

## Water Rates

Customers are billed a base rate according to the size of their meter plus the cost of the water used per 1,000 gallons according to the tiers shown below. **These rates took effect July 1, 2016.** Two water rate calculators are available towards the bottom of this page.

For information on other utility fees, please refer to the [Other Residential Fees](#) page.

<b>Water Rate Schedule Beginning July 2016</b>					
		<b>Cost Per Thousand Gallons</b>			
<b>Meter Size</b>	<b>Base Rate</b>	<b>Block 1</b>	<b>Block 2</b>	<b>Block 3</b>	<b>Block 4</b>

## City Water Rate Calculators

To help you understand what the water rate changes might mean for you, we've provided the following interactive water rate calculators.

To enter your own water usage values, click on the fields highlighted in green, type in your monthly values and either move to another field or press 'Enter' for the totals to update.

**Note that it may take a moment for the calculators to load. And for the totals to update after each edit.**
