

Alta Canyon Sports Feasibility Analysis – EXECUTIVE SUMMARY September 2021

PRELIMINARY

AECOM Economics

Delivering a better world

aecom.com

Project Overview

AECOM was retained by the City of Sandy, a Utah municipality, in March 2021 to conduct a feasibility analysis for a proposed updated ACSC.

Phase 1: Initial Planning

- Gather historic operating information for the existing ACSC, including programming, fee structures, financial operating statements, participation trends, and other relevant information to establish a baseline for the proposed updated facility
- Assess the local market's current and potential future demand and capacity to attract patrons to the proposed updated ACSC
- Compare the Sandy market to selected peer and benchmark markets to assess the Sandy market's position among these markets

Phase 2: Market Demand Analysis

• Develop estimates of demand and utilization for the proposed improvements to the ACSC (possibly including, but not limited to a new multipurpose gymnasium space, a walking track, teenager activity space, and childcare / after school program space)

Phase 3: Financial Analysis

· Develop a detailed financial model for each recommended configuration

Phase 4: Site Analysis & Conceptual Plan

August 2021

• Develop a preliminary, conceptual plan for the proposed improvements to the ACSC that reflects the market demand and program recommendations outlined in Phase 2

Phase 5: Construction Cost Estimate & Return on Investment Analysis

 Develop a preliminary construction cost estimate for the conceptual plans identified in Phase 4 and assess return on investment potential for each

Page 2

↔ aecom.com

Historic & Existing Operations Review – Introduction

Located in Sandy, UT, the Alta Canyon Sports Center (ACSC) originally opened in 1984. No major improvements have been completed at the center since. Two major expansion / renovation plans were drafted over the years, but neither were fully implemented.

Sandy City administration has hosted a series of town hall meetings and gathered public input about the future of the sports center. The administration has identified the center's continuing weaknesses of 1) lack of space and 2) undersupply of amenities, as well as the 3) aging infrastructure of the facility.

During the community outreach and surveys conducted, patrons identified key reasons why they visit ACSC. The following were top PRELIMINARY ranking components and facility strengths recognized:

- Pool
- Weight room
- Fitness classes
- Cardio equipment
- Racquetball

DRAFT

August 2021

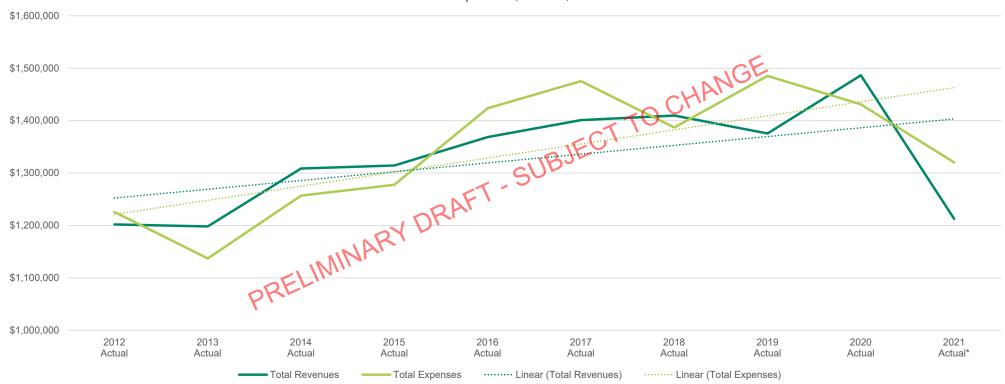

Existing Operations – Key Survey Result Quotes

Strengths	Weaknesses
"The pool and baseball fields are nice"	<i>"We live close to the facility and previously went there, but the facilities were terrible, so now we pay more to go to Cottonwood"</i>
<i>"We love the pool. It has been a fun place for our family to go in the summers. We have also taken swim lessons there every year for seven years"</i>	"old, rundown, too far away from everything else, doesn't offer anything that County rec centers don't already offer"
"We use the racquetball courts most frequently; Alta is one of the few places that has them"	"We used the facility for years but due to the continually deteriorating equipment and unfilled promises to update and upgrade, we gave up"
"Pool, fitness classes, drop-in childcare"	Stwould use the gym and a pickleball court if the gym were better and if there were courts. I would also use an indoor pool"
"Gym, swimming pool, before and after school programs, summer camps"	<i>"I only use the pool. Some of the workout rooms are too small and claustrophobic for me"</i>
"Pool, cardio, weights, and I used to use the preschool and childcare so I could exercise"	<i>"…the workout room is small, old, and outdated. I live close enough to walk, but would rather pay and drive to Dimple Dell for better amenities"</i>
"Aerobic classes, aqua classes, pool and locker rooms, surrounding park areas"	<i>"I rarely go anymore because the facility is small and not open feeling"</i>
"Pool, summer camp, before / after school care, exercise and lift equipment"	"Despite living close to Alta Canyon, we ended up with a membership to Cottonwood Heights because of the swim team program, but we love the facility, pools, and classes there and would love to see something similar at Alta Canyon"

Historic & Existing Operations Review – Revenues & Expenses Change

Revenues & Expenses, ACSC, 2012 - 2021

NOTE: 2020 and 2021 revenues include general fund transfers of \$285,000 and \$150,000, respectively, to accommodate shortfalls in operating revenues due to the COVID-19 pandemic

Page 5

*The revenues and expenses for FY 2021 are unaudited and are subject to change.

DRAFT

August 2021

Historic & Existing Operations Review – Memberships

Total membership has generally decreased over recent years, ranging from a low of 1,301 members in 2020 to a peak of 2,138 in 2016. Average annual membership was approximately 1,890 members from 2013 to 2020.

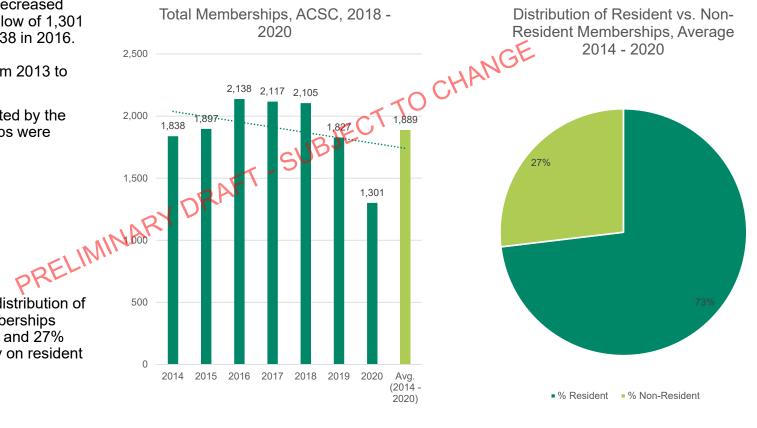

In 2021, which was heavily impacted by the COVID-19 pandemic, memberships were down to 520.

Typically, the largest proportion of membership types are:

- 1. Annual family
- 2. Summer family
- 3. Monthly pass

From 2014 to 2020, the average distribution of resident versus nonresident memberships was approximately 73% residents and 27% nonresidents; ACSC relies heavily on resident utilization.

1/ Information as of Thursday March 26, 2021.
 2/ Summer passes are Memorial Day to Labor Day.

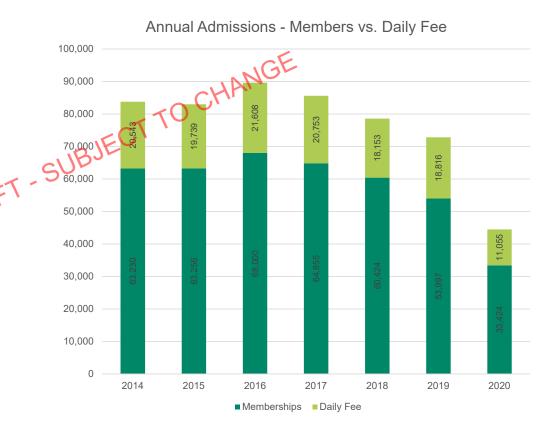

DRAFT

August 2021

Historic & Existing Operations Review – Admissions

- Total annual admissions have followed the _ general membership trends, with a high in 2016 of just under 90,000 admissions
- Since 2016, annual admissions have _ decreased each year by approximately 5,000 per year, to approximately 73,000 in 2019
- 2020 admissions reflect the impact of _
- relatively consistent, comprising approximately 24 percent to 25 percent of total admissions annually approximately 24 percent to 25 percent of total admissions annually _

Page 7

DRAFT

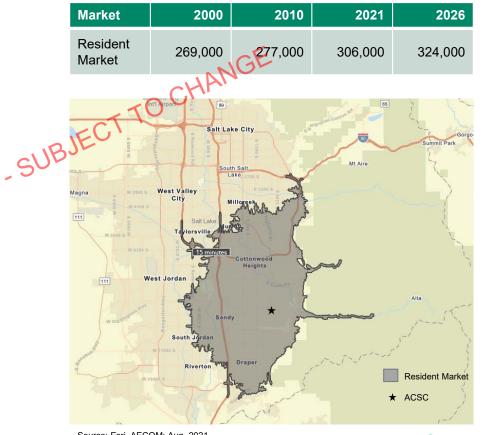

Resident Market – Population

For the purpose of this report, AECOM has defined the total resident market as the population within a 0-to-15-minute drive time towards ACSC. Boundaries of this area are seen in the map at right.

Based on data provided by Esri, the resident market has grown at a steady rate over recent years, with an increase of approximately 37,000 persons between 2000 and 2021, a compound annual growth rate (CAGR) of 0.6 percent. In 2021, there were 306,000 residents.

Esri forecasts that the total resident market population will continue to grow, reaching approximately 324,000 persons in 2026, equal to an additional 18,000 persons over the 2020 population and a CAGR from 2021 to 2026 of 1.1 percent.

It is understood that Highland Drive is planned to be extended – the corridor from 9400 South to the Sandy/Draper border potentially expanding the resident market population for ACSC due to better transit. Sandy City most recently mentioned that construction for this project will not start likely until 2030. For the purpose of this analysis, AECOM has not taken this infrastructure improvement into consideration.

Resident Market – Sports Participation

Across most metrics reviewed at right, the ACSC resident market had the largest percentage of participation compared to the other geographies reviewed.

The ACSC resident market had notably high participation in:

- Ice skating
- Pilates
- Swimming
- Walking
- Yoga

The only metrics that were lower for ACSC than another geography were:

- Participated in basketball in last 12 months. ACSC resident market was 8.4% versus the high of 8.7% in SLC MSA
- Participated in jogging / running in last 12 months. ACSC resident market (12.7%) was slightly lower than in SLC MSA (12.9%)
- Participated in Zumba in last 12 months. ACSC resident market (3.5%) versus high of 3.8% in SLC MSA

Regional Recreation Centers

AECOM reviewed a collection of regional recreation centers to gain a greater understanding of what similar properties currently exist in the market. Specific attention was given to what types of amenities are available and any recent renovations completed at these properties.

Recreation Center	City	Year Opened	Est. Total Building Area (sqft)	Distance from ACSC
Orem Family Fitness Center	Orem		135,000	30 miles / 35 min. drive
Cottonwood Heights Recreation Center	Cottonwood Heights	1971 2013 - SUBJECT	160,000	4 miles / 11 min. drive
Provo Recreation Center	Provo	2013 - 50	160,000	36 miles / 40 min. drive
The Park Center	Murray	2002	65,000	8 miles / 19 min. drive

Primary Market Recreation Centers Overlap

For the purpose of this analysis, AECOM has identified that the primary market supporting recreation centers in the region is within a 0-to-15minute drive time area.

As seen in the map at right, the recreation centers located within ACSC's resident market include:

- **Dimple Dell Recreation Center** _
- **Cottonwood Heights Recreation Center** _
- Holladay Lions Recreation Center _
- The Park Center
- **Draper Recreation Center** _

Primary Market Recreation Centers – Amenity Popularity

Out of the five recreation centers reviewed within ACSC's resident market, the following amenities were found at all five properties:

- Indoor pool(s), of which ACSC does not have _
- Gym(s) _
- Fitness studio(s)
- Multipurpose room(s) _
- Childcare services

Four out of the five recreation centers had the below, of which ACSOF does not have any:
Basketball court(s)
Pickleball court(s)
Indoor track

In terms of less popular amenities identified at the five centers within ACSC's resident market area:

- ACSC and Cottonwood Heights are the only centers with racquetball courts
- Dimple Dell has badminton courts _
- ACSC and Holladay Lions have a baseball / softball facility
- ACSC and Cottonwood Heights are the only centers with tennis courts (outdoor courts)
- Draper has a fieldhouse onsite and thus can offer indoor field sports such as soccer
- Cottonwood Heights has the only indoor ice rink _
- Cottonwood Heights has the only spa _
- Draper has batting cages
- Dimple Dell has a climbing wall
- The Park Center has a game room

Regional Recreation Centers – Estimated Market Penetration

Compared to the other regional recreation centers reviewed, ACSC has few members and substantially lower attendance per year.

Estimated membership penetration for ACSC is in line with Draper's and slightly lower than both The Park Center and Holladay Lions, however, it is substantially lower than the average (4.0%) and median (3.2%) of the group.

Estimated attendance penetration for ACSC is substantially lower than all other reviewed facilities, at 23.8%. The average is approximately 223.4% and median is 104.5% for the group.

		Est. Visits per Year	Est. Res. Mkt. Size	Membership Mkt.	Attendance Mkt.

August 2021

Stakeholder Interviews – Sandy City Council

Goals of ACSC Renovation Effort	Key Council "Success" Factors	Amenities to Consider	Benchmark / Aspirational Facilities
Provide asset that draws from entire City, across all demographics	Expand draw area across entire City	Heavy demand for pickleball in area	Cottonwood Heights Recreation Center (indoor pool, ice rink)
Provide community gathering space	Increase revenues, with goal of break-even operations	Need more indoor sports fadilities	Provo Recreation Center
Ensure facility is sustainable for future generations	Consider renovation vs. new construction	New/improved pool (consider indoor pool)	Murray Recreation Center
Provide new location for Parks and Recreation department offices	Leverage partners, donors and investors to support ACSC	Indoor tennis	Crestwood Recreation Center (community gathering place)
Modernize ACSC, lighten and brighten the space, "bring the outside inside"	Provide connectedness between physical and overall wellness	Indoor track (walking and running)	Dimple Dell Recreation Center
Focus on local users first; visitor	Serve all ages through all seasons	Multiple attractions "don't want to be a one-trick pony"	Holiday Lions Recreation Center
		Think "outside the box" (i.e., health clinic/classes, nature-based activities, computer lab/gaming area)	South Davis Recreation Center
			Oquirrh Recreation Center (unique funding/operations model)
DRAFT August 202	1 Page 15		ecom.com

Stakeholder Interviews – ACSC Board of Directors

Goals of ACSC Renovation Effort	How does Board define "Success?"	Amenities to Consider	Benchmark / Aspirational Facilities
Provide updated and expanded facility	Maintain break-even operations	Indoor track (recreational walking/jogging)	Bountiful / South Davis Recreation Center
Increase accessibility beyond existing base (expand classes, before and after school programming, etc.)	Maximize local utilization, visitors secondary	Pickleball and tennis facilities	Herriman Recreation Center (Salt Lake County facility)
Make facility family oriented with unique individual components and activities that appeal across generations	Expand revenue generating programming (childcare, summer camps)	Indoorpool (include waterpark features)	Provo Community Recreation center
Make facility more year-round, consider indoor pool and track (walking/jogging)	Become a place that members return to regularly	Indoor multi-purpose courts (basketball, volleyball, pickleball, etc.)	Draper Recreation Center
Consider expanding Special Service District to increase funding and support	PRELING	Expanded childcare space	
Increase gathering space, provide social rooms		Improved entrance/security/check-in space, improve overall flow of facility	
Provide more open feel, bring outside inside			

Stakeholder Interviews – Public Input Session

ACSC is a "hidden jewel" that needs to be developed and improved	Consider unique funding opportunities, understand funding mechanisms for regional facilities	Expand the tax base to entire City (multiple similar comments)	Future considerations, flexibility and adaptability are important going forward	People would be willing to pay higher fees for more offerings/amenities	Need basketball courts available for Gyouth leagues	Consider building new vs. renovation
Treat the ACSC and surrounding area as "sacred"	Increase fitness classes, expand weight room, spin room and fitness center	Needs to be a true community center	Have membership at other rec centers due to lack of amenities at ACSC; would consider returning to ACSC with renovation	Expand already successful childcare programming; programs need more space	Expand offerings for teenagers, provides foundation for healthy lifestyle as they grow older	Esports is growing and should be considered as offering
Facility should be available for everyone to enjoy	More windows, too dark inside, low ceilings, bad air conditioning	Consider covering pool for winter months to make year- round?	Pool and fitness classes are most important offerings	Outdoor lighted tennis/pickleball courts would be great	Indoor tennis is needed in the area	Expand operating hours
No commercial development (rumors about commercialization and high-density housing)	Keep the outdoor pool, views are best in the region	Pickleball in heavy demand	Improve security in parking lots, lighting important, safe drop- off areas	Offer outdoor classes	Indoor walking/jogging track	Create something new, something we don't have, unique to Sandy

DRAFT

August 2021

Survey Results – What is ACSC Missing?

Based on survey results from ACSC community outreach, the top amenities recognized as missing from / users would like to see at the facility included:

- Indoor pool
- Better weight room
- More courts (basketball and pickleball)
- More area / larger rooms
- Updated equipment
- Running / walking track

The amenities identified above present potential opportunities for improvement at the existing ACSC, which could help better align the facility with the competition in the region

estimation of the second state of the second s

Recommended Improvements

Based on the conducted analysis, in order to better the offering at ACSC, AECOM has identified a collection of recommended improvements at the facility. Provide the subject to change of the subject t

AECOM recommends:

Increasing the size of the fitness and weight areas, and generally upgrading the equipment

Page 19

- Adding basketball courts
- Adding pickleball courts _
- Adding outdoor tennis courts _
- Adding multipurpose / flex space for programming
- Adding designated space for teens and seniors
- Adding a unique, "out of the box", or "wow" component _
- Improving the childcare areas _
- Improving the office spaces

Although an indoor pool was repeatedly identified as a preferred improvement by users, based on the competition in the immediate market, the hefty cost associated, and talks with industry professionals regarding the cost basis of this construction, AECOM does not recommend enclosing the existing outdoor pool or adding an indoor pool at this time. AECOM suggests, however, to upgrade or renovate the existing pool support spaces and remove the spa / sauna, to be replaced with additional locker (gender-neutral) space.

DRAFT

August 2021

PRE

aecom.com

Recommendation – Unique Experience – Example: Stacked Aerial Course

AECOM also recommends some kind of added unique experience.

A stacked aerial course, also sometimes referred to as high ropes or vertical adventure course, is a modular climbing attraction.

- They are typically up to four levels tall
- They have a small footprint, approximately 1,000 to 10,000 square feet. Can be indoors or outdoors. Estimated at ACSC around 2,500 square feet
- The attraction capacity can reach up to 160 persons

Due to their flexible nature, these constructions can be easily extended; add-ons may include a course specific for kids, a giant swing, an abseiling station, zip lines, mini golf, and more.

This use type may work very well at ACSC given.

- The target market is large; there are climbing paths for both young and old
- Stacked aerial courses also offer event opportunities. They are often used for birthday party or corporate teambuilding rentals
- These attractions support health and wellness, adventure and thrill, and solution-based challenges

Snow Valley Aerial Park (Edmonton, CAN)

DRAFT

August 2021

Page 20

쥕 aecom.com

Recommendation – Unique Experience – Example: Surf Attraction

Another example of a unique experience is a surf attraction.

There are many types of small-scale surf attractions now available in the market. These attractions provide users with a customizable, engineered wave to surf or boogieboard on.

- They come in wide range of sizes, from compact to multi-user layouts
- They have a small footprint, approximately 1,000 to 1,700 square feet
- The attraction capacity can reach up to approximately 500 rides per hour

Given their standalone construction, these products can easily be positioned at an existing facility.

This use type may work very well at ACSC given:

- The target market is large; mainly targeted at children, teenagers, and young adults, but that could also be done by other adults
- Wave machines also offer event opportunities. They are often used for birthday party or community event showcases and rentals
- These attractions support health and wellness, adventure and thrill, and can be used as a training system

DRAFT

Page 27

August 2021

Pros:

- Two story linear entrance creates dynamic exterior presence with views to interior, including climbing feature
- Existing tennis courts remain in place, resurfaced and improved
- Potential pool enclosure can be fully integrated with new construction
- Existing pool equipment maintained with new locker and support spaces
- Minimal excavation required
- Office program segregated to second level with direct access from main lobby

Cons:

- Fill/retaining wall required at west near loading dock
- Pool accessible only through building, no exterior access

General Limiting Conditions

AECOM devoted effort consistent with (i) the level of diligence ordinarily exercised by competent professionals practicing in the area under the same or similar circumstances, and (ii) the time and budget available for its work, to ensure that the data contained in this report is accurate as of the date of its preparation. This study is based on estimates, assumptions and other information developed by AECOM from its independent research effort, general knowledge of the industry, and information provided by and consultations with the client and the client's representatives. No responsibility is assumed for inaccuracies in reporting by the Client, the Client's agents and representatives, or any third-party data source used in preparing or presenting this study. AECOM assumes no duty to update the information contained herein unless it is separately retained to do so pursuant to a written agreement signed by AECOM and the Client.

AECOM's findings represent its professional judgment. Neither AECOM nor its parent corporation, nor their respective affiliates, makes any warranty, expressed or implied, with respect to any information or methods disclosed in this document. Any recipient of this document other than the Client, by their acceptance or use of this document, releases AECOM, its parent corporation, and its and their affiliates from any liability for direct, indirect, consequential or special loss or damage whether arising in contract, warranty (express or implied), tort or otherwise, and irrespective of fault, negligence and strict liability.

This report may not to be used in conjunction with any public or private offering of securities, debt, equity, or other similar purpose where it may be relied upon to any degree by any person other than the Client. This study may not be used for purposes other than those for which it was prepared or for which prior written consent has been obtained from AECOM.

Possession of this study does not carry with it the right of publication or the right to use the name of "AECOM" in any manner without the prior written consent of AECOM. No party may abstract, excerpt or summarize this report without the prior written consent of AECOM. AECOM has served solely in the capacity of consultant and has not rendered any expert opinions in connection with the subject matter hereof. Any changes made to the study, or any use of the study not specifically identified in the agreement between the Client and AECOM or otherwise expressly approved in writing by AECOM, shall be at the sole risk of the party making such changes or adopting such use.

This document was prepared solely for the use by the Client. No party may rely on this report except the Client or a party so authorized by AECOM in writing (including, without limitation, in the form of a reliance letter). Any party who is entitled to rely on this document may do so only on the document in its entirety and not on any excerpt or summary. Entitlement to rely upon this document is conditioned upon the entitled party accepting full responsibility and not holding AECOM liable in any way for any impacts on the forecasts or the earnings from (project name) resulting from changes in "external" factors such as changes in government policy, in the pricing of commodities and materials, price levels generally, competitive alternatives to the project, the behavior of consumers or competitors and changes in the owners' policies affecting the operation of their projects.

This document may include "forward-looking statements". These statements relate to AECOM's expectations, beliefs, intentions or strategies regarding the future. These statements may be identified by the use of words like "anticipate," "believe," "estimate," "expect," "intend," "may," "plan," "project," "will," "should," "seek," and similar expressions. The forward-looking statements reflect AECOM's views and assumptions with respect to future events as of the date of this study and are subject to future economic conditions, and other risks and uncertainties. Actual and future results and trends could differ materially from those set forth in such statements due to various factors, including, without limitation, those discussed in this study. These factors are beyond AECOM's ability to control or predict. Accordingly, AECOM makes no warranty or representation that any of the projected values or results contained in this study will actually be achieved.

This study is qualified in its entirety by, and should be considered in light of, these limitations, conditions and considerations.

Feasibility Analysis

Delivering a better world

즑 aecom.com

Project Overview

AECOM was retained by the City of Sandy, a Utah municipality, in March 2021 to conduct a feasibility analysis for a proposed updated ACSC.

Phase 1: Initial Planning

- Gather historic operating information for the existing ACSC, including programming, fee structures, financial operating statements, participation trends, and other relevant information to establish a baseline for the proposed updated facility
- Assess the local market's current and potential future demand and capacity to attract patrons to the proposed updated ACSC
- Compare the Sandy market to selected peer and benchmark markets to assess the Sandy market's position among these markets

Phase 2: Market Demand Analysis

• Develop estimates of demand and utilization for the proposed improvements to the ACSC (possibly including, but not limited to a new multipurpose gymnasium space, a walking track, teenager activity space, and childcare / after school program space)

Phase 3: Financial Analysis

· Develop a detailed financial model for each recommended configuration

Phase 4: Site Analysis & Conceptual Plan

August 2021

 Develop a preliminary, conceptual plan for the proposed improvements to the ACSC that reflects the market demand and program recommendations outlined in Phase 2

Phase 5: Construction Cost Estimate & Return on Investment Analysis

 Develop a preliminary construction cost estimate for the conceptual plans identified in Phase 4 and assess return on investment potential for each

Project Background

The following report utilizes AECOM's proprietary processes to provide Sandy City with an honest, unbiased evaluation of the existing Alta Canyon Sports Center (ACSC) and the potential for renovation, expansion, and/or replacement.

This analysis includes an actionable plan with which the City can move forward and enhance sports and recreation opportunities for the City's residents.

Additional supporting reference details and data are included in the Appendix of this report.

August 2021

Phase 1: 70 CHAR Initial Planning

PELMINAIta Canyon Sports Center

Feasibility Analysis

Delivering a better world

즑 aecom.com

Initial Planning – Introduction

In this section, AECOM first reviews the current facility, programming, and finances at ACSC, including historical trends.

Next, AECOM reviews the local market, identifying historic, current, and projected demographic and socioeconomic trends and characteristics.

This is followed by an assessment of the existing inventory of sports and recreation facilities in the greater Sandy market area, including public and private indoor and outdoor sports complexes and recreation centers.

Then, AECOM summarizes inventory of comparable selected sports and recreation centers and compares these to the Sandy market to help identify potential gaps in terms of sports and recreation facility offerings.

Historic & Existing Operations Review

Alta Canyon Sports Center

RELIMINA

Feasibility Analysis

Delivering a better world

Historic & Existing Operations Review – Introduction

Located in Sandy, UT, the Alta Canyon Sports Center (ACSC) originally opened in 1984. No major improvements have been completed at the center since. Two major expansion / renovation plans were drafted over the years, but neither were fully implemented.

Sandy City administration has hosted a series of town hall meetings and gathered public input about the future of the sports center. The administration has identified the center's continuing weaknesses of 1) lack of space and 2) undersupply of amenities, as well as the 3) aging infrastructure of the facility.

During the community outreach and surveys conducted, patrons identified key reasons why they visit ACSC. The following were top PRELIMINARY ranking components and facility strengths recognized:

- Pool
- Weight room
- Fitness classes
- Cardio equipment
- Racquetball

DRAFT

August 2021

Existing Operations – Key Survey Result Quotes

Strengths	Weaknesses
"The pool and baseball fields are nice"	<i>"We live close to the facility and previously went there, but the facilities were terrible, so now we pay more to go to Cottonwood"</i>
<i>"We love the pool. It has been a fun place for our family to go in the summers. We have also taken swim lessons there every year for seven years"</i>	"old, rundown, too far away from everything else, doesn't offer anything that County rec centers don't already offer"
"We use the racquetball courts most frequently; Alta is one of the few places that has them"	"We used the facility for years but due to the continually deteriorating equipment and unfilled promises to update and upgrade, we gave up"
"Pool, fitness classes, drop-in childcare"	Should use the gym and a pickleball court if the gym were better and if there were courts. I would also use an indoor pool"
"Gym, swimming pool, before and after school programs, summer camps"	<i>"I only use the pool. Some of the workout rooms are too small and claustrophobic for me"</i>
"Pool, cardio, weights, and I used to use the preschool and childcare so I could exercise"	<i>"…the workout room is small, old, and outdated. I live close enough to walk, but would rather pay and drive to Dimple Dell for better amenities"</i>
"Aerobic classes, aqua classes, pool and locker rooms, surrounding park areas"	<i>"I rarely go anymore because the facility is small and not open feeling"</i>
"Pool, summer camp, before / after school care, exercise and lift equipment"	"Despite living close to Alta Canyon, we ended up with a membership to Cottonwood Heights because of the swim team program, but we love the facility, pools, and classes there and would love to see something similar at Alta Canyon"

Historic & Existing Operations Review – Financial Summary

Page 43

From 2012 to 2021, total revenues ranged from approximately \$1.2 to \$1.5 million, with an average of \$1.3 million. Revenues generally increased over this timeframe, but only slightly.

Over the past ten years, total expenses ranged from approximately \$1.1 to \$1.5 million, with an average of \$1.3 million. Expenses also generally increased during this duration.

In 2019 (before the COVID-19 pandemic), the estimated operational expense per square fort at AeSC was approximately \$62 (using an existing building area of 24,000 square feet).

Historic & Existing Operations Review – Memberships

Total membership has generally decreased over recent years, ranging from a low of 1,301 members in 2020 to a peak of 2,138 in 2016. Average annual membership was approximately 1,890 members from 2013 to 2020.

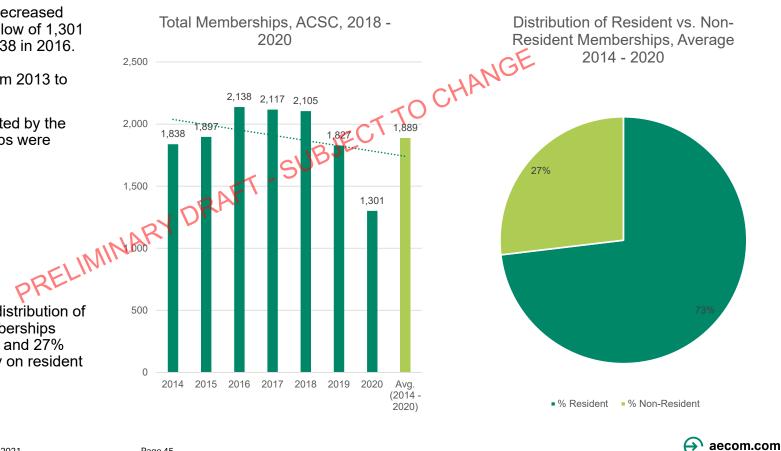

In 2021, which was heavily impacted by the COVID-19 pandemic, memberships were down to 520.

Typically, the largest proportion of membership types are:

- 1. Annual family
- 2. Summer family
- 3. Monthly pass

From 2014 to 2020, the average distribution of resident versus nonresident memberships was approximately 73% residents and 27% nonresidents; ACSC relies heavily on resident utilization.

Information as of Thursday March 26, 2021.
 Summer passes are Memorial Day to Labor Day.

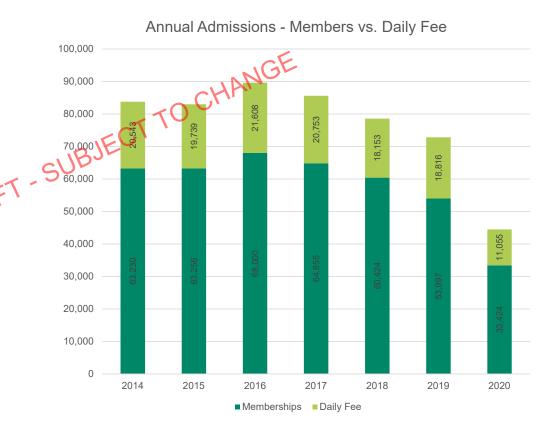

DRAFT

August 2021

Historic & Existing Operations Review – Admissions

- Total annual admissions have followed the _ general membership trends, with a high in 2016 of just under 90,000 admissions
- Since 2016, annual admissions have _ decreased each year by approximately 5,000 per year, to approximately 73,000 in 2019
- 2020 admissions reflect the impact of _
- relatively consistent, comprising approximately 24 percent to 25 percent of total admissions annually approximately 24 percent of total admissions annually _

Historic & Existing Operations Review – Key Takeaways

Alta Canyon Sports Center has a longstanding history in the market and has a well-established user base. However, over the years, due to lack of reinvestment and increased competition in the market, membership and daily user volumes, as well as revenue have substantially decreased.

The facility has many strengths, notably including the outdoor pool and availability of childcare. It provides users with many workout options (classes, weight room, aquatics, etc.). However, in order to keep up with market demand and changing user preferences, reinvestment is essential.

AECOM

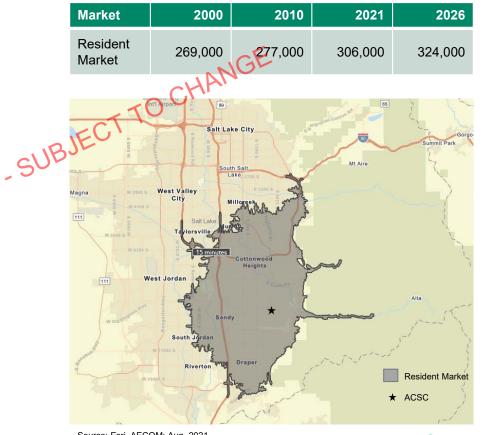

Resident Market – Population

For the purpose of this report, AECOM has defined the total resident market as the population within a 0-to-15-minute drive time towards ACSC. Boundaries of this area are seen in the map at right.

Based on data provided by Esri, the resident market has grown at a steady rate over recent years, with an increase of approximately 37,000 persons between 2000 and 2021, a compound annual growth rate (CAGR) of 0.6 percent. In 2021, there were 306,000 residents.

Esri forecasts that the total resident market population will continue to grow, reaching approximately 324,000 persons in 2026, equal to an additional 18,000 persons over the 2020 population and a CAGR from 2021 to 2026 of 1.1 percent.

It is understood that Highland Drive is planned to be extended – the corridor from 9400 South to the Sandy/Draper border potentially expanding the resident market population for ACSC due to better transit. Sandy City most recently mentioned that construction for this project will not start likely until 2030. For the purpose of this analysis, AECOM has not taken this infrastructure improvement into consideration.

Resident Market – Household Income

The resident market population has healthy household income levels.

Almost half of the resident market households (45%) have household incomes over \$100,000.

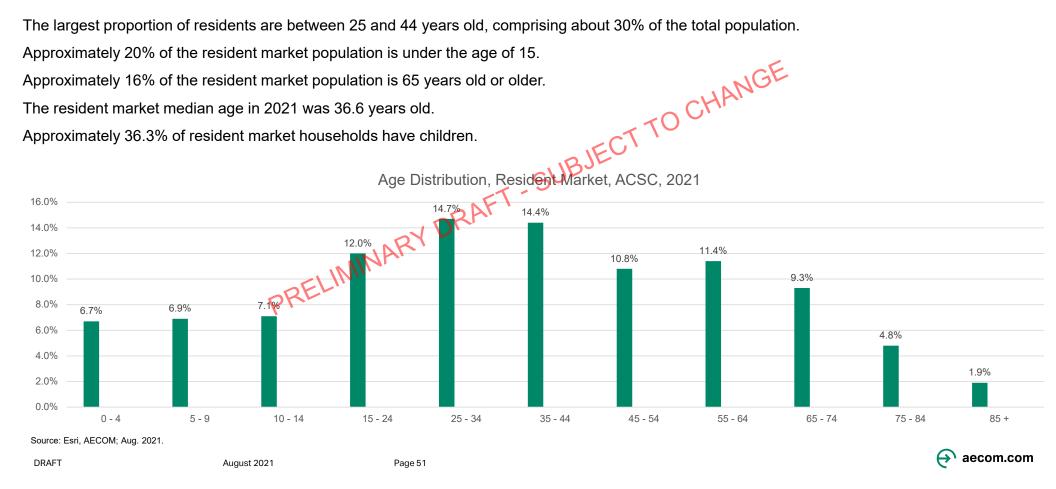

The 2021 resident market average household income was approximately \$114,000, with a median household income of approximately \$90,000. Both the resident market average and median household incomes are higher than in the Salt Lake City Metropolitan Statistical Area (SLC MSA), Utah, and the USA.

Primary Market Recreation Centers – Amenity Popularity

Out of the five recreation centers reviewed within ACSC's resident market, the following amenities were found at all five properties:

- Indoor pool(s), of which ACSC does not have _
- Gym(s) _
- Fitness studio(s)
- Multipurpose room(s) _
- Childcare services

Four out of the five recreation centers had the below, of which ACSOF does not have any:
Basketball court(s)
Pickleball court(s)
Indoor track

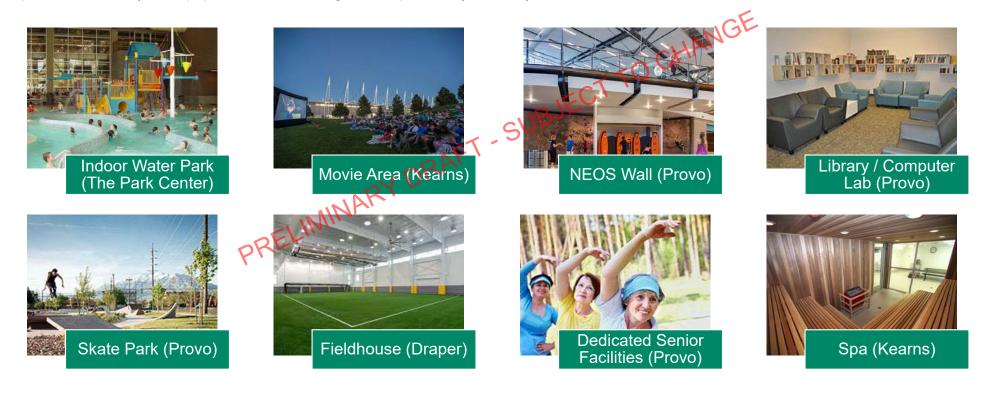

In terms of less popular amenities identified at the five centers within ACSC's resident market area:

- ACSC and Cottonwood Heights are the only centers with racquetball courts
- Dimple Dell has badminton courts _
- ACSC and Holladay Lions have a baseball / softball facility
- ACSC and Cottonwood Heights are the only centers with tennis courts (outdoor courts)
- Draper has a fieldhouse onsite and thus can offer indoor field sports such as soccer
- Cottonwood Heights has the only indoor ice rink _
- Cottonwood Heights has the only spa _
- Draper has batting cages
- Dimple Dell has a climbing wall
- The Park Center has a game room

Regional Recreation Centers – Unique Amenities Offered in Region

Outside of the somewhat more typical recreation center amenities offered, the regional centers offer a few unique experiences, including the below. Unique amenities may draw populations from a larger area, potentially from beyond a 15-minute drive time.

DRAFT

August 2021

Regional Recreation Centers – Recent Renovations

Three of the regional recreation centers underwent recent renovations.

- Cottonwood and Provo both added pickleball courts
- Provo's renovation included a unique NinjaCross indoor obstacle course
- Kearns greatly expanded its offering, adding multiple fitness and training areas

Cottonwood Heights (2018)

The outdoor dive tank was completely rebuilt in 2018. 6 pickleball courts were added adjacent to course; added 3rd fitness studio; new amenities the facility over the last 5 years. HVAC upgrades added to outdoor activity pool; converted 1 of the Oquirrh Park Fitness Center and the Utah and replacements and a new Zamboni.

Provo (2020)

Page 58

Installed the first indoor NinaCross obstacle outdoor tennis courts to pickleball courts; 3 basketball courts were redesigned to feature official Utah Jazz replica courts; expanded membership to the Triple Play Membership which inside the new building. gives amenity access to members at Golf Course, Ice Arena, and Fieldhouse Fitness facilities.

BJECT TO CHANGE Kearns (2018)

The new construction added nearly 13,000 square feet to the facility. It connects the Kearns Olympic Oval. It also houses an athlete training area for Olympic athletes. There is over 10,000 square feet of cardio and weight equipment

The first floor has weight and strength equipment, and the second floor has the cardio machines. It is furnished with all new equipment. Center management is in the process of selling a parcel of land to finance its new machines.

Regional Recreation Centers – Estimated Market Penetration

Compared to the other regional recreation centers reviewed, ACSC has few members and substantially lower attendance per year.

Estimated membership penetration for ACSC is in line with Draper's and slightly lower than both The Park Center and Holladay Lions, however, it is substantially lower than the average (4.0%) and median (3.2%) of the group.

Estimated attendance penetration for ACSC is substantially lower than all other reviewed facilities, at 23.8%. The average is approximately 223.4% and median is 104.5% for the group.

		Est. Visits per Year		Membership Mkt.	Attendance Mkt.
Facility	Est. # of Members	/ Attendance	(0-to-15-min. DT)	Penetration	Penetration
Orem Family Fitness Center	17,000	1,200,000	364,000	4.7%	329.7%
Cottonwood Heights Recreation Center	13,850	350,000	428,000	3.2%	81.8%
Provo Recreation Center	25,000	2,035,000	271,000	9.2%	750.9%
The Park Center	5,000	330,000	621,000	0.8%	53.1%
Dimple Dell Recreation Center	LIMIN N/A	N/A	402,000	N/A	N/A

Page 59

August 2021

Regional Competitive Private Facilities

As seen in the map at right, within a 15-minute drive time of ACSC, Esri identifies 47 health clubs, studios, and gymnasiums (a detailed list can be found in the Appendix).

The range of basic amenities offered by these facilities includes:

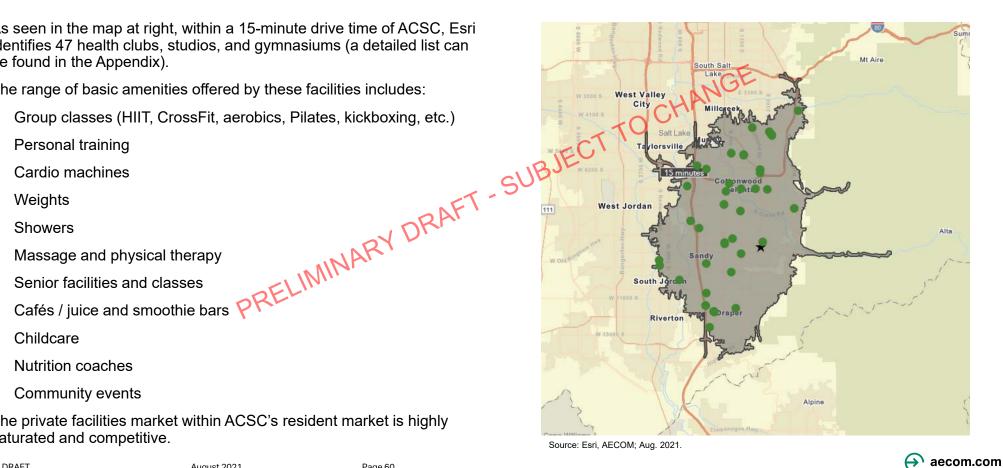

- Group classes (HIIT, CrossFit, aerobics, Pilates, kickboxing, etc.) _
- Personal training
- _
- _
- _
- _

- Community events

The private facilities market within ACSC's resident market is highly saturated and competitive.

DRAFT

August 2021

Local Market Analysis – Key Takeaways

The resident market population supporting attendance at ACSC is growing and has healthy household income levels. It is also generally very active and has high levels of sports participation.

The regional market is saturated in terms of comparable recreation centers; within a 15-minute drive of ACSC, there are five other facilities.

Most all the regional comparable facilities have an indoor pool, gyms, fitness studios, multipurpose rooms, and childcare services.

A few facilities in the area have undergone recent renovations or recently opened. Pickleball courts, parkour obstacle courses, and bigger, better fitness offerings were among the newly-added components at these.

Some facilities in the area also offer more unique experiences, such as dedicated senior facilities, a skate park, and a movie area; these unique amenities may draw populations from a larger area than the 15-minute drive time area.

The surrounding area is also saturated with private gym facilities.

In general, ACSC currently penetrates the resident market far less than the other regional facilities. Estimated membership and total annual attendance penetration rates are significantly below average and median levels for the reviewed group. This implies that there may be room for improvement at ACSC.

Phase 2: Market Demand Analysis

Alta Canyon Sports Center

Feasibility Analysis

Delivering a better world

즑 aecom.com

Market Demand Analysis – Introduction

In this section, AECOM identifies key trends in the industry, potential gaps and opportunities in the regional market, and possible recommendations for the renovation and updating of ACSC.

As part of this research, AECOM conducted a series of interviews with the Sandy City Council and Alta Canyon Sports Center Board of Directors as well as a public input session. In addition, AECOM and the City conducted an online interview to gather insights into potential improvements that could be made to the Sports Center.

PRELIMINARY DRAFT-

August 2021

Stakeholder Interviews – Sandy City Council

Goals of ACSC Renovation Effort	Key Council "Success" Factors	Amenities to Consider	Benchmark / Aspirational Facilities
Provide asset that draws from entire City, across all demographics	Expand draw area across entire City	Heavy demand for pickleball in area	Cottonwood Heights Recreation Center (indoor pool, ice rink)
Provide community gathering space	Increase revenues, with goal of break-even operations	Need more indoor sports fadilities	Provo Recreation Center
Ensure facility is sustainable for future generations	Consider renovation vs. new construction	New/improved pool (consider indoor pool)	Murray Recreation Center
Provide new location for Parks and Recreation department offices	Leverage partners, donors and investors to support ACSC	Indoor tennis	Crestwood Recreation Center (community gathering place)
Modernize ACSC, lighten and brighten the space, "bring the outside inside"	Provide connectedness between physical and overall wellness	Indoor track (walking and running)	Dimple Dell Recreation Center
Focus on local users first; visitor	Serve all ages through all seasons	Multiple attractions "don't want to be a one-trick pony"	Holiday Lions Recreation Center
		Think "outside the box" (i.e., health clinic/classes, nature-based activities, computer lab/gaming area)	South Davis Recreation Center
			Oquirrh Recreation Center (unique funding/operations model)
DRAFT August 202	1 Page 64		↔ aecom.com

Stakeholder Interviews – ACSC Board of Directors

Goals of ACSC Renovation Effort	How does Board define "Success?"	Amenities to Consider	Benchmark / Aspirational Facilities
Provide updated and expanded facility	Maintain break-even operations	Indoor track (recreational walking/jogging)	Bountiful / South Davis Recreation Center
Increase accessibility beyond existing base (expand classes, before and after school programming, etc.)	Maximize local utilization, visitors secondary	Pickleball and tennis facilities	Herriman Recreation Center (Salt Lake County facility)
Make facility family oriented with unique individual components and activities that appeal across generations	Expand revenue generating programming (childcare, summer camps)	Indoorpool (include waterpark features)	Provo Community Recreation center
Make facility more year-round, consider indoor pool and track (walking/jogging)	Become a place that members return to regularly	Indoor multi-purpose courts (basketball, volleyball, pickleball, etc.)	Draper Recreation Center
Consider expanding Special Service District to increase funding and support	PRELING	Expanded childcare space	
Increase gathering space, provide social rooms		Improved entrance/security/check-in space, improve overall flow of facility	
Provide more open feel, bring outside inside			

Stakeholder Interviews – Public Input Session

ACSC is a "hidden jewel" that needs to be developed and improved	Consider unique funding opportunities, understand funding mechanisms for regional facilities	Expand the tax base to entire City (multiple similar comments)	Future considerations, flexibility and adaptability are important going forward	People would be willing to pay higher fees for more offerings/amenities	Need basketball courts available for G youth leagues	Consider building new vs. renovation
Treat the ACSC and surrounding area as "sacred"	Increase fitness classes, expand weight room, spin room and fitness center	Needs to be a true community center	Have membership at other rec centers due to lack of amenities at ACSC; would consider returning to ACSC with renovation	Expand already successful childcare programming; programs need more space	Expand offerings for teenagers, provides foundation for healthy lifestyle as they grow older	Esports is growing and should be considered as offering
Facility should be available for everyone to enjoy	More windows, too dark inside, low ceilings, bad air conditioning	Consider covering pool for winter months to make year- round?	Pool and fitness classes are most important offerings	Outdoor lighted tennis/pickleball courts would be great	Indoor tennis is needed in the area	Expand operating hours
No commercial development (rumors about commercialization and high-density housing)	Keep the outdoor pool, views are best in the region	Pickleball in heavy demand	Improve security in parking lots, lighting important, safe drop- off areas	Offer outdoor classes	Indoor walking/jogging track	Create something new, something we don't have, unique to Sandy

Survey Results – What is ACSC Missing?

Based on survey results from ACSC community outreach, the top amenities recognized as missing from / users would like to see at the facility included:

- Indoor pool
- Better weight room
- More courts (basketball and pickleball)
- More area / larger rooms
- Updated equipment
- Running / walking track

The amenities identified above present potential opportunities for improvement at the existing ACSC, which could help better align the facility with the competition in the region

estimation of the second state of the second s

Resident Preferences at Other Regional Facilities

South Davis Recreation District recently conducted a survey to see what types of amenities residents are interested in. It was found that residents were interested in increased opportunities and improved facilities for:

- Outdoor pools 1.
- 2. A recreation center
- 3. Pickleball
- Tennis courts (indoor and outdoor) 4
- Senior facilities 5.

DRAFT-50 mete skate park ball cour amily pass

Kearns Oquirrh Park Fitness Center also recently conducted a survey to see what types of amenities residents are interested in. It was found that residents were interested in increased opportunities and improved facilities for:

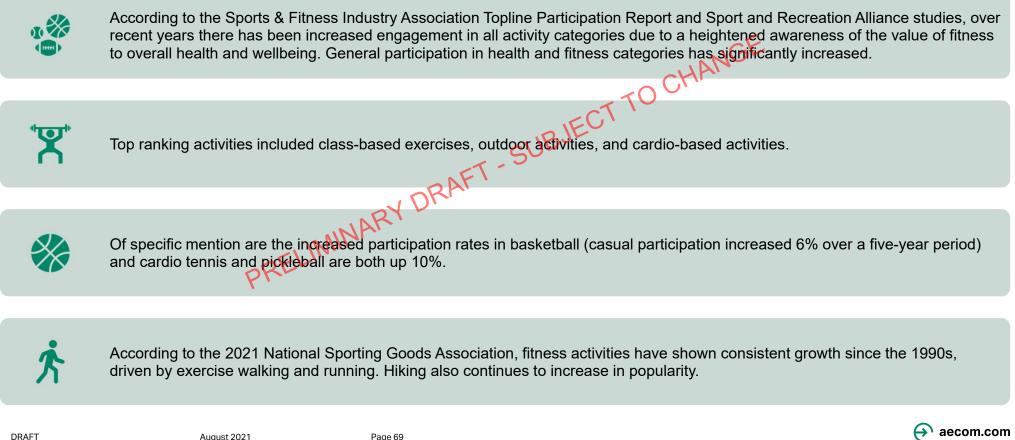

- More fitness classes (voga, Zumba, aerobics, etc.) 1.
- Rock climbing 2.
- Racquetball facilities 3.
- 4 Better pool facilities

DRAFT

Recommended Improvements

Based on the conducted analysis, in order to better the offering at ACSC, AECOM has identified a collection of recommended improvements at the facility. Provide the subject to change of the subject t

AECOM recommends:

Increasing the size of the fitness and weight areas, and generally upgrading the equipment

Page 70

- Adding basketball courts
- Adding pickleball courts _
- Adding outdoor tennis courts _
- Adding multipurpose / flex space for programming
- Adding designated space for teens and seniors
- Adding a unique, "out of the box", or "wow" component _
- Improving the childcare areas _
- Improving the office spaces

Although an indoor pool was repeatedly identified as a preferred improvement by users, based on the competition in the immediate market, the hefty cost associated, and talks with industry professionals regarding the cost basis of this construction, AECOM does not recommend enclosing the existing outdoor pool or adding an indoor pool at this time. AECOM suggests, however, to upgrade or renovate the existing pool support spaces and remove the spa / sauna, to be replaced with additional locker (gender-neutral) space.

Recommendation – Fitness & Weight Room Areas

The existing fitness areas and weight room at ACSC are very outdated and noted to be cramped. AECOM recommends increasing the size and space available for general fitness equipment and weights. AECOM also recommends updating the weight room equipment available to patrons.

Regional recreation centers have fitness areas ranging in size from approximately 3,000 to 10,000 square feet. By increasing the fitness area to approximately 5,000 square feet and updating the equipment, ACSC's offering will be more competitive in the market. PRELIMINARY DRAFT

ACSC Cardio

Improved Fitness Area

Updated Equipment

August 2021

Recommendation – Basketball / Volleyball Courts & Indoor Track

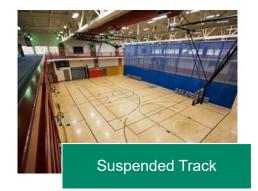

ACSC currently does not have any basketball courts. Typically, these types of courts can be configured for all forms of basketball (high school, junior high, elementary, etc.) and can also function as volleyball courts or other indoor sport courts.

Within the region, most facilities have between two and four available basketball courts.

AECOM recommends two indoor basketball courts be added at ACSC. A single basketball court is typically around 8,000 square feet, while a double basketball court takes up closer to 14,000 square feet.

AECOM also recommends adding a suspended walking track above the courts.

A aecom.com

August 2021

Recommendation – Tennis & Pickleball Courts

AECOM recommends the addition of four outdoor tennis courts at ACSC. These can potentially be enclosed or partially enclosed to extend the season.

Given the increasing demand for the sport, AECOM also recommends that these courts be marked for pickleball as well.

Page 73

A aecom.com

Recommendation – Multipurpose / Flex Space / Teen & Senior Area

ACSC currently has a multipurpose room that is used for fitness classes and rentals.

There is increasing demand for flexible gathering and community space.

AECOM recommends adding more multipurpose area in the form of an approximately 3,000 square foot room, divisible into 600 and 700 square foot blocks.

Programming types may include senior programming, additional space for after school programs, leisure classes, game room or lounge, STEM classes, etc.

AECOM recommends having some designated space for teens and seniors, at approximately 500 square feet per use.

Teen Area

Senior Facilities

August 2021

Recommendation – Unique Experience – Example: Stacked Aerial Course

AECOM also recommends some kind of added unique experience.

A stacked aerial course, also sometimes referred to as high ropes or vertical adventure course, is a modular climbing attraction.

- They are typically up to four levels tall
- They have a small footprint, approximately 1,000 to 10,000 square feet. Can be indoors or outdoors. Estimated at ACSC around 2,500 square feet
- The attraction capacity can reach up to 160 persons

Due to their flexible nature, these constructions can be easily extended; add-ons may include a course specific for kids, a giant swing, an abseiling station, zip lines, mini golf, and more.

This use type may work very well at ACSC given.

- The target market is large; there are climbing paths for both young and old
- Stacked aerial courses also offer event opportunities. They are often used for birthday party or corporate teambuilding rentals
- These attractions support health and wellness, adventure and thrill, and solution-based challenges

Snow Valley Aerial Park (Edmonton, CAN)

DRAFT

Page 75

즑 aecom.com

Recommendation – Unique Experience – Example: Surf Attraction

Another example of a unique experience is a surf attraction.

There are many types of small-scale surf attractions now available in the market. These attractions provide users with a customizable, engineered wave to surf or boogieboard on.

- They come in wide range of sizes, from compact to multi-user layouts
- They have a small footprint, approximately 1,000 to 1,700 square feet
- The attraction capacity can reach up to approximately 500 rides per hour

Given their standalone construction, these products can easily be positioned at an existing facility.

This use type may work very well at ACSC given:

- The target market is large; mainly targeted at children, teenagers, and young adults, but that could also be done by other adults
- Wave machines also offer event opportunities. They are often used for birthday party or community event showcases and rentals
- These attractions support health and wellness, adventure and thrill, and can be used as a training system

DRAFT

August 2021

Recommendation – Childcare Area

ACSC currently provides a before and after school care program, a play and learn preschool care option, an hourly childcare center, and summer camps. The out of school time program has an estimated capacity of 135 children. Capacity is estimated for the hourly care around 30 children.

AECOM recommends adding to and improving these services; in the ACSC survey results, many users identified the importance of this offering. AECOM recommends adding 15 to 20% more space for this use type, maintaining a similar breakdown of spaces as the last renovation program.

Based on available data, most regional recreation centers have smaller childcare programs, with capacities ranging from 15 to 100 children. ACSC has one of the larger programs in the area.

August 2021

- Two story entrance with climbing feature creates attraction from exterior
- Maintain existing locker facilities (with modernization)
- Office program moved to second level, allows direct access from exterior
- Loading dock relocated to east, away from patron areas
- Exterior access to pool area maintained

- Dock location may require new curb cut on E 9510 S
- Tennis courts tucked to rear of site, require significant grading/excavation and addition of new parking to east

 \mathbf{A} aecom.com

1. ACTIVITY SPACE 2. ADMINISTRATIVE 6. CIRCULATION 7. VERT. CIRCULATION Level 2 SF: 18,425 Total Gross SF: 74,925

Pros:

- Two story linear entrance creates dynamic exterior presence with views to interior, including climbing feature
- Existing tennis courts remain in place, resurfaced and improved
- Potential pool enclosure can be fully integrated with new construction
- Existing pool equipment maintained with new locker and support spaces
- Minimal excavation required
- Office program segregated to second level with direct access from main lobby

Cons:

- Fill/retaining wall required at west near loading dock
- · Pool accessible only through building, no exterior access
- Conflict with existing Cel Twr

DRAFT

Page 87

Pros:

- Two story linear entrance creates dynamic exterior presence with views to interior, including climbing feature
- Building has strong presence at NW corner of site at vehicular intersection
- Office program segregated to second level with direct access from main lobby
- Pool is accessible from **Exterior & Interior**
- Building placement allows for expansive "Plaza" connecting the pool & program spaces

Cons:

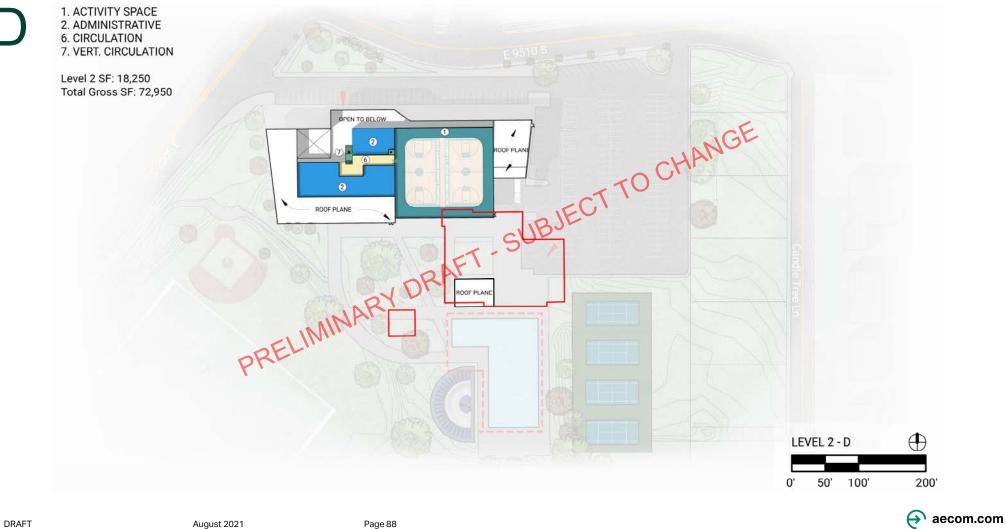

- Pool is separated from the main facility
- · Reconstruction of main parking area required, possibly at higher elevation than facility main floor \oplus
