

Sandy Cairns HTRZ Application

CREATING A VIBRANT TRUE TRANSIT-ORIENTED CITY CENTER
IN THE HEART OF THE WASATCH FRONT

Mayor Monica Zoltanski

“The Cairns District at the heart of Sandy reflects decades of thoughtful planning and a bold vision for the city’s future. As a vibrant hub for living, working, and gathering, it has become a focal point for major infrastructure investments in sports and entertainment. With the launch of the Housing Transit Reinvestment Zone (HTRZ), we are not only advancing that long-held vision but also prioritizing affordable, accessible housing for all. The HTRZ lays the foundation for smart growth, sustainability, and inclusive opportunity for every Sandy resident.”

Project Vision

A major project like the Cairns District requires strong partnerships. The Sandy Cairns HTRZ application includes the support and commitment of the following groups. The HTRZ will create a transformational, sustainable, family-centric, mixed-use, transit-oriented community in the heart of the Wasatch Front.

Executive Summary

- Includes over 25 acres within the heart of Sandy's downtown district. Directly adjacent to I-15 and connected to the South Jordan Station by a to be constructed pedestrian bridge.
- Brings 1,480 residential units
 - Provides a total of at least 178 units of affordable housing (12%), including 25% of the units reserved for 60% AMI (45)
- Increases transit ridership through not only North/South connectivity, but also East/West connectivity and first/last mile solutions
- Increases access to employment and reduces the need to drive to work
 - Sandy City is an important employment hub in the Salt Lake Valley, and it is estimated that over 38,000 Utahns commute to Sandy for work daily
- Increases access to education
 - University of Utah's Sandy Campus is 0.05 miles from the HTRZ's boundary. Grand Canyon University's Nursing School is 0.2 miles from the HTRZ
- Provides connectivity and options for active transportation through a trail system running throughout Sandy City
- The project will be a true **S.M.A.R.T** community
 - Sustainable, Mixed-Use, Attractive, Realistic, and Transit-Oriented
- HTRZ funds approximately 56% of the estimated \$134M investment gap

Cairns HTRZ Master Plan

The proposed development includes:

- 1,480 Multifamily Units (including 133 units at 80% AMI and 45 units at 60% AMI)
- 257,500 Square Feet of Class A Office Space
- 217-Room Upper-Upscale Hotel
- 30,000 Square Feet of Retail Shops and Restaurants

Development Plan With And Without HTRZ Funding

- **The HTRZ development plan more than doubles the number of residential units and allows for affordable housing.**
- Without HTRZ funds, higher-density development in the cairns district is not economically possible. With HTRZ approval, 730 additional residential units are possible (178 being affordable), commercial uses are doubled, office development is possible, and there is **\$268mm** in additional taxable value.

Development	Market Plan	HTRZ Plan	Increase Over Market Plan
Multi-Family Units	750	1,480	730
of which Affordable	-	178	178
Office Square Feet	-	257,500	257,500
Retail Square Feet	10,000	30,000	20,000
Hotel Keys	-	217	217
Multi-Family Assessed Value	\$150,562,500	\$305,526,110	\$154,963,610
Office Assessed Value	-	\$101,632,641	\$101,632,641
Retail Assessed Value			
Hotel Assessed Value	-	\$11,229,750	\$11,229,750
Total Assessed Value	\$150,562,500	\$418,388,501	\$267,826,001

\$134MM Gap for the HTRZ Development Plan

- The table below demonstrates the increased development costs associated with high-density residential and office development in The Cairns HTRZ. It also demonstrates the tax increment needed to offset the additional costs (the Gap) to meet a standard investment criteria.
- While HTRZ funds will not cover the entire Gap, the development team is willing to make up the difference with the belief that the project will outperform traditional underwriting over the long term.

Projected Total Gap for the HTRZ	
Total Units in HTRZ with Type V Wrap (Structured Parking)	1,480
x TIF Needed to Make Equivalent to Market Driven Development (per unit)	\$69,599
= Minimum Amount of TIF for High Density Multi-Family Development	
	\$103,006,635
Residential Units Inside of HTRZ	1,480
Units at 80% of AMI	133
Units at 60% of AMI	44
Total Affordable Units	178
x Value Loss per Unit	\$47,340
= Minimum Amount of TIF Needed to Offset Loss in Value due to Reduced Rents	
	\$8,407,584
Total Office Square Footage in HTRZ w/Structured Parking	257,500
x TIF Needed to Make Equivalent to Market Driven Development (per square foot)	\$86
= Minimum Amount of TIF for High Density Office Development	
	\$22,187,781
Combined Total	
	\$133,602,000

Taxing Entities Will Receive More Tax Revenue with the Establishment of HTRZ Than Without

The table below demonstrates how taxing entities will receive more tax revenue with high-density development, enabled by HTRZ funding, than they would with traditional suburban low-density development.

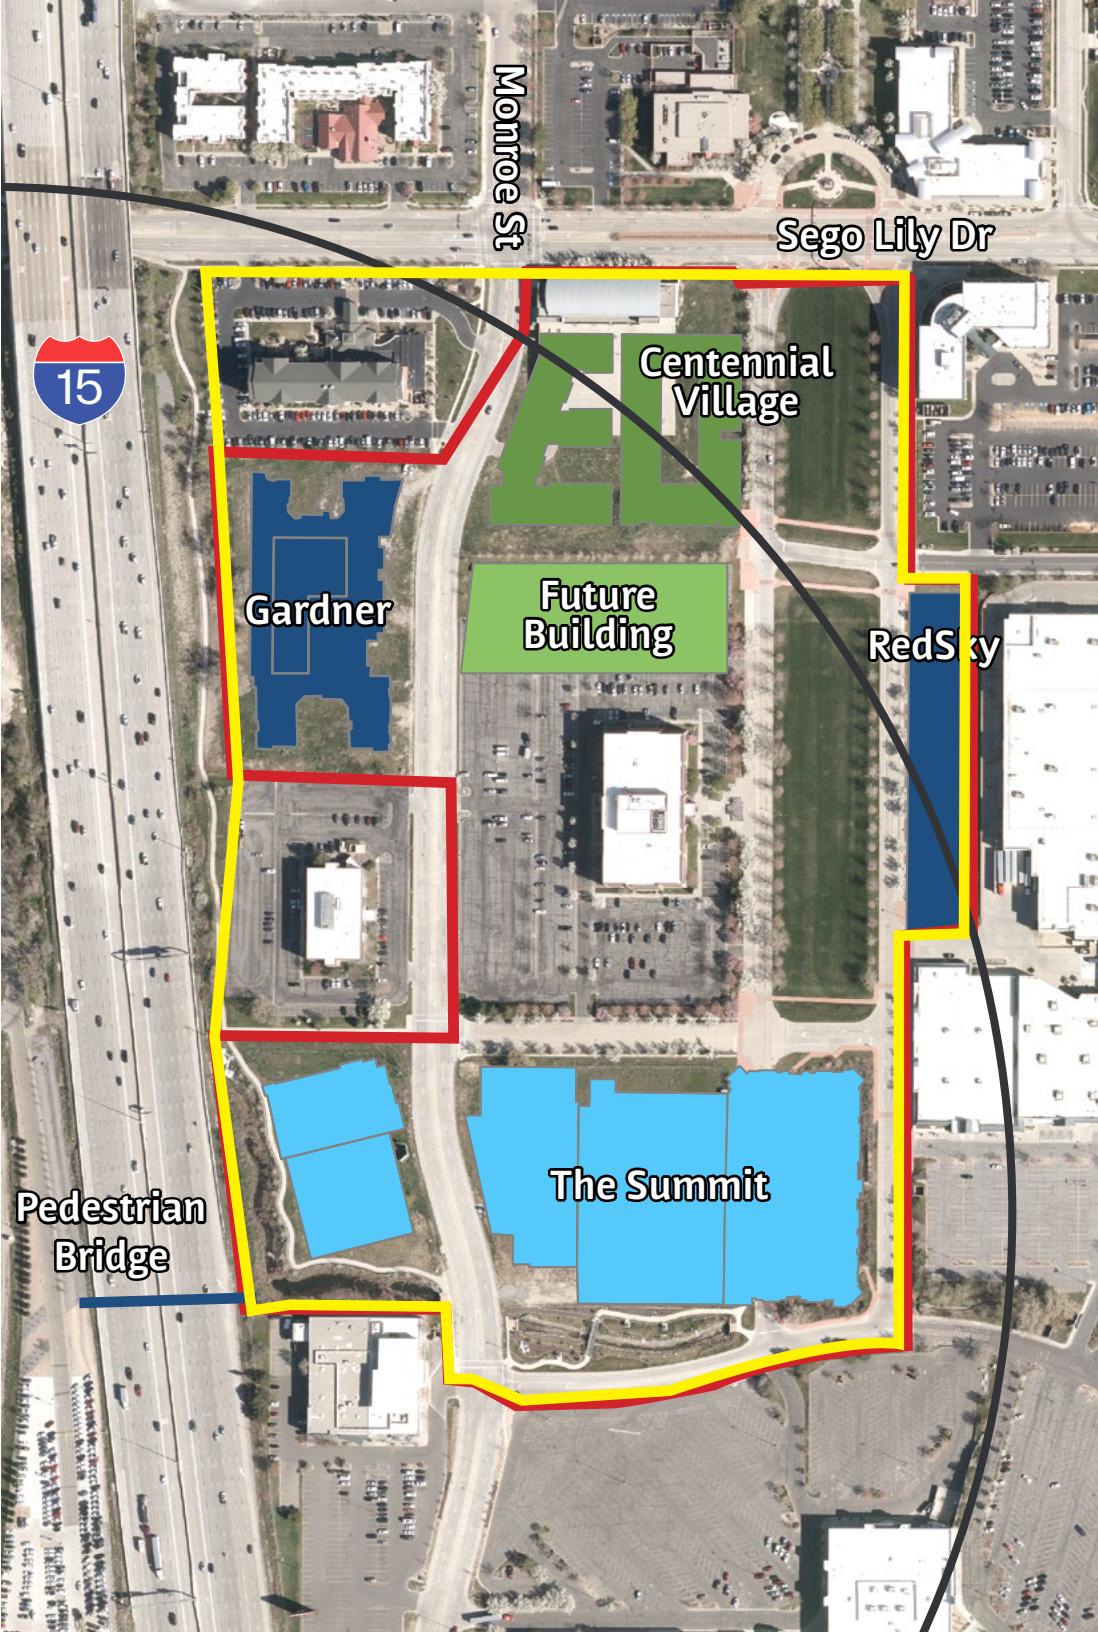

- Over the 45-year period, the **HTRZ development will generate \$152.32 million in incremental property taxes** with \$75.59 million in funding from the HTRZ and **\$76.74 million going to the jurisdictions**.
- Without HTRZ funding, traditional lower-density development would generate \$61.20 million in property taxes over the same 45-years.
- The HTRZ development will generate approximately 25% additional tax revenue to the jurisdictions during a 45-year period.
- At full build out, the HTRZ development will generate 190% additional annual property tax revenue compared to market driven lower-density development.

Tax Revenues Generated (2024)						
Taxing Entity	2024 Tax Rates	With HTRZ Higher Density			Without HTRZ Lower Density	Total to Taxing Entities
		45-Year Tax Increment	80% to HTRZ (25 Yrs)	Balance to Entities		
Salt Lake County	0.001297	\$21,871,437	\$10,852,998	\$11,018,439	\$8,787,580	
Canyons School District	0.005677	\$95,731,802	\$47,503,830	\$48,227,972	\$38,463,449	
Sandy City	0.001091	\$18,397,639	\$9,129,237	\$9,268,402	\$7,391,866	
South Salt Lake Valley Mosquito Abatement District	0.000009	\$151,768	\$75,310	\$76,458	\$60,978	
South Valley Sewer District	0.000187	\$3,153,399	\$1,564,773	\$1,588,626	\$1,266,983	
Crescent Cemetery Maintenance District	0.000022	\$370,988	\$184,091	\$186,897	\$149,057	
Metropolitan Water District - Sandy City	0.0000350	\$5,902,084	\$2,928,720	\$2,973,364	\$2,371,359	
Central Utah Water Conservancy District	0.0000400	\$6,745,239	\$3,347,108	\$3,398,131	\$2,710,125	
Totals	0.009419	\$152,324,356	\$75,586,067	\$76,738,289	\$61,201,398	25%
Annual Tax Increment at Full Build-Out assuming 2024 Tax Rates:		\$3,940,801			\$1,360,031	190%

HTRZ Property Tax Boundary

- **HTRZ Property Tax Base Year**
TBD
- **HTRZ Property Tax Value (2025)**
\$29,503,000
- **Projected Property Tax Increment (80% of TIF)**
\$75,586,067

HTRZ Sales Tax Boundary

- **HTRZ Sales Tax Base Year – TY 2027**
- **HTRZ Sales Tax Base Year Value – TBD**
- **Projected TTIF Sales Tax Increment (25 Years) – \$3,306,399**

Sales Tax Boundary

The Cairns Meets the HTRZ Objectives

- Promotes higher utilization of public transit
- Increases availability of housing, including affordable housing
- Promotes and encourages development of owner-occupied housing
- Improves efficiencies in parking and transportation
- Improves water conservation and air quality
- Encourages Transformative Mixed-Use Development and Collaborative Investment in Transit and Transportation
- Maximizes planning and economic development tools to strengthen and grow major transit corridors
- Increases access to employment, educational opportunities, and access to child care

Without HTRZ funding a project like this would not be possible.

Promotes Greater Utilization of Public Transit

The planned development promotes a greater utilization of public transit through proximity, connectivity, and first/last mile solutions.

- **Proximity** – All 1,480 units will be within 1/3 mile or less of the South Jordan FrontRunner station parcel, and approximately 60% of units will be within 1/4 mile or less.
- **Connectivity** – In 2024, Sandy City received funding to construct a pedestrian bridge that will provide direct connection to the FrontRunner station. The landing point of the pedestrian bridge is currently planned to tie into the Summit development at the south end of the HTRZ.
- **Last Mile Solutions** – UTA currently provides multiple bus routes that connects the FrontRunner station and the Sandy Civic Center Trax Station to major employers such as Morgan Stanley, Bridge Investment Group, and MACU. The project will also provide an expanded trail system allowing for active transportation options such as walking, biking, and scooters to be utilized as first/last mile solutions.
- **TOD Passes** – The project team is working with UTA to implement ‘TOD Passes’ which would allow for the project to purchase several shareable transit passes that could be reserved by residents on a daily basis. This provides a steady revenue stream to UTA and allows residents who historically have not utilized public transit to experience the convenience it provides.

Increases Availability of Housing, Including Affordable and Owner-Occupied Housing

- If HTRZ funding is approved, this project will deliver 1,480 residential units, of which at least 178 will be reserved as affordable. With 133 units reserved at 80% AMI and 45 reserved at 60% of AMI.
- The HTRZ development delivers 60 units per acre, on average, of high-density housing exceeding the requirement of 50 units per acre.
- **Brings 1,480 residential units within a 1/3 mile walk of the South Jordan FrontRunner station. This can only be accomplished through density provided by structured parking.**
- The City is negotiating with developers in the HTRZ to make a portion of the residential units be made available or convertible to a for sale product.
- Over 30% of residential units within the HTRZ will have more than one bedroom

Sandy Cairns HTRZ Affordable Housing Plan

The Sandy Cairns HTRZ is committed to advancing housing affordability in alignment with Utah Code 63N-3-603. To meet this statutory requirement, the City will ensure the following:

- At least 9% of the proposed dwelling units will be occupied or reserved for occupancy by households with a gross household income equal to or less than 80% of the county median gross income for households of the same size.
- At least 3% of the proposed dwelling units will be occupied or reserved for occupancy by households with a gross household income equal to or less than 60% of the county median gross income for households of the same size.
- The affordable units will be deed restricted for the full term of the HTRZ tax increment period of each development, which is anticipated to be 25 years, to ensure long-term affordability and compliance. The deed restrictions will clearly outline income eligibility, rent or purchase price limitations, and ongoing monitoring requirements to maintain affordability standards.

Improves Efficiencies in Parking and Transportation

- The Cairns HTRZ represents a transformational opportunity to create a vibrant, walkable, and connected urban core that prioritizes place-based development and transit-oriented living. Through strategic public investments enabled by the HTRZ, Sandy City will enhance the pedestrian and multimodal experience, promote First/Last Mile solutions, and deliver a cohesive urban environment that supports the city's long-term vision for smart growth and community vitality.
- A critical feature of the Cairns HTRZ proposal is the construction of a pedestrian bridge that will span I-15 and connect the Cairns District directly to the South Jordan FrontRunner Station. This essential infrastructure investment will significantly improve regional connectivity and allow residents, employees, and visitors to safely and efficiently access the regional commuter rail network without reliance on personal vehicles.
- This bridge not only addresses a key physical barrier to regional mobility, but it also serves as a catalyst for active transportation and First/Last Mile solutions. By enabling a seamless link between the station and the Cairns District, the bridge will integrate active transportation options—such as walking, biking, and e-scooters—into the daily lives of Cairns residents and commuters.

Improve Water Conservation and Air Quality

- Through its master planned design, the project mixes housing, retail establishments, entertainment venues, public transportation, public gathering spaces, and a major employment center into one cohesive community where residents don't need to rely on cars. Instead, residents can satisfy many of their daily needs through walking and other modes of transportation.
- According to the Institute of Transportation Engineers (ITE), mixed-use development leads to 20% internal capture. Meaning approximately 20% of vehicular trips are eliminated due to bringing uses (office, retail, residential) within walking distance of each other. By providing access to transit, and other modes of transportation, trips can further be reduced by an additional 9.5%. In sum, this project is designed to reduce nearly 30% of vehicular trips generated in a typical housing development.
- Per the Environmental Protection Agency, "High-density housing produces less runoff and less impervious cover than low-density development at all scales". Along with contributing to improved water quality, high-density development results in reduced water consumption per capita. This project will promote sustainability even further with planting of natural vegetation, the inclusion of street trees, and local sourcing of low carbon, durable, high-performance building materials that will stand the test of time.

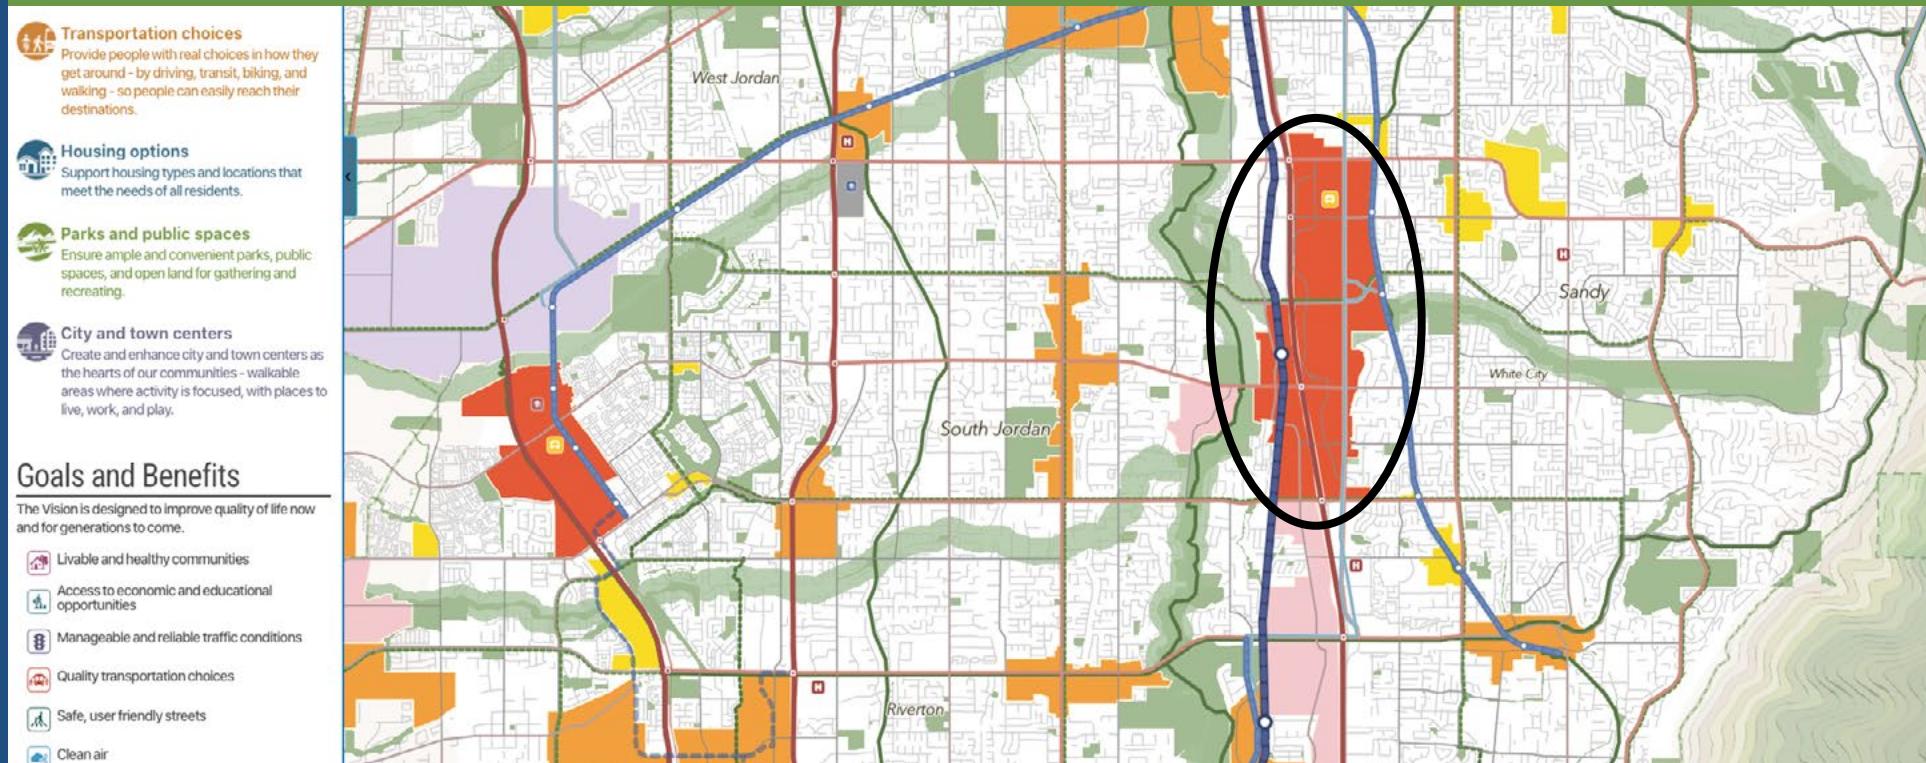

Encourages Transformative Mixed-Use Development and Collaborative Investment in Transit and Transportation

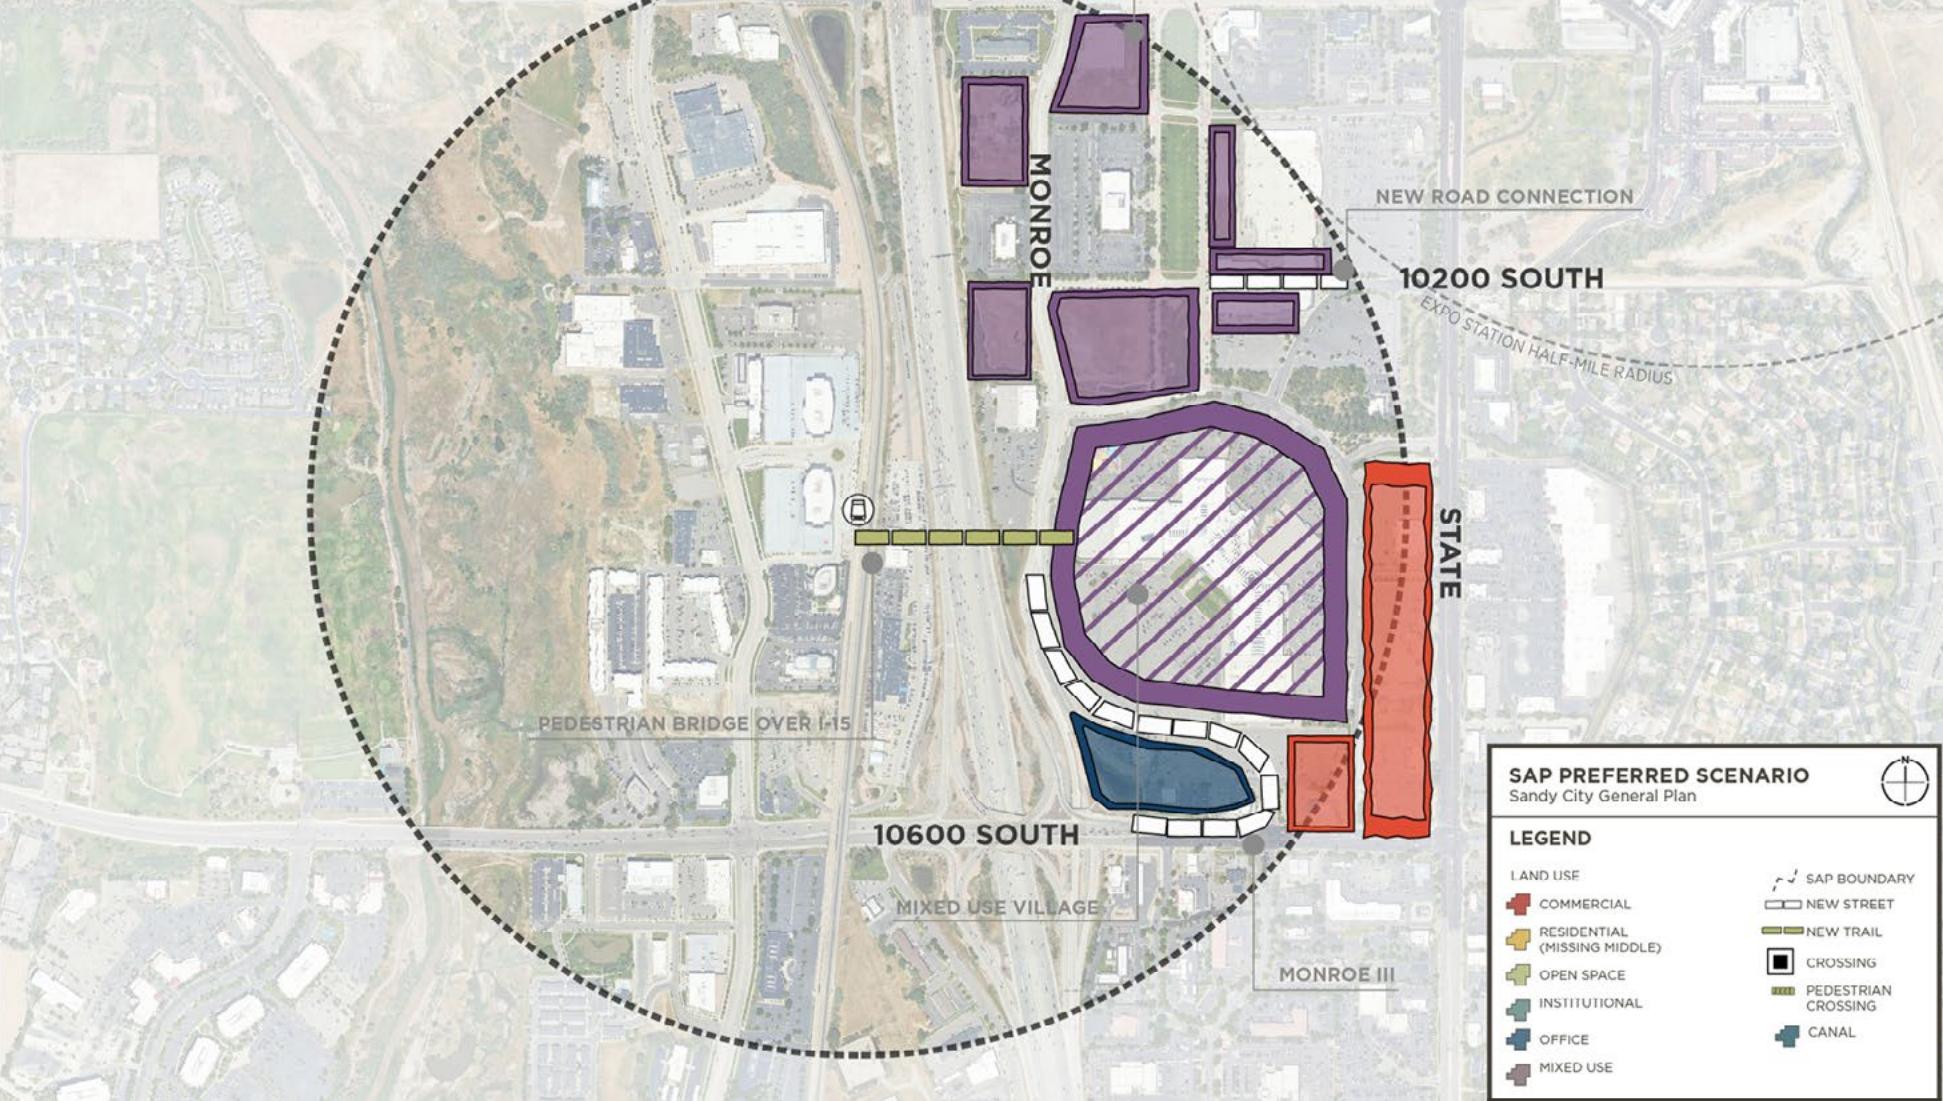

- The convergence of Interstate 15, Trax, and FrontRunner provides the Cairns Area with a clear and unique opportunity to create a highly efficient transit-oriented area.
- Sandy City recently adopted Station Area Plans for the South Jordan FrontRunner Station and the Sandy Civic Center Station which combines mixed-use development with seamless connectivity within the overall Cairns master plan.
- The entire development is oriented around access to transit, walkability, daily needs, unique restaurants, employment centers, entertainment venues, and usable open space.

Maximizes Planning And Economic Development Tools To Strengthen And Grow Major Transit Corridors

- The Cairns is identified as an “Urban Center” in the Wasatch Front Regional Council’s Wasatch Choice 2050 Plan. Urban Centers are described as mid-to high-density, pedestrian, bicycle, transit friendly, and inclusive of mixed-use development. These centers boast diverse populations and extensive employment opportunities.
- Intermodal transportation options within The Cairns will ensure that residents, workers, and visitors have convenient access to retail, entertainment, and employment.
- The Cairns, with assistance from HTRZ funding has been strategically planned by the city to capture the vision of a true Urban Center, as outlined in the Wasatch Choice 2050 Plan. Including high density, multi-modal transport friendly, and access to extensive employment and entertainment opportunities.

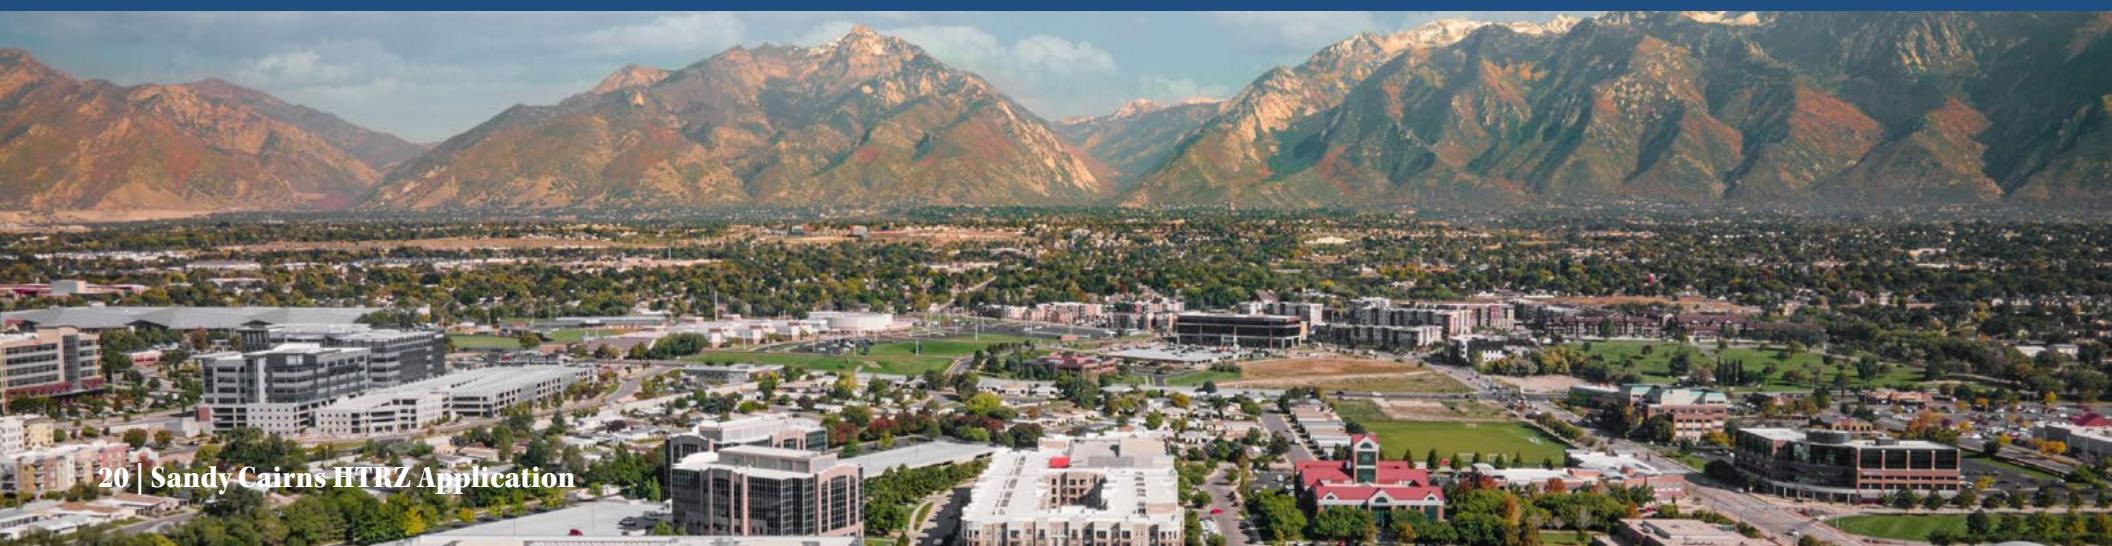

South Jordan FrontRunner Station Area Plan (Sandy Portion)

- The Cairns HTRZ directly supports the vision and implementation of the goals outlined in the recently adopted Sandy General Plan, particularly the South Jordan FrontRunner Station Area Plan. Key elements of the Station Area Plan, including multimodal connectivity, pedestrian-first design, housing diversity, and public realm enhancements are all central to the Cairns HTRZ framework. The proposed pedestrian bridge and associated infrastructure investments will assist with actualizing the connectivity goals articulated in the State Area Plan.

Increases Access to Employment, Educational Opportunities, and Childcare

- One of the most unique attributes of this project is the ability to bring housing, along with affordable housing, to a major entertainment and employment center in southern Salt Lake County. Sandy City boasts headquarter locations Morgan Stanley, American Express, Galileo, Bridge Investment Group, AvidXchange, Utah Hockey Club and Mountain America. These employers, and countless more, can be accessed by either a short walk, a brief bike ride, or a quick trip in a UTA bus.
- University of Utah's Sandy Center is located directly adjacent to the northeast edge of the HTRZ. This campus offers in-person classes, hybrid classes, continuing education courses, and numerous non-degree classes. Additionally, the Sandy Center participates in the Return to the U Program, which helps students with college experience but no degree return to successfully complete a Bachelor's Degree.
- Grand Canyon University's Accelerated Nursing Program is located 0.2 miles north of the HTRZ in the South Towne Corporate Center. This program combines online coursework, on-site skills labs and clinical rotations all designed to prepare nurses to graduate and take the nurse licensure exam in as few as 16 months.
- Sandy has identified a need for more childcare facilities in the city, and tax increment generated from the HTRZ could incentivize their inclusion in the Cairns District. Additionally, the future pedestrian bridge and improved First/Last Mile connections will provide families with safer and more convenient access to childcare facilities located within close proximity to the Cairns District. By situating childcare facilities near residential areas, workplaces, and transit hubs, parents will be able to combine childcare drop-off and commuting in one streamlined trip—reducing travel time and improving work-life balance. This improved accessibility to childcare aligns with Sandy City's vision of fostering a family-friendly urban core, while supporting working families who rely on convenient, reliable childcare options.

Southern Salt Lake County is currently experiencing massive growth. The Cairns District is home to major companies, including Morgan Stanley, Galileo, Bridge Investment, American Express, Mountain America, and the Utah Hockey Club. The Cairns HTRZ will become a catalyst for creating a sense of community to the new residents, employees, and visitors. The plan will lead to over \$500 million of private capital being invested into the community.

- Kasey Dunlavy
Economic Development Director, Sandy City

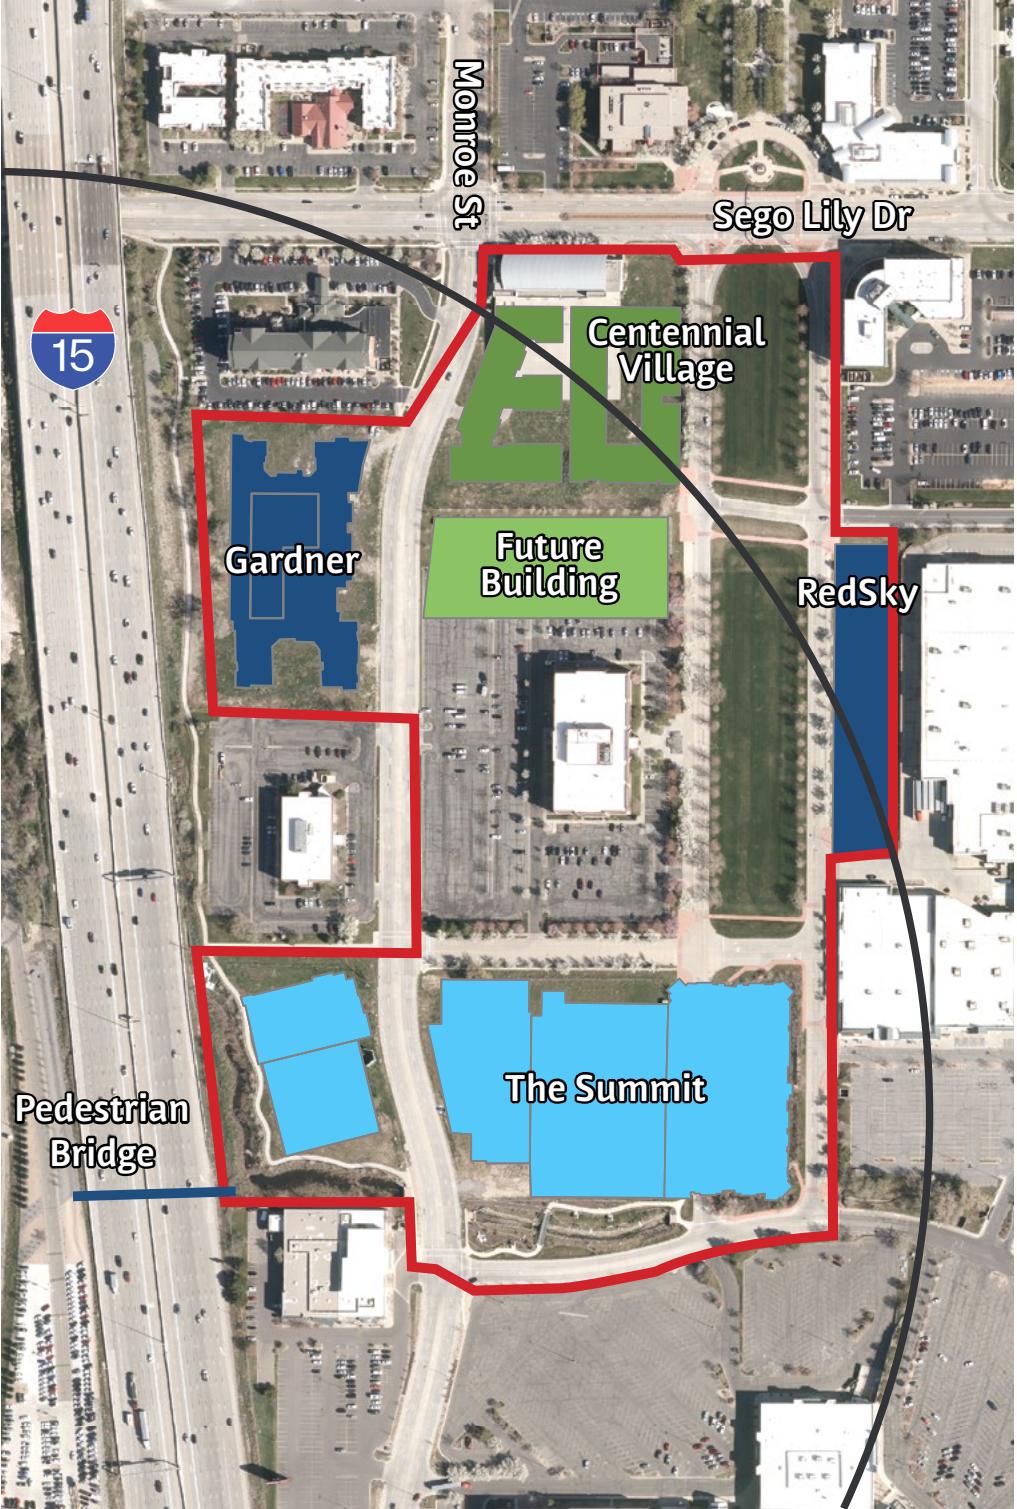

Land use comparison

- Market Plan – 750 residential units, lower density, surface parking
 - Type V-B Construction – 3-4 Stories, Surface/Wrapped Parking
 - Maximum density – 30 units/acre
 - Higher multifamily parking ratios – 2.0 stalls/unit
 - Not enough residential units to attract grocers or unique retail establishments
 - No sense of community due to lack of placemaking features
 - No office or hotel development
- HTRZ Plan – 1,480 residential units, high density, all structured parking
 - Type V-A Construction – 5-6 Stories, Centralized Parking Structure
 - Average density of 60 units/acre
 - Reduced multifamily parking ratios – 1.0-1.5 stalls/unit
 - Implementation of internal traffic calming features to put the pedestrian first and promote walkability
 - Inclusion of placemaking strategies to create a sense of community and vibrancy
 - Mixed-uses to create a true live, work, play environment through walkability and connectivity
 - Able to attract more diverse retail establishments and grocers

Impediments

- The HTRZ tool was created to promote the right type of vertical development at transit stations along the Wasatch Front. Without HTRZ, transit stations will be underbuilt and impaired for decades to come. By utilizing HTRZ, transit-oriented developments can take full advantage of the billions of dollars invested in FrontRunner and can also minimize the future environmental impacts of growth.
- The Cairns HTRZ is envisioned as a walkable, compact, and human-scaled environment. With approved HTRZ funds, Sandy will unlock a financing mechanism that directly supports infrastructure critical to this vision: pedestrian streetscapes, bike lanes, public plazas, trails, and transit connections. These investments will make walking not only possible but preferable, enhancing quality of life and reducing dependency on cars.
- The HTRZ will also incentivize the development of mixed-use, mixed-income housing adjacent to high-capacity transit, creating a truly transit-oriented neighborhood. By clustering new development within a walkable radius of FrontRunner, Sandy can provide housing choices that support sustainability, affordability, and access to opportunity.
- The development team is prepared to make a substantial investment around the South Jordan FrontRunner station. However, there are several impediments that without HTRZ, make this investment unfeasible:
 - Current market rents combined with substantially increased construction costs for buildings 5-stories or higher
 - Costs for structured parking compared to surface parking
 - Development enhancements
 - Affordable Housing

Incremental Costs of High Density Multifamily

The valuation analysis below highlights the HTRZ funding needed to offset the additional cost of densifying around the South Jordan Station. This is the gap between low-density residential development (30 du/ac) and high-density residential development (75 du/ac).

5-Story Type V Wrap Construction	Per Unit	Per RSF	Total
Construction Costs	216,013	250	64,803,750
Structured Parking Costs	59,675	69	17,902,500
Soft Costs	44,237	51	13,271,069
Land Costs	13,358	15	4,007,520
Total Costs	\$333,283	\$386	\$99,984,839
Less: HTRZ TIF Incentive Needed to Match Market	\$69,599	\$81	\$20,879,723
Costs for 3-Story Surface Parked Project	\$263,684	\$305	\$79,105,115
Ration of Incentive to Total Costs			20.9%

Affordable Housing Analysis

- This affordable housing analysis quantifies the loss in value from reduced rents for the 80% and 60% AMI units.
- This analysis looks at a typical 300-unit phase and factors for 9% of the units at 80% AMI (27) and 3% of the units at 60% AMI (9). Utilities are assumed to be \$300/month and are included in the rent.
- In a typical 300-unit phase, the 36 affordable units reduce stabilized NOI by \$85,212 annually. When a 5.00% capitalization rate is applied, this NOI loss results in a loss of value of \$1,704,240 or \$47,340 per affordable unit.
- The total project will provide 133 units at 80% AMI and 45 units at 60% AMI.
- All affordable units will be spread throughout the project and will be located in the same buildings, with the same amenities and floor plans as the market rate units.

Affordable Rent Calculation							
Unit Type	Size (SF)	Unit Mix%	Market Rent	80% AMI Rent	Difference vs. Market	60% AMI Rent	Difference vs. Market
Studio	550	10%	1,320	1,318	(3)	963	(357)
One-Bed	715	52%	1,561	1,549	(12)	1,137	(424)
Two-Bed	1,125	35%	1,842	1,780	(62)	1,310	(532)
Three-Bed	1,450	3%	2,140	2,010	(130)	1,483	(657)

Loss per Unit from Reduced Rents							
Unit Type by Income Limit	Average Size (SF)	Average Weighted Rent	Utility Cost	Rent Less Utilities	Lost rent Unit/Month	Unit Mix	Unit Count
Average Market Rate Unit	815	1,609	-	88%	264	-	264
Average 80% AMI Unit	815	1,526	(83)	9%	27	(26,892)	27
Average 60% AMI Unit	815	1,069	(540)	3%	9	(58,320)	9

Loss in Value from Reduced Rents						
Cap Rate	NOI at Market Rent	Value	NOI w/ AMI Units	Value	Variance from Market	Loss Per Unit
4.50%	4,749,605	105,546,778	4,664,393	103,653,178	(1,893,600)	(52,600)

HTRZ Enhanced Office Development

This pro forma represents an increase in density from 0.50 to 2.02 floor area ratio by including a parking structure. Mixing uses such as office and residential increases affordability, allows for cross-parking, and promotes walkability while taking vehicles off the road and contributing to improved air quality. But for HTRZ, this type of dense development would not be possible.

Incremental Costs of High-Density Office Development

The valuation analysis below highlights the HTRZ funding needed to offset the additional cost of densifying around the South Jordan FrontRunner Station. This is the gap between low-density office development (0.50 FAR) and high-density office development (2.02 FAR).

Higher Density Office Development with Structured Parking	Per RSF	Total
Construction Costs	257.78	41,760,000
Structured Parking Costs	140.00	22,680,000
Soft Costs	69.73	11,295,514
Land Costs	12.65	2,049,505
Total Costs	\$480	\$77,785,019
Total Costs	\$502	\$76,807,178
Less: HTRZ TIF Incentive	\$96	\$15,509,905
Costs for Lower Density Surface Parked Office	\$384	\$62,275,114
Ratio of Incentive to Total Costs		19.9%

Projected Total Gap for the HTRZ Development Plan

Projected Total Gap for the HTRZ	
Total Units in HTRZ with Type V Wrap (Structured Parking)	1,480
x TIF Needed to Make Equivalent to Market Driven Development (per unit)	\$69,599
= Minimum Amount of TIF for High Density Multi-Family Development	\$103,006,635
Residential Units Inside of HTRZ	1,480
Units at 80% of AMI	133
Units at 60% of AMI	44
Total Affordable Units	178
x Value Loss per Unit	\$47,340
= Minimum Amount of TIF Needed to Offset Loss in Value due to Reduced Rents	\$8,407,584
Total Office Square Footage in HTRZ w/Structured Parking	257,500
x TIF Needed to Make Equivalent to Market Driven Development (per square foot)	\$86
= Minimum Amount of TIF for High Density Office Development	\$22,187,781
Combined Total	\$133,602,000
