsters and filled up the whole way around the block!

Absolutely! Thank you.

I understand the desire to move toward dumpsters instead of placing items on the curb. My request would be to maintain a schedule and have the city place dumpsters one neighborhood at a time. Another request is to give residents two or three days to fill.

This would give everyone equal opportunity. (I worry that a first come, first serve type of system would leave the majority without an opportunity to partake.)

It also eliminates the trash sitting on the curb for weeks on end, which I know can happen.

Thank you for listening!
Christy

Hey Cyndi and City Council,

We have loved the fall and spring curbside pickup and understand that may be going away. When we joined Sandy City a few years ago, that was a huge benefit we were looking forward to having.

Change is hard for everyone. If this change moves forward, would the dumpsters be available Year-round or just seasonally? Do you anticipate a long waiting list for dumpsters?

Thank you for your attention to the matter,

Subject: NO to dumpsters! Proposed sandy cleanup change
Hello,

As a sandy resident I would be so disappointed if we went to dumpsters vs the bi-annual clean up. Please don't do that!

There are several reasons:

- 1- dumpsters fill up faster than they should and would be more likely to be abused than the curbside clean up is. We see what's on the curb. Anyone can stop by in the middle of the night and throw stuff in a dumpster (or throwing illegal stuff in the dumpsters).
- 2- those people that don't (or can't) clean up their property will drag down our home values by becoming more run down. It's easy to get stuff to the curb twice a year. Not everyone can lift big or heavy things into a dumpster. Those of us who HELP those neighbors need to be able to do so quickly and efficiently (taking to the curb). We do this every spring and fall to help our neighbors and thus protecting the values of our own homes.
- 3- Having random dumpsters show up throughout the neighborhood for months at a time is MUCH worse than having a week during the spring and fall with stuff on the curb. Gross! We have to live here! Nobody wants to see that on a regular basis!
- 4- PLEASE DO NOT DISCONTINUE THE CURB SIDE CLEAN UP. Look at the other cities that already use it and compare. We don't want Sandy to be the next Taylorsville or Midvale. NO TO DUMPSTERS!!!!

Thank you,

Leanne Boudreaux, Sandy City resident for 19 years.

Subject: Dumpster clean up

We would appreciate the council's help in considering feedback from concerned citizens about the mayor's decision to limit and change the spring and fall clean up services. One of the reasons we were positive about incorporating with Sandy city was the policy of spring and fall clean up. Our neighbors totally fill and over flow the dumpsters which shows there is a need and the appearance of the neighborhood benefits from the yard trimmings and the trash removal. This is an example of where the city supports the residents. Please help us by supporting these services.

Thank you for your help.

Subject: Dumpster program

Every person I have talked to who has a dumpster program hates it. The dumpsters fill up very quickly and it is impossible to put heavy items in the dumpster once it starts to fill up. It would be a real problem for elderly and impaired people. I will I am absolutely against implementing this program!!!

Subject: Dumpsters

I don't think the dumpsters are a good idea. being a small female, I don't see how I can lift anything into them. I can't even lift a bag a leaves into a dumpster. My parents in CWH have the same issue. I know there are doors on them but it's amazing how fast they fill up and overflow. Dumb that the person "requesting" is responsible for what goes in them too. You would be surprised that people who don't live in the area illegally dump stuff in them. I will still drag branches and other debris into the street while I wait for a dumpster because weather is unpredictable and I got to clear my yard debris in good weather. Anything heavy I can't lift up will also go to the curb in hopes a "poacher" takes it! I never understood the big deal of people taking what's on the curb anyway. They are either repurposing, reusing or recycling rather than going straight to the dump!

Thanks for listening.

Amelia Martinez, Sandy resident for 18 years.

Subject: Fw: Elimination of Spring & Fall Bulk Waste Pickup - Please reconsider!
Date: Monday, February 3, 2020 9:30:41 AM

From: Brenda Christiansen <brenda_christiansen@yahoo.com>
Sent: Monday, February 3, 2020 8:22 AM
To: Cyndi Sharkey <csharkey@sandy.utah.gov>
Subject: Elimination of Spring & Fall Bulk Waste Pickup - Please reconsider!

I would like to weigh in on the issue of bulk waste pickup. I have read the new and "improved" plan for bulk waste, but I don't see how it will work for my neighborhood. I live in one of the White Pines townhomes communities. My neighborhood has 30 homes and our driveways are short and the roads just wide enough for two cars. There is no place in our neighborhood to park a giant dumpster without blocking the fire lanes. I feel like the new program will exclude me and my neighbors from being able to participate in bulk waste removal. This frustrates me because I will still be paying taxes to the city for a program that I can no longer participate in. Please reconsider keeping the former curbside pickup on a planned day for spring and fall bulk waste. I have loved being able to use it and I know my neighbors feel the same.

Thank you.

Cyndi,
I am very disappointed to hear the mayor is planning to end the bulk cleanup. I believe this type of cleanup has allowed Sandy citizens to clean up their yards and help them to keep their yards free from debris. I have read the new program but I don't believe it will achieve the same results as the current program. Please encourage the mayor to change his mind and keep the previous program.

Thank you,

Hi Cyndi,

Yes, you may include my email. I hope it will help! I'm looking forward to a positive outcome. If they don't want to do this kind of pick up, perhaps putting dumpsters along the street for a certain period (like 12 hours) twice a year would be a better option? We had those when we lived Holladay and they were great.

Thank you for answering my email.

Yes please do eliminate that bulk trash pick up. Dumpsters on demand is a much much better idea. The bulk trash pick up just creates a huge mess, and people put out stuff on the curb 30 days to early, and then there's a parade of Latinos in pick up trucks with trailers rummaging through there the piles at all hours of the day and night. If the city would enforce the rules it might be better, but they don't so eliminate the program.

Thank you for making us aware of the changes to the Sandy Bulk Pickup.
I don't love the new plan, but if it has to happen, here are some suggestions/questions:

1. Could we have a schedule for the dumpsters? (Ex. This block/street gets a dumpster from April 7-10)
2. How many dumpsters are available?
3. How do we ensure that we don't get blamed if one of our neighbors dumps something in our dumpsters that shouldn't be in there?

We love the current bulk pickup program and don't see any reason for change.

Thanks!

To: Cyndi Sharkey <csharkey@sandy.utah.gov>
Subject: Sandy City Bulk Waste Pickup

Please do not eliminate this program. Aside from the poor reasons I've seen listed for doing this new dumpster scheduling, I have some other comments:

1) This doesn't work in other cities that are doing it. In WVC, for example, residents complain because the dumpster gets dropped off while they're at work, and is filled by their neighbors before they even have a chance to put what they needed to in it.

2) It won't scale. How many dumpsters does Sandy City plan on keeping around for this? How long until Sandy City begins charging for them due to high demand and low supply?

3) Not everybody has space for a dumpster to be dropped off. This is an inconvenience.

This feels like a cost-cutting measure disguised as good intentions, and I don't buy it. Please do not cut this program. I'd be happy to even pay a little toward it if it's about budget.

Thanks,
Steven Briggs

Dear Councilwoman Sharkey,

It has come to my attention this evening that Mayor Blackburn plans eliminate the Spring and Fall bulk waste pick-up, I am a long-time Sandy resident and tax payer and find this idea repugnant. Eliminating this service leads me to believe that our Mayor is out of touch with his constituents and lacks understanding of how this service benefits the communities in Sandy and the people that live in them. It helps keep our communities beautiful by providing residents with an opportunity to have their yard waste removed during Spring and Fall clean-up without multiple and costly trips to a land fill. It also brings people together as neighbors reach out and serve one another as they comes together to get yards cleaned up and beautified for the bulk pick up.

Eliminating the bulk pick-up would be a huge disservice to every resident of Sandy, especially those who don't have the financial means or access to a truck needed to make multiple trips to a land fill.

As our elected Councilwoman, please make our voices heard. We want and need this service to continue.

Sincerely,
Lisa Schieving

Subject: Sandy City Spring and Fall cleanup...

Dear City Council Member Sharkey:

We have been residents of Sandy City for 18 years now and have always participated in the spring and fall cleanups. We believe that this is an integral part of keeping our beautiful city clean and in good order. We want to strongly urge that this service to our city continue on and not be cancelled. Mayor Bradbury has already done many things frowned upon by Sandy City residents and this would be very damaging to our neighborhoods and the beauty of Sandy. We vote NO on getting rid of this service and ask that our names be added to any petition that will effect the outcome of this decision. Thank you very much!

Subject: Sandy City twice yearly waste pick up

Ms Sharkey, We are adamantly opposed to the abolition of the twice yearly waste pick up for Sandy City. This procedure is one of the reasons that we decided to stay in Sandy. Our family has lived here since 1986. This is one of the reasons we pay taxes. There are many less important ways to economize here in Sandy. Please help to stop this. My only other alternative is to chop the waste and tediously leave it in our two garbage cans over a period of several months. We consider this waste pick up to be an essential service for the citizens of Sandy City.

Subject: Sandy City's New Bulk Waste Program

you must go online and reserve a dumpster for free. There are 20 dumpsters available to the 25,000+ residents. So pretty much it will be a joke trying to get one. The Council has asked the Mayor to bring his plan to the council meeting Tuesday night so they and the public can discuss, ask questions and comment. The first step to reversing this is getting residents to voice their opinion. You can either show up to the meeting or send an email no later than Tuesday afternoon (2/4) to csharkey@sandy.utah.gov with your feelings and opinions on the matter. Please pass this on to everyone you know in Sandy and let's do our best to get the sandy pickup back.

Dear Councilwoman Sharkey:

I was frustrated when I received an email last week from the city stating that the bulk waste pickup has been changed. As far as I can tell Sandy City Mayor Bradburn, without first consulting the City Council, has done a complete overhaul of the bulk pickup service the city has provided for many years. Additionally, I don't believe he asked for input from city residents before making these draconian changes. I'm part of a group that regularly provides feedback on issues the city is looking at (Dimple Dell usage, traffic flow around Rio Tinto Stadium, the empty land east of Albion Middle, street light issues, etc.). I received no email soliciting input regarding the bulk waste program.

I went to the city's website to read through the "new" bulk waste program. I discovered there are only 20 dumpsters that are available to reserve--a woefully inadequate number for a city with 95,000+ residents. I further discovered that the individual who reserves the dumpster also assumes responsibility for whatever ends up in it. The problem with that is that the dumpster remains in front of your home for up to 60 hours. This means you ensure for that time period that no one puts stuff in the dumpster that's not allowed (like paint and other items specifically prohibited). The website doesn't specifically spell it out, but assuming responsibility for any prohibited items might mean either a fine will be imposed or

a bill will be sent for the cost the city incurs to dispose of the prohibited items.

Two of my children live in municipalities (Murray, Cottonwood Heights) that put dumpsters in different neighborhoods one or two times during the year. I regularly hear from them about how much they wish their cities provided the bulk waste pickup service that Sandy City does. Or did. They've complained it's difficult to get heavy items into the dumpsters, and that it creates issues between neighbors as a race occurs to see who can get their stuff in the dumpsters as quickly as possible before they fill up, and they fill up quickly. Based on the information they've shared over the years, it is a very real possibility that the situation could arise where neighbors, who haven't been invited to put their stuff in a dumpster someone else has reserved, might look for an opportunity to put their stuff in the dumpster at a time when other neighbors aren't around. I also believe, given there are only 20 dumpsters for Sandy's new program, that this issue will be a big problem.

The Sandy City's website said complaints have been filed by city residents about the debris left on the streets after the bulk pickup, and that the streets look trashy before the pickup. But in my opinion, those issues are less problematic than (1) overhauling a popular city service without first going through the process of soliciting citizen input, (2) forcing individuals who rent the dumpsters to take responsibility for its contents when they don't have the ability to control what's put in an open dumpster left in front of their house over a 60-hour time period unless they have 24-hour surveillance in place, (3) the real possibility that others will put their waste in the dumpsters uninvited, and (4) providing an inadequate number of dumpsters to be reserved which will result in a substantial decrease and change in what has been a popular city service.

Frankly, the changes Mayor Bradburn has put in place are even inferior to what our children in Murray and Cottonwood Heights enjoy. At least those municipalities provide the dumpsters on a regular basis without having to reserve them, and individual citizens don't have to assume the liability of what their neighbors might put in the dumpsters.

Please do all you can to dial back this change. While changes to the current program might be needed, making those changes without discussion with the city council and solicitation of input from the citizenry is not good policy.

Thank you!

You are fine to use my email. I am aware of the replacement plan with the dumpsters being available for reservation. We have actually reserved a dumpster before and my hope is that Sandy will keep both programs! Having the dumpsters available for reservation helps encourage residents to remodel, landscape and renovate homes. But the curbside clean up is necessary for yearly home and property maintenance. Since Sandy is not a community that is developed with lots of strict HOA's like there are in other states, residents are not required to pay fines if they don't keep up their property but instead have the curbside clean up service provided for them which encourages them to kindly participate when they see "everyone else is doing it." I think it makes for a much more peaceful community where people help one another out, take pride in their home/property and enjoy the community. Fingers crossed that this program will stay!

I am writing because of my concerns about the decision to do away with/alter the Sandy curbside clean up program. If I'm being quite honest I am shocked that this is even being considered given the amount of participation there is in the curbside pickup! This program is one of my favorite things about living in Sandy—it makes it so easy for every household to keep their homes up that the home values continue to hold/increase and the cleanliness and community effort make it a lovely place to live. I am asking that this proposal be re-considered and the budget be found to KEEP the curbside program in Sandy the way it is! Thank you...

Cyndi,
Thank you so much for alerting the Sandy residents of our spring and fall clean up change.
I have family members who have lived in the cities where they do the “dumpsters” clean up and they have said it just does not work, it is easy for people from outside the city to throw there items in it. The dumpster can “fill” way too fast because of how residents place their large items. And for as much as it is said for people not to go through the piles at the curb... that actually encourages the real recycling and limiting the amount of items going to the dump.
Please please please don't let this change happen!

Subject: Sandy neighborhood clean-ups

I understand that one more of our Sandy services has been discontinued without citizen input. As a 30 year Sandy resident I am seeing more negative things happen in our community since the new mayor has been in place than all 30 years combined! As a city in the valley with close to, if not the highest taxes we are getting increasingly less and less. What a joke! We haven't even been getting proper or consistent snow removal on the neighborhood streets and cul de sacs since Bradburn! What's that all about?

Now both Spring and Fall neighborhood cleanups are discontinued? The dumpsters aren't even enough to handle more than a street or two let alone the whole city! If we want the city to get trashy real quick this is the perfect move. Most of us don't have a way to haul things to the landfill and can't pay the fees there anyway so things will just build up in trashy piles in yards and such. How disgusting and infuriating! If it was doable with our budget before it still is. Our taxes are high enough to pay for this service. We have tons of new residents in Sandy in all that new high density housing that's gone in!!! So now with a higher tax base we get what?! How can this happen without any input or approval? This needs to be stopped!!! And Bradburn needs to stop pulling these stunts, what a jerk! Where's Tom when we need him?

A discontent citizen,
Natalie Christiansen

Hi Cyndi,
I got the news that Mayor Bradburn intends to curtail the bi-annual bulk trash pickup. That service is a hallmark reminder of why Sandy City is such a wonderful town to live in. The costs and management challenges of that program can be addressed if the administration puts service to the citizens ahead of other pet projects.

I know many people who will feel betrayed by the mayor if his proposal passes.

I have high hopes that you and your colleagues can bring back the good service oriented government mindset that I and my neighbors have enjoyed for the past 30 years.

Please share these concerns with the Mayor and his associates.

Best Regards
Bruce Miller

Cyndi-

Thank you for hearing our concerns. Yes please feel free to include my email and my additional thoughts here.

We do understand some of the other concerns like scavengers and illegal dumping. However the online dumpster option will be come useless when over loaded with all of the city trying to schedule a limited number and not waiting for their regular fall and spring pick up like in the past. If you are to drive to the dump with the new city coupon there is added cost to the residents (gas and means to transport). Not to mention only providing the dumpsters April to September will not meet the needs in the fall at all. All of the changes would for sure have a decrease in cost for the city. If this program does go through will we see a reduction in utilities or local taxes? My guess is no and the mayor likely has plans to use the funds else where in the budget.

On top of the surprising change in the program for our city I think one of the most frustrating parts about this and how it's happening is that it feels hidden. We're pretty aware of our city and what is going on however this seems like it's been fast tracked to hide it from the city residents. No matter what is going to happen with this program since it affects almost every single resident in Sandy there should be more transparency and communication early on in this process.

Thank you we appreciate your help and support representing sandy as this issue is discussed.

Subject: Semi Annual Trash pickup

Cindy,

It has been brought to my attention that our Sandy City Trash collection day has come to an end and will not be continuing this year without some changes.

Currently my zip code is very desirable for potential buyer which helps my home value (which boosts tax dollars). I believe this program contributes to my neighborhood desirability. My neighbors nor I have junk or trashy yards which promotes value.

I would like to voice my frustration of the removal of this program. This program makes trash and junk removal convenient and simple.

This has been a very beneficial program for my family and for my neighborhood. When the reminder of the pickup comes around I notice my family and my neighbors spend more time cleaning up their yards and discarding junk that would otherwise sit on the side of their house.

There are neighboring cities that do not have this same program and there are homes and yards in those cities that continue to fall into junk yard status because the home owners are overwhelmed without a convenient method of junk removal. Sometimes the dumpsters are too far away from their homes or the dumpsters fill up too quickly.

I fear if this program is removed the overall property values will suffer because of the junk people like to collect and store because that is easier then carrying items to a dumpster or taking to the dumpster themselves. Please do not remove the program.

Yes, please do. I misunderstood the notice I received online. It just indicated that they were doing away with the entire spring and fall cleanup. I read the notice you provided with regard to the dumpsters, and that clarified this issue. I know they have this same process in Taylorsville and West Valley City, and it seems to work for them. I do agree with others who commented with regard to people putting their trash out weeks before the pickup date in the gutters and making the neighborhood look like a dump for weeks. At least the dumpster would contain all of that trash, and only be on the street for a few days. This may be a much better solution for us all. Thank you very much for your response.

Subject: Spring & Fall Pickups

I was just informed that the Sandy City Mayor is considering cancelling the spring and fall pickups. Please reconsider doing this. Without this service, there are many residents who only have this means to dispose of dead limbs, trash that would continue to accumulate, and in the end Sandy City will suffer dramatically. We residents pride ourselves in keeping up our yards and homes. This will create serious problems that will cost the city far more in the end. This is part of our taxes we pay willingly, so I suggest this idea be put before the residents of Sandy City before a decision is made. It makes me rethink voting for this Mayor in the next election. This is such a bad idea and I am beyond angry that this would even be an issue. Time to go back to the drawing board!!!

Of course you can. A huge dumpster in the gutter will *really* clog it up. Little children will be playing on and near these monstrosities, darting around them and into the street. The mayor must have not considered the "child safety" factor in proposing this program.

What about senior citizens? We can hardly lift things over our heads, let alone up four feet and into a dumpster. Dragging tree trimmings, and bags to the edge of the lawn is easy, and the city clean-up crews are very efficient in removing it on the appointed day.

Look, the city clean-up program is perfect the way it is. Citizens see their tax dollars working in their favor. we like what we have. Don't change it!

Hello,
The curbside green waste pick up in spring and fall is a huge benefit to the residents of our great city!

We really appreciate this service as seniors and would be unable to maintain our property appropriately without it.

Please keep this important program in place!

Thank you,
William Downer

To whom it may concern:

We have been Sandy City residents for 47 years. We have raised our children here and have loved it. I understand that Sandy Government is planning on discontinuing our Spring and Fall pick ups. Please reconsider that decision. So many older Sandy residents use that service to keep their property managed and clean as well as growing families. Many of us have no way of taking a load to the dump on our own. I watch as every Spring and Fall people make huge piles of trimmings, home repair garbage and old furniture, it has always been one of the perks of living in Sandy.

Please rethink that decision and help the residents of Sandy continue to keep Sandy City clean.

Sincerely,
Dave and Paula Thomas

Subject: RE: Spring and Fall Pick-ups

Hi Cyndi,

After reviewing the Dumpster Program, we still feel that the Curb Collection is still a better option. Reasons are as follows:

- 1) It actually forces the whole neighborhood to clean up as there is a specific date that you have to have your waste product on the curb ready for pick-up.
- 2) The scavengers come through and take anything that is recyclable. They are going to do this whether the materials are on the curb or in a dumpster. Do you really want to have people or kids crawling around in City owned dumpsters with the possibility of getting injured and then having to call in the First Responders? Seems like a lot of liability.
- 3) 20 dumpsters for the whole city is not many. Especially on a first come first serve basis. It will limit the home owners to just one clean-up per year. We really need 2. It is amazing how much junk you acquire throughout the year.
- 4) Many homeowners will probably not even take advantage of it due to the fact that they do not have a lot of waste materials. They will just let it pile up in their backyards thinking that they will get rid of it at some time. That will bring in mice, rats, snakes and possibly skunks. I have seen this in neighborhoods and even our backyard when we moved in here 11 years ago.
- 5) The one (only one) good thing I see about the dumpsters is they will now take dirt and building materials.

By the way, why didn't the mayor notify the Sandy Residents of this? Didn't even see anything about it in his Sandy flyer. Doesn't seem like he is much for the people. Please don't hesitate to contact me if you have any questions or comments. We appreciate you getting involved in this and trying to do what is best for the residents of Sandy.

Dear Cyndi,

We understand that the Mayor of Sandy wants to take away the Spring and Fall Pick-ups. We are completely against this as it has afforded us to keep our city clean and well maintained. We have been residents of Sandy for over 20 years and always loved how clean it was and what a great idea it is to have the Sandy Pick-up. Please let the mayor know that we, and many of our neighbors, are disgusted with his decision and do not feel it is in the best interests of the City of Sandy. We knew voting for you for city council was the right way to go. Voting for the mayor, not so much.

Hi Cyndi,

Thank you for responding to my email. Yes, you are certainly welcome to include my email in your packet. It is only one little drop in the bucket, but maybe that 1 little drop can make a difference.

I am not able to attend next Tuesday's meeting, but I hope that it will go well and the outcome will be that they will continue this program. The thought of having dumpsters all over the streets does not appeal to me in the least! That means people have to haul their stuff somehow to get it to those dumpsters, and some of those items may be difficult to haul beyond their curb. I live close to an unincorporated part of Sandy where they do the dumpsters, and I have always been so thankful that we don't have to have that program!

I also can envision those dumpsters to be an added traffic hazard on some streets. My home is on a busy street where people drive to drop off and pick up their children from Silver Mesa Elementary. At those times of day, it is difficult at times to even navigate the street WITHOUT any dumpsters on the street. I can't imagine what it would be like with them there!

I truly do hope the mayor will reconsider his decision, and thank you for all you do.

Best regards,
Kadi Clough

Subject: Bulk Waste

Dear Ms. Stroud

I have just been informed there will be no Spring or Fall bulk waste pickup that has been available in past years. Curb-side pickup has been much appreciated and a real plus for Sandy residence. I understand that the trash trollies will be used instead (by reservation). I am dismayed by what seems to be a reduction in the benefits offered to Sandy citizens and would like you to know that I would appreciate anything you can do to see that the curb-side service is continued.

We have always complied fully with the time schedule and types of materials we could place at curb side. I am aware that some Sandy citizens have abused this privilege by placing items too early and by including items not approved for pickup. These abuses could be handled in a better way than making the change to the trash trollies. They should simply be fined or charged the going rate for the dump fees and transportation.

The immediate problem for us is that we live on a cul-de-sac. There is no place we can place a trash trolley without blocking driveways and mail boxes. Also, by eliminating the bulk waste pickup, Sandy can expect to have more leaves and Fall trash in the storm drains. Also, by scheduling two pickups, people get busy cleaning up their yards at least twice a year. Without this benefit, people are likely to allow debris to accumulate in their yards.

Please do what you can to retain the benefit of curb-side trash pickup

Sincerely:

Michael K. McCarter

I'm lucky that my wife had the time to look thru Nextdoor or I would have missed this announcement. Where is the communication from our city government?
This is a bad idea. Has the mayor ever driven around a Sandy neighborhood the week before their pickup date? There is a flurry of activity cleaning up yards and houses that otherwise would not occur. Beautifying our homes leads to higher property values and higher property values leads to more tax revenue for the city. Both the citizens and the city benefit.
If we are left to order dumpsters on our own, this beautification will only happen sporadically. We are supposed to coordinate dumpsters with our neighbors and yet I rarely see my neighbors during the winter. In the summer, we are all busy and it's difficult to coordinate a date for a neighborhood dumpster. Having a date in the spring and a date in the fall that the entire neighborhood knows about and all we must do is bring our material to the curb has worked very well.
If people are abusing this service, then deal with that on an individual basis, but don't penalize us all for a few abusers & complainers. If city workers are threatened by hazardous materials, deal with that on an individual basis. I guarantee you that as soon as the citizens realize that their spring cleanup isn't happening, the mayor will get an earful. This process isn't broken, so work out the kinks, but leave it in place. Taking it away will have a detrimental effect on the citizens and the city.
