File #: GPA-Stadium Village-Outreach, **Version:** 1

Agenda Item Title:

The Community Development Department will introduce Gateway Planning, the consultant for the Stadium Village Master Plan. Gateway Planning will conduct a discussion with the City Council as part of Gateway Planning's initial outreach efforts to receive input regarding concerns, opportunities, and potential impacts of the Stadium Village area.

Presenter:

Jake Warner

Description/Background:

The City has hired a consultant team, led by Gateway Planning, to conduct outreach and create a master plan for the Stadium Village district of the The Cairns area. The project area included in the Stadium Village Master Plan extends from 9000 S. to approximately 9600 S. and from I-15 to beyond State Street, following the East Jordan Canal. Staff held a kick-off meeting with the consultant team on January 24. Since that initial kick-off meeting, Gateway Planning has been researching and analyzing information pertaining to the Stadium Village area. As a part of these early stages in the planning process, the consultant team will be conducting outreach events from April 30 to May 2. These events will include a public open house, stakeholder interviews, meetings with City staff, and this scheduled discussion with the City Council. The primary purpose of the outreach events will be for the consultant team to receive input regarding the strengths, weaknesses, opportunities, and concerns associated with the Stadium Village area.

The next significant step in the process will be a design workshop scheduled for June 5th and 6th. Public events will also be held in association with the design workshop.
