I just read that the mayor is proposing to discontinue the bulk pick up program. As a resident I look forward to this service. I believe it helps keep Sandy residence on top of cleaning and maintaining their property which contributes to community beautification. I have friends who's cities (Cottonwood and Sugar House) who are on the dumpster program and it does not work. They are frustrated when the dumpsters are immediately filled. I believe the the quality of life in Sandy is better because of the bulk waste pick ups. It motivates people to be proud of their city.
