Agenda Item Title:

Council Member Robinson requesting that the council continue discussing the Alta Canyon Recreation Center, specifically the future of the Special Service District and scenarios for funding a rebuild and/or remodel of the Center

Presenter:

Zach Robinson, Council Member District 3

Description/Background:

In early 2020, the City Council underwent a capital projects prioritization process, which led to the identification of the Alta Canyon Sports Center (AC) as one of a handful of capital priorities. Once AC was identified as a council priority, the administration hired a consultant (AECOM) to conduct a feasibility analysis. In 2021, the Council adopted a timeline (Exhibit "A") for our decision-making surrounding the Alta Canyon Sports Center and the Special Service District that supports the Center. Of the five steps in the outline, we've made it to step 3: "financing major improvements." There are three questions that the council needs to answer while working through this step:

1. Which scenario(s) is the council interested in pursuing?
 - a. This question was answered on March 29, 2022, when the council selected rebuild/remodel Options B and D to gather public input on. For more information you can review the March 29th video recording http://sandyutah.granicus.com/MediaPlayer.php?view_id=1&clip_id=619.
2. What happens to the Special Service District? (Tonight)
3. How do we fund the selected improvements and services? (Tonight)

Further action to be taken:

Following the determination of the future of the SSD, and the selection of possible funding scenarios I'd suggest that the council selected options be included in any outreach and education efforts to residents. The Council will also need to set a date to address the next step in our timeline, operations.

Recommended Action and/or Suggested Motion:

If possible, I'm requesting that the council select, or at least narrow down to, one or more options surrounding the future of the special service district and possible funding scenarios.
